**Answers and Solutions**

**Q:1** The correct answer is **option 4** i.e. **P**.

Here, in both the dice, V, Q, S, and U are adjacent to T. So, the remaining letter **P** will be opposite of T.

**Q:2** The correct answer is **option 4** i.e. **M**.

When we compare both dice, we see that Z is common on both dice. So, the remaining numbers are opposite each other.

Hence, the opposite of Z is **M**.

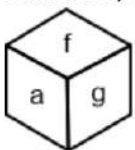

**Q:3** The correct answer is **option 3**

'x' and 'c' are the opposite sides.

'a' and 'f' are the opposite sides.

'd' and 'g' are the opposite sides.

As, we know that two opposite sides can not be adjacent surfaces, so it can't be shown in a dice.

In this 'a' and 'f' are the opposite sides, so, this dice cannot be formed.

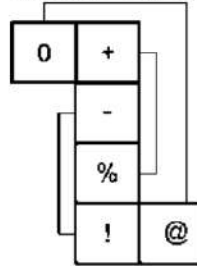

**Q:4** The correct answer is **option 4** i.e. **Y**.

In both dice, I is common and at the same surface, then the remaining surfaces will be opposite to each other.

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | I | A | O |
| Dice 2 | I | Z | Y |

Thus, the letter **Y** is on the face opposite to O.

**Q:5** The correct answer is **option 4**

The opposite pair (+ and %) can not be adjacent so, option 4 can't be formed.

**Q:6** The correct answer is **option 4** i.e. **S**.

The figure is rotated in a clockwise direction from the common letter R.

Opposite Pairs:

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | R | P | T |
| Dice 2 | R | Q | U |

$P \leftrightarrow Q$ ,  $T \leftrightarrow U$ , So, the remaining side S is opposite to R. Hence, **S** is the opposite face of R.

**Q:7** The correct answer is **option 4** i.e. **4**.

On comparing first and second dice we get 1 and 3 common in both dice. So the remaining number 2 is the opposite to 4.

**Q:8** The correct answer is **option 3** i.e. **24**.

On comparing both dice we get 24 is the common number in both dice. So, the remaining numbers are opposite to each other. Hence, the opposite of **24** is **16**.

**Q:9** The correct answer is **option 2** i.e. **Y**

In dice 1 and 3, moving clockwise from X:

X A U

X C T

So, Y is opposite to X.

Hence, the correct answer is **Y**.

**Q:10** The correct answer is **option 2** i.e. **3**.

In dice 1 and 2, moving clockwise from 6:

$\Rightarrow 6 \ 3 \ 2$

$\Rightarrow 6 \ 5 \ 1$

So, 3 is opposite to 5.

Hence, the correct answer is **3**.

**Q:11** The correct answer is **option 3** i.e. **m**.

In dice 1 and 2, moving clockwise from x:

$\Rightarrow x \ y \ z$

$\Rightarrow x \ m \ n$

So, m is opposite to y.

Hence, the correct answer is **m**.

**Q:12** The correct answer is **option 1** i.e. **12**.

In the first and second cubes, 6 and 8 are common. So, the remaining faces are opposite to each other. So, 2 is opposite to 12.

Hence, the correct answer is **12**.

**Q:13** The correct answer is **option 2** i.e. **9**.

On comparing both dice we get 9 is the common number in both dice. So, the remaining numbers are opposite to each other. Then, the opposite of **6** is **9**.

**Q:14** The correct answer is **option 1** i.e. **j**

h is opposite to l.

j is opposite to n.

p is opposite to r.

So, the letter that will be opposite to 'n' is 'j'.

**Q:15** The correct answer is **option 4** i.e. **6**.

On comparing both dice we get 6 is common in both dice. So, adjacent to 6 is not opposite to 6.

Hence, the opposite of 1 is **6**.

**Q:16** The correct answer is **Option 4** i.e. **2**

On comparing both dice we get 2 is common number in both dice. So remaining numbers are opposite to each other. Hence, 4 is opposite to **2**.

**Q:17** The correct answer is **option 3** i.e. **60**

On comparing both dice we get 60 is common in both dice so, adjacent of 60 is not opposite to 60.

Therefore, opposite of **50** is **60**.

**Q:18** The correct answer is **option 4** i.e. **7**

On comparing both dice we get 7 is common in both dice so, adjacent of 7 is not opposite of 7.

Therefore opposite of **8** is **7**.

**Q:19** The correct answer is **option 3** i.e. **2**.

On comparing 1 and 3 dice we get 4 common on both dice. So, moving clockwise from 4;

**4 2 3**

**4 6 5**

So, **2** is opposite to 6.

**Q:20** The correct answer is **option 1** i.e. **X**.

On comparing both dice we get X is common in both dice. So, adjacent of X is not opposite of X

Hence, **Y** is opposite of **X**.

**Q:21** The correct answer is **option 1** i.e. **N**.

On comparing both dice we get N is common alphabet in both dice. So adjacent of N is not opposite of N

Hence, **X** is opposite to **N**.

**Q:22** The correct answer is **option 1** i.e. **Z**.

When the sheet is folded along the lines, the opposite pairs are;

Z is opposite to Y.

U is opposite to X.

V is opposite to W.

Thus, Y is opposite to Z.

