Answers and Solutions

Q:1 The correct answer is **option 1**.

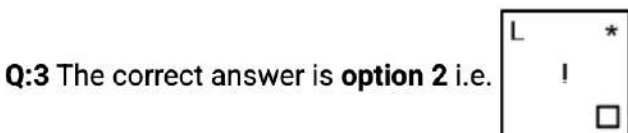

The movement of elements is shown below in the diagram

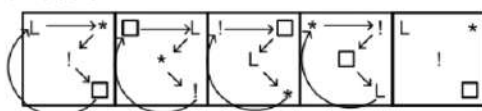

The