Hence, **Z** is the correct answer.

**Q:23** The correct answer is **option 3** i.e. **3**.

In both the dice, 3 is common. So, start rotating either in the clockwise or anticlockwise direction.

**Clockwise direction:**

Dice 1: 3 1 8

Dice 2: 3 7 5

**Anticlockwise direction:**

Dice 1: 3 8 1

Dice 2: 3 5 7

So, 6 is opposite to 3.

Hence, **3** is the correct answer.

**Q:24** The correct answer is **option 3** i.e. **%**.

When the sheet is folded along the lines, the opposite pairs are;

% is opposite to  $\neq$ .

$\mu$  is the opposite to  $\yen$ .

$\infty$  is the opposite to  $\pi$ .

So, % is opposite to  $\neq$ .

**Q:25** The correct answer is **option 1** i.e. **4**.

On comparing both dice we get 9 is common in both dice. So, the remaining are opposite to each other.

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | 9 | 5 | 3 |
| Dice 2 | 9 | 2 | 4 |

Hence, the opposite of 3 is **4**.

**Q:26** The correct answer is **option 4** i.e. **T**.

On comparing both dice we get **A** is common in both dice. So, adjacent of A is not opposite of A.

Hence, opposite of **A** is **T**.

**Q:27** The correct answer is **option 1** i.e. **Black**.

When the sheet is folded along the lines, the opposite pairs are;

Blue is opposite to Black.

Red is opposite to Pink.

Green is opposite to White.

So, Blue is opposite to Black.

**Q:28** The correct answer is **option 2** i.e. **M**.

When the sheet is folded along the lines, the opposite pairs are;

H is opposite to L.

K is opposite to M.

J is opposite to I.

Hence, K is opposite to M.

**Q:29** The correct answer is **option 1** i.e. **21**.

When the sheet is folded along the lines, the opposite pairs are;

21 is opposite to 20.

22 is opposite to 24.

23 is opposite to 25.

Hence, 20 is opposite to 21.

**Q:30** The correct answer is **option 2** i.e. **&**.

When the sheet is folded along the lines, the opposite pairs are;

@ is opposite to &.

# is opposite to }.

^ is opposite to \*.

Hence, @ is opposite to &.

**Q:31** The correct answer is **option 2** i.e. **\***.

When the sheet is folded along the lines, the opposite pairs are;

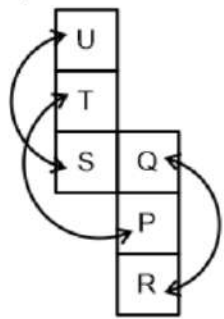

\* is opposite to @.

# is opposite to \$.

^ is opposite to %.

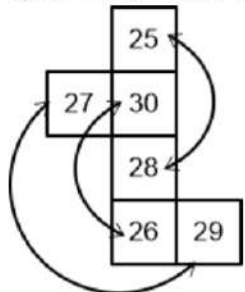

Hence, @ is opposite to \*.

**Q:32** The correct answer is **option 4** i.e. **Q**.

To form a cube the opposite pairs should not be adjacent. So, the opposite of **R** is **Q**.

**Q:33** The correct answer is **option 4** i.e. **26**.

To form a cube the opposite pairs should not be adjacent. So, the opposite of **30** is **26**.

**Q:34** The correct answer is **option 4** i.e. **M**.

The opposite sides are:

$J \Leftrightarrow O$

$K \Leftrightarrow M$

$T \Leftrightarrow H$

Thus, M letter will be opposite to the letter K.

Hence, the correct answer is **M**.

**Q:35** The correct answer is **option 3** i.e. **7**

The number 5 is common in both the dice. So, we write the numbers in a clockwise direction which will show the opposite pairs.

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | 5 | 7 | 6 |
| Dice 2 | 5 | 8 | 9 |

So, 7 is the opposite of 8.

**Q:36** The correct answer is **option 2** i.e. **6**

In dice 1 and 2, numbers 2 and 3 are common so, the remaining numbers 1 and 6 in dice 1 and dice 2 respectively, are opposite.

Hence, the correct answer is **6**.

**Q:37** The correct answer is **option 3** i.e. **3**.

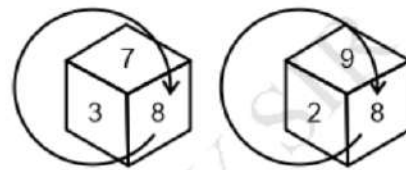

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | 5 | 9 | 8 |
| Dice 2 | 5 | 7 | 2 |

On comparing both dices we get that 5 is common on both dices. So, the remaining numbers are opposite to each other.

Therefore, **3** is opposite to 5.

**Q:38** The correct answer is **option 1** i.e. **8**.

From dice 1 and 2:

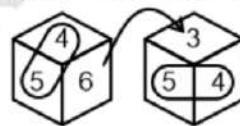

8 is common surface in both dice, then we rotate in a clockwise direction start from 8:

We get:  $8 \Leftrightarrow 4$ ;  $3 \Leftrightarrow 2$ ;  $7 \Leftrightarrow 9$ ;

**8** will be on the face opposite to the one having 4.

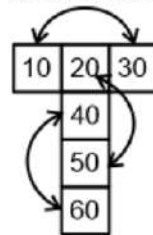

**Q:39** The correct answer is **option 3** i.e. **6**.

In both dice, 4 and 5 are common. So, remaining surface will be opposite to each other.

Thus, **6** will come on the face opposite to the face containing '3' on it.

**Q:40** The correct answer is **option 1** i.e. **50**.

So, **50** will be opposite to the number '20'.

**Q:41** The correct answer is **option 1** i.e. **M**.

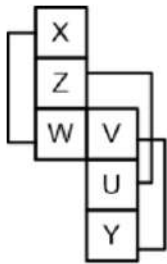

P is common in both dices, then we will rotate in clockwise direction starting from P.

$P \Leftrightarrow P$ ;  $F \Leftrightarrow M$ ;  $I \Leftrightarrow N$

So, **M** will come on the face opposite to the face containing 'F' on it.

**Q:42** The correct answer is **option 2** i.e. **Y**.

Y is opposite to 'V'.

Hence, the correct answer is y.

**Q:43** The correct answer is **option 1** i.e. 2.

On comparing given two dice, we get

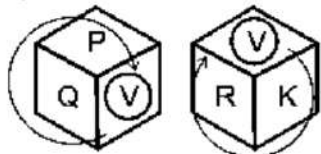

In these two positions, one digit has common faces having 1 in the same position.

So, 6 is opposite to 5 and 8 is opposite to 2.

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | 1 | 6 | 8 |
| Dice 2 | 1 | 5 | 2 |

Hence, the correct answer is 2.

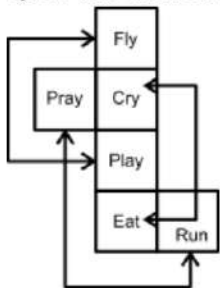

**Q:44** The correct answer is **option 2** i.e. Q.

From both dice, V is common. So, we can rotate in a clockwise direction starting from V.

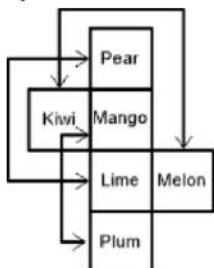

So, Q will come on the face opposite to the face containing 'K' on it.

**Q:45** The correct answer is **option 4** i.e. **Pray**.

Alternate surfaces are opposite to each other. So, **Pray** will be the opposite of Run.

**Q:46** The correct answer is **option 3** i.e. **Lime**.

Alternate surfaces are opposite to each other. So, **Lime** will be the opposite of Pear.

**Q:47** The correct answer is **option 4** i.e. %.

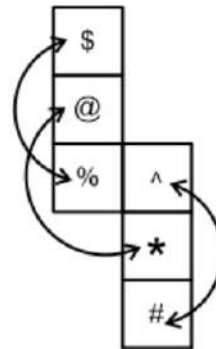

As we know alternate surfaces are opposite to each other in open dice. Then % will be opposite to \*.

**Q:48** The correct answer is **option 3** i.e. **Fly**.

As we know alternate surfaces are opposite to each other in open dice. Then **Fly** will be opposite to Eat.

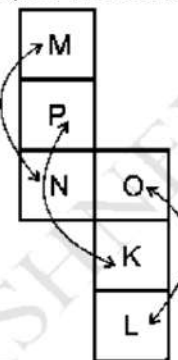

**Q:49** The correct answer is **option 1** i.e. \*.

As we know that alternate surfaces are opposite to each other in open dice.

Thus, \* will be the symbol on the opposite side of '@'.

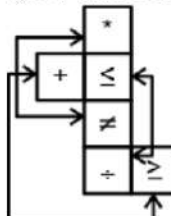

**Q:50** The correct answer is **option 3** i.e. **M**.

As we know that alternate surfaces are opposite to each other in open dice.

Thus, **M** will be the letter on the opposite side of 'N'.

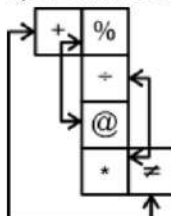

**Q:51** The correct answer is **option 1** i.e. ÷.

As we know, alternate surface are opposite to each other in open dice.

Thus, '≤' will be the symbol on the opposite side of '÷'.

**Q:52** The correct answer is **option 3** i.e. \*.

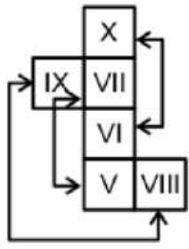

As we know, alternate surface are opposite to each other in open dice.

Thus, '\*' will be the symbol on the opposite side of '÷'.

**Q:53** The correct answer is **option 4** i.e. **VIII**.

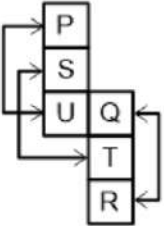

As we know that alternate surfaces are opposite to each other.

Thus, **VIII** would be the Roman numeral on the opposite side of 'IX'.

**Q:54** The correct answer is **option 2** i.e. **T**.

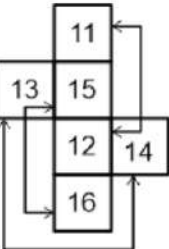

As we know that alternate surfaces are opposite to each other.

Thus, **T** will be the letter on the opposite side of 'S'.

**Q:55** The correct answer is **option 1** i.e. **15**.

As we know that alternate surfaces are opposite to each other.

Thus, **15** will be the number on the opposite side of '16'.

**Q:56** The correct answer is **option 3** i.e. **J**.

**J** is common in both dice and at the same surface. So, the remaining surfaces are opposite to each other.

Opposite pairs:

$K \Leftrightarrow L$

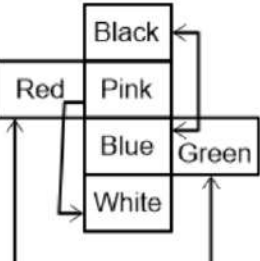

$P \Leftrightarrow E$

$J \Leftrightarrow M$

Thus, the letter **J** is on the face opposite to the face containing **M**.

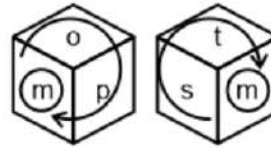

**Q:57** The correct answer is **option 1** i.e. **Red**.

As we know that alternate surfaces are opposite to each other.

Thus, **Red** will be the word on the opposite side of 'Green'.

**Q:58** The correct answer is **option 1** i.e. **o**.

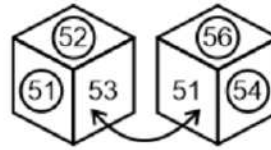

In both dice, **m** is common, so we will rotate in clockwise direction start from **m**.

Thus, the letter opposite of **s** is **o**.

**Q:59** The correct answer is **option 2** i.e. **55**.

From dice 1 and 3, 52 and 53 are common. So, the remaining surface will be opposite to each other.

Thus the number **55** is the opposite of 51.

**Q:60** The correct answer is **option 1** i.e. **T**.

The figure is rotated in a clockwise direction from the common letter **V**.

Opposite Pairs:

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | V | Z | Q |
| Dice 2 | V | L | T |

Hence, '**T**' is the opposite face of '**Q**'.

**Q:61** The correct answer is **option 2** i.e. **21**.

From dice 1 and dice 3, the figure is rotated in a clockwise direction from the common number 25.

Opposite Pairs:

|        |    |    |    |
|--------|----|----|----|
| Dice 1 | 25 | 23 | 21 |
| Dice 3 | 25 | 22 | 24 |

Hence, '**21**' is the opposite face of '**24**'.

**Q:62** The correct answer is **option 4** i.e. **A**.

The figure is rotated in a clockwise direction from the common letter **R**.

Opposite Pairs:

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | R | M | A |
| Dice 2 | R | Y | S |

Hence, '**A**' is the opposite face of '**S**'.

**Q:63** The correct answer is **option 1** i.e. **R**.

The figure is rotated in a clockwise direction from the common letter **T**.

Opposite Pairs:

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | T | M | S |
| Dice 2 | T | R | P |

Hence, '**R**' is the opposite face of '**M**'

**Q:64** The correct answer is **option 4** i.e. **M**.

The figure is rotated in a clockwise direction from the common letter **M**.

Opposite Pairs:

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | M | T | A |
| Dice 2 | M | P | S |

Hence, 'M' is the opposite face of 'R'.

**Q:65** The correct answer is **option 2** i.e. **Y**.

The figure is rotated in a clockwise direction from the common letter W.

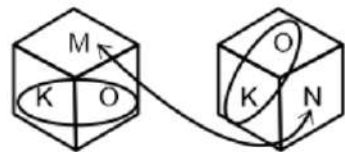

Opposite Pairs:

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | W | U | Y |
| Dice 2 | W | V | Z |

Hence, 'Y' is the opposite face of 'Z'.

**Q:66** The correct answer is **option 2** i.e. **N**.

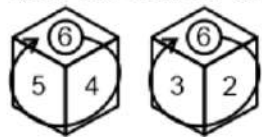

From dice 1 and 2,

K and O are common surface, then remaining surface will be opposite to each other.

So, the opposite of M = N.

**Q:67** The correct answer is **option 1** i.e. **6**.

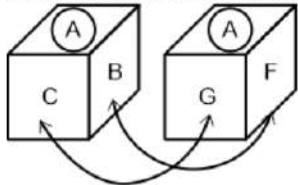

When the common surface is on the same surface then the remaining surfaces are opposite to each other.

From both dice, 6 is opposite to the face containing 1.

**Q:68** The correct answer is **option 2** i.e. **E**.

In both dice, A is common and on the same surface.

So, the letter E is on the face opposite to A.

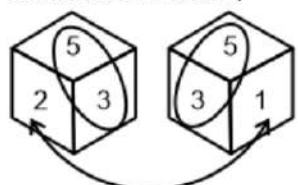

**Q:69** The correct answer is **option 3** i.e. **3**

In dice 2 and 3, the numbers 5 and 4 are common so, the remaining numbers will be opposite of each other.

Therefore, 3 is opposite to 6.

**Q:70** The correct answer is **option 4** i.e. **2**.

From dice 2 and 3,

5 and 3 are common surfaces in both dices then remaining surface will be opposite to each other.

So, 2 will be opposite to 1.

**Q:71** The correct answer is **option 3** i.e. **θ**

θ is common in both the dice, it is clear that α, β, γ, π, and δ are adjacent surfaces. So, the remaining θ will be the opposite side of β.

**Q:72** The correct answer is **option 4** i.e. **11**

As 16, 12, 15, and 13 are adjacent to the number 11, common in both dice.

So, the remaining 14 is the opposite of 11.

**Q:73** The correct answer is **option 3** i.e. **S**.

On comparing given two dice, we get

In cases like this where we have three positions of the dice, we choose those two positions where there is only one common side.

1st position: M → R → V

2nd position: M → T → S

Clearly, S is the face opposite to V.

Hence, the correct answer is 'V'.

**Q:74** The correct answer is **option 2** i.e. **2**.

In this type of question, we pick the common side and go in a clockwise direction in both positions.

In cases like this where we have three positions of the dice, we choose those two positions where there is only one common side.

In dice (II) and dice (III), 3 and 5 are common in both the dice. So, 2 is face opposite to 4.

Hence, the correct answer is '2'.

**Q:75** The correct answer is **option 2** i.e. **B**.

On comparing given two dice, we get

In these two positions, one letter have common faces having B in the same position.

So, C is opposite to S and T is opposite to D.

Clearly, B is face opposite of R.

Hence, the correct answer is 'B'.

**Q:76** The correct answer is **option 4** i.e. **ε**.

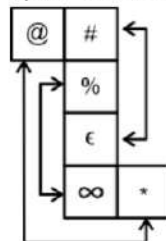

If two symbol are common in both the dice then the remaining symbol in dice are opposite to each other.

Here, ε are common in both the dice and θ is opposite ω and δ is opposite to η.

So, % is the face opposite to ε.

Hence, the correct answer is ε.

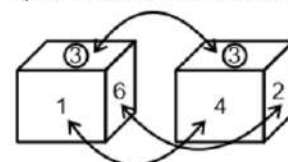

**Q:77** The correct answer is **option 3** i.e. **€**.

Alternate surfaces are opposite to each other.

The symbol on the opposite side of '#' is '€'.

**Q:78** The correct answer is **option 2** i.e. **3**.

In both dice, 3 is common and on the same surface. Thus, **3** is the number on the face opposite the face containing 5.

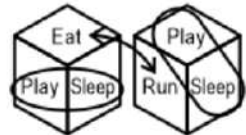

**Q:79** The correct answer is **option 1** i.e. **B**.

The letter S is common in both the dice, so we write the letters of dice 1 and 2 in a clockwise direction which will give the opposite pairs.

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | S | R | T |
| Dice 2 | S | P | M |

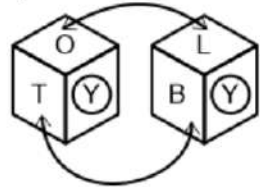

$R \Leftrightarrow P, M \Leftrightarrow T$ , so S will be opposite of **B**.

**Q:80** The correct answer is **option 4** i.e. **Run**.

In dice 1 and 3, Play and Sleep are common, then remaining surface will be opposite to each other. So, **Run** on the face is opposite to Eat.

**Q:81** The correct answer is **option 4** i.e. **O**.

In both dices, Y is common and on the same surface in both dices.

Then, the remaining surfaces will be opposite to each other.

So, letter **O** will be on the face opposite to the one having L.

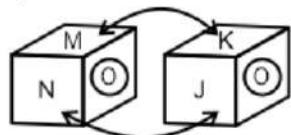

**Q:82** The correct answer is **option 3** i.e. **Z**.

In both dice, U and X are common. Then remaining surface will be opposite.

Thus, **Z** is opposite to V.

**Q:83** The correct answer is **option 4** i.e. **N**.

In both dice, O is common and on the same surface. Then remaining other surface will be opposite to each other.

Thus, **N** will be opposite to J.

**Q:84** The correct answer is **option 3** i.e. **E**.

From Dice 1 and Dice 2, in both dices, B and C are common. So, remaining surface will be opposite to each other.

So, **E** will be opposite to A.

**Q:85** The correct answer is **option 4** i.e. **M**

In both dice, K is common and on the same surface. So, remaining surface will be opposite to each other. Thus, the letter **M** will be on the face opposite to the one having B.

**Q:86** The correct answer is **option 2** i.e. **II**.

In both dice, V and III are common so remaining surface will be opposite to each other. Thus, the Roman number **II** is opposite to 'VI'.

**Q:87** The correct answer is **option 4** i.e. **10**.

In both dice, 8 and 9 are common, then remaining surface will be opposite to each other. So, **10** will be opposite to 7.

**Q:88** The correct answer is **option 4** i.e. **?**.

& is common in both dices so, moving clockwise from &: & % ?

& + @

So, ? is opposite to @.

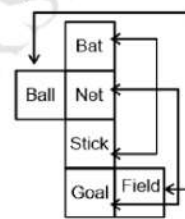

**Q:89** The correct answer is **option 1** i.e. **S**.

On comparing both dice we get X is common in both dice so, move clockwise from X;

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | X | S | T |
| Dice 2 | X | R | M |

Hence, **S** is opposite to R.

**Q:90** The correct answer is **option 1** i.e. **Field**.

To form a cube the opposite pairs should not be adjacent. So, the opposite of a Ball is a **Field**.

**Q:91** The correct answer is **option 1** i.e. **A**.

From both dice, D is common and on the same surface. So, the other remaining surfaces will be opposite to each other.

Thus, the letter **A** is on the face opposite to D.

**Q:92** The correct answer is **option 4** i.e. **F**.

A is common in both dice 1 and 3, moving clockwise from A:

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | A | D | B |
| Dice 2 | A | E | F |

So, **F** is opposite to B.

**Q:93** The correct answer is **option 4** i.e. **f**.

In both dices (ii) and (iii), d and e is the common. So, **f** will be opposite of c.

**Q:94** The correct answer is **option 4** i.e. **2**.

In both dice, P is common so we can rotate in clockwise direction start from P.

P 2 1

P 6 \$

Hence, **2** will be opposite of 6.

**Q:95** The correct answer is **option 3** i.e. **dance**.

From both dices, Cry and Play are common. So, remaining surface will be opposite to each other. So, **Dance** will be opposite to Eat.

**Q:96** The correct answer is **option 1** i.e. **R**.

From Dice 1 and Dice 2, O is common so we can move in clockwise from O:

O N M

O Q P

So, remaining letter is opposite to O.

Hence, **R** will be opposite to O.

**Q:97** The correct answer is **option 4** i.e. **T**.

As we can see in both dices J is common and on the same surface. So, the remaining surfaces will be opposite to each other.

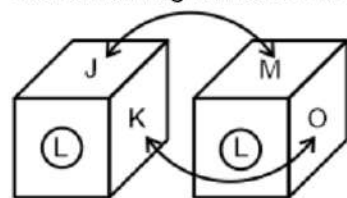

T ⇌ X

E ⇌ I

Thus, the letter **T** is on the face opposite to X.

**Q:98** The correct answer is **option 2** i.e. **L**.

L is common in both dice and at the same surface. Then the remaining surface will be opposite to each other.

Thus, the letter **L** is on the face opposite to N.

**Q:99** The correct answer is **option 3** i.e. **1**.

In both dices, 2 is common and on the same surface. Then the remaining surfaces will be opposite to each other.

Thus, the number **1** on the face is opposite the face containing 5.

**Q:100** The correct answer is **option 4** i.e. **2**.

On comparing both dice we get 3 is common in both dice so, move clockwise from 3;

3 5 6

3 2 7

Thus, the number **2** on the face is opposite to the one having 5.

**Q:101** The correct answer is **option 4** i.e. **F**.

On comparing both dice we get Z is common in both dice so, move clockwise from Z;

Z M G

Z H F

Thus, the letter **F** that will be on the face opposite to the one having G.

**Q:102** The correct answer is **option 3** i.e. **3**.

On comparing both dice we get 6 is common in both dice so, move clockwise from 6;

2 5 9

2 6 8

Thus, the number **3** that will be on the face opposite to the one having 2.

**Q:103** The correct answer is **option 1** i.e. **1**.

On comparing both dice we get 6 is common in both dice so, move clockwise from 6;

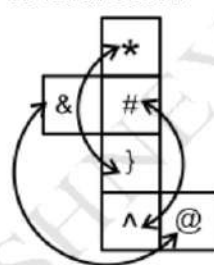

6 1 2

6 5 4

Hence, **1** is opposite to the face containing 5.

**Q:104** The correct answer is **option 2** i.e. **}**.

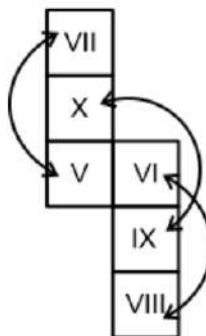

As we know, in open dice alternate surface are opposite to each other.

Thus, **}** will be the symbol on the opposite side of **\***.

**Q:105** The correct answer is **option 2** i.e. **VIII**.

As we know, in open dice alternate surface are opposite to each other.

Thus, **VIII** would be the roman number on the opposite side of VI.

**Q:106** The correct answer is **option 3** i.e. **Y**.

In both dices, Z is common so, move clockwise from Z:

Z A R

Z Y T

Thus, the letter **Y** is on the face opposite to the face containing A.

**Q:107** The correct answer is **option 1** i.e. **3**.

In dice 2 and 3, 6 is common and on the same surface. Then the remaining surface will be opposite to each other.

Thus, the number **3** is on the face opposite to the face showing '2'.

**Q:108** The correct answer is **option 3** i.e. **W**.

In both dices, J is common and on the same surface. Then the remaining surface will be opposite to each other.

Thus, the letter **W** is on the face opposite to P.

**Q:109** The correct answer is **option 1** i.e. **X**.

In both dice, R is common and on the same surface. Then the remaining surfaces will be opposite to each other.

Thus, the letter **X** is on the face opposite to C.

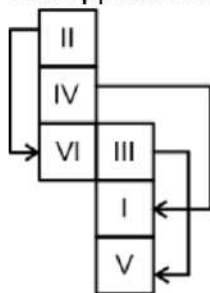

**Q:110** The correct answer is **option 4** i.e. **R**.

In both dices, T is common and on the same surface. Then the remaining surfaces will be opposite to each other.

Thus, the letter **R** is on the face opposite to the face containing U.

**Q:111** The correct answer is **option 4** i.e. **II**.

The opposite surfaces are shown below in open dice:

Hence, the roman number on the opposite side of 'VI' is II.

**Q:112** The correct answer is **option 3** i.e. **2**.

In both dice 2 is common, so we will write the numbers in the clockwise direction from 2.

Dice 1: 2 → 3 → 5

Dice 2: 2 → 4 → 1

Thus, 2 is the number on the face opposite to the one having 6.

**Q:113** The correct answer is **option 2** i.e. **6**.

In dice 1 and 2, 5 and 4 are common. So, 2 and 3 are opposite.

In dice 2 and 3, 4 and 3 are common. So, 1 and 5 are opposite.

Thus, 4 and 6 are opposite.

**Q:114** The correct answer is **option 2** i.e. **R**.

As P is common in both the dice, so we write the letters in the clockwise direction of P.

|        |   |   |   |
|--------|---|---|---|
| Dice 1 | P | T | S |
| Dice 2 | P | Q | R |

So, S is the opposite of R.

**Q:115** The correct answer is **option 4** i.e. **5**.

In both dice, 5 is common and on the different surface. Then the remaining surface will be opposite to each other.

Thus, the number **5** is on the face opposite to the one having 2.

**Q:116** The correct answer is **option 2** i.e. **10**.

In both the dice, 11 and 7 are common. So, the remaining faces are opposite to each other. So, 9 is opposite to 10.

**Q:117** The correct answer is **Option 1** i.e.  $\infty$

In both the dice  $\Delta$ , and  $\square$  are common. So, the remaining face is opposite to each other.

Hence, @ is opposite to  $\infty$ .

**Q:118** The correct answer is **option 4** i.e.  $\uparrow$ .

In both the dice, \$ and @ are common. So, the remaining faces are opposite to each other.

So,  $\infty$  is opposite to  $\uparrow$ .

**Q:119** The correct answer is **option 4** i.e. **6**.

In the second and third dice, 3 is common. So, start rotating either in the clockwise or anticlockwise direction.

**Clockwise direction:**

Dice 2: 3 5 4

Dice 3: 3 2 1

So, 3 is opposite to 6.

**Q:120** The correct answer is **Option 1** i.e. **6**

In the first and second dice, 5 is common. So, start rotating either in the clockwise or anticlockwise direction.

**Clockwise direction:**

Dice 1: 5 4 3

Dice 2: 5 1 2

So, 5 is opposite to 6.

**Q:121** The correct answer is **Option 4** i.e. **Blue**.

In both the dice, White and Red are common. So, the remaining face is opposite to each other.

So, Green is the opposite of Blue.

**Q:122** The correct answer is **Option 2** i.e. **5**.

In the first and second dice, 4 is common. So, start rotating the dice either in the clockwise or anticlockwise direction.

**Clockwise direction:**

Dice 1: 4 2 3

Dice 2: 4 6 1

So, 4 is opposite to 5.

**Q:123** The correct answer is **Option 1** i.e. **2**.

In the first and second dice, 5 and 3 are common. So, the remaining face is opposite to each other.

So, 2 is opposite to 4.

**Q:124** The correct answer is **option 4** i.e. **3**.

In the first and second dice, 2 is common. So, start rotating either in the clockwise or anticlockwise direction.

**Clockwise direction:**

Dice 1: 2 4 5

Dice 2: 2 6 1

So, 2 is opposite to 3.

**Q:125** The correct answer is **Option 4** i.e. **R**.

In both the cubes, P and S are common. So, the remaining face is opposite to each other.

So, U is opposite to R.

**Q:126** The correct answer is **option 1** i.e. **U5**.

When the sheet is folded along the lines to form a cube, the opposite pairs are;

U5 is opposite to A1. O4 is opposite to E2. I3 is opposite to Z6.

Hence, A1 is opposite to U5.

**Q:127** The correct answer is **option 2** i.e. **1**.

In both the dice, A is common. So, start rotating either in the clockwise or anticlockwise direction.

**Clockwise direction:**

Dice 1: A 2 1

Dice 2: A C 3

So, 1 is opposite to 3.

**Q:128** The correct answer is **option 2** i.e. **2**.

In both the dice, 1 is common. So, start rotating either in the clockwise or anticlockwise direction.

**Clockwise direction:**

Dice 1: 1 2 B

Dice 2: 1 C A

So, 2 is opposite to C.

**Q:129** The correct answer is **option 3** i.e. **3**.

The faces forming the opposite pair on the dice are:

$3 \Leftrightarrow C, 2 \Leftrightarrow B, 1 \Leftrightarrow A$

Thus, the character opposite to C is 3.

**Q:130** The correct answer is **option 1** i.e. **Only 4**.

From the question figure we can determine the opposite pairs :

|   |   |   |
|---|---|---|
| 2 | 6 | 4 |
| 1 | 5 | 3 |

In Cube 1, the numbers 2 and 1 are on the adjacent sides so cube formation not possible.

In Cube 2, the numbers 6 and 5 are on the adjacent sides so cube formation not possible.

In Cube 3, the numbers 3 and 4 are on the adjacent sides so cube formation not possible.

In Cube 4, the 1, 3 and 6 lies on the adjacent sides and they are not opposite pair so the cube formation is possible.

Hence, **option 1** is the correct answer.

**Q:131** The correct answer is **option 4**

In both dice, L is common. So, start rotating either in the clockwise or anticlockwise direction.

Dice 1: L O P

Dice 2: L N Q

So, O is opposite to N, P is opposite to Q, and L is opposite to M.

**Q:132** The correct answer is **Option 4** i.e. **6**.

In the first and second dice, 4 is common. So, start rotating either in the clockwise or anticlockwise direction.

**Clockwise direction:**

Dice 1: 4 1 2

Dice 2: 4 3 5

So, 4 is opposite to 6.

**Anticlockwise direction:**

Dice 1: 4 2 1

Dice 2: 4 5 3

So, 4 is opposite to 6.

Hence, **option 4** is the correct answer.

**Q:133** The correct answer is **Option 3** i.e. **2**.

In both the dice, 6 and 3 are common. So, the remaining faces are opposite to each other.

So, 2 is opposite to 5.

Hence, **option 3** is the correct answer.

**Q:134** The correct answer is **option 4**

In the first and second dice, N and P are common. So, the rest of the faces are opposite to each other.

So, L is opposite to M, and N and P are adjacent to each other.

In options 1; 2, and 3 L and M are not opposite to each other.

In option 4; L and M are opposite to each other and N and P are adjacent to each other.

When the box is unfolded it would look like option 4.

**Q:135** The correct answer is **option 2** i.e. **5**.

In both the dice, 2 and 3 are common. So, the rest of the faces are opposite to each other.

So, 5 is opposite to 4.

**Q:136** The correct answer is **option 2** i.e. **f**.

In the first and second dice, e is common. So, start rotating either in the clockwise or anticlockwise direction.

**Clockwise direction:**

Dice 1: e D F

Dice 2: e f d

So, D is opposite to f.

**Q:137** The correct answer is **Option 3**

We will consider the first dice. 7, 6, and 4 will be adjacent to each other.

In option 1: 7 and 4 are opposite to each other.

In option 2: 7 and 6 are opposite to each other.

In option 3: 7, 6, and 4 are opposite to each other.

**Q:138** The correct answer is **Option 1** i.e. **3**

In the third and fourth dice, 2 and 4 are common. So, the remaining faces of the two cubes will be opposite each other.

So, 1 is opposite to 3.

**Q:139** The correct answer is **option 2** i.e. **I**.

A is the opposite of I. V is the opposite of U. O is the opposite of E.

The face opposite the face showing the letter 'A' is showing the letter 'I'.

**Q:140** The correct answer is **Option 4** i.e. **5**.

In both dice, 3 is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 1: 3 5 2

Dice 2: 3 6 4

So, 5 is opposite to 6.

**Q:141** The correct answer is **option 4** i.e. **Only A and D**.

When the sheet is folded along the lines, the opposite pairs are;

a is opposite to c.

d is opposite to e.

m is opposite to o.

In cubes B and C, opposite pairs (m,o) and (a,c) are adjacent to each other respectively. Hence, both cubes cannot be formed.

In cubes A and D, no opposite pairs are adjacent to each other. Hence, both cubes A and D can be formed.

**Q:142** The correct answer is **option 1** i.e. **D and F**.

When the paper is folded to make a cube;

E is opposite to A.

F is opposite to D.

C is opposite to B.

**Q:143** The correct answer is **option 2** i.e. **B**.

In both dice, F is common. So, start rotating either in the clockwise or anticlockwise direction.

Dice 1: F C E

Dice 2: F B D

So, C is opposite to B.

**Q:144** The correct answer is **option 2** i.e. **2**.

In the second and third dice 4 and 5 are common. So, the rest face is opposite to each other.

So, 2 is opposite to 6.

**Q:145** The correct answer is **option 4** i.e. **I**.

In both the dice, E is common. So, start rotating either in the clockwise or anticlockwise direction.

Dice 1: E I H

Dice 2: E J G

So, J is opposite to I.

**Q:146** The correct answer is **Option 3** i.e. **E**.

In both the dice, 9 is common. So, start rotating either in the clockwise or anticlockwise direction.

Dice 1: 9 O E

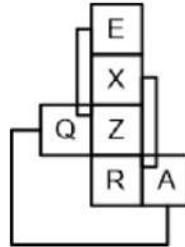

Dice 2: 9 I U

So, E is opposite to U.

**Q:147** The correct answer is **Option 3** i.e. **4**.

In both the dice, 5, and 2 are common. So, the remaining faces are opposite to each other. So, 1 is opposite to 4.

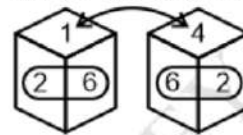

**Q:148** The correct answer is **option 4** i.e. **R and X**.

Alternate surfaces are opposite to each other in open dice.

Thus, **R and X** is opposite to each other.

**Q:149** The correct answer is **option 1** i.e. **4**.

On comparing all three dice we get two dice have same number, then remaining numbers are opposite to each other

$1 \Rightarrow 4 \quad 3 \Rightarrow 2 \quad 6 \Rightarrow 5$

Thus, Face 1 is opposite to face 4.

**Q:150** The correct answer is **option 1** i.e. **4**.

When we comparing both dice we get that one number is common i.e. 4 and 5, 6, 1, 2 are adjacent numbers of 4 so these numbers are not possible to opposite of 4.

Hence, remaining number **3** is opposite to **4**.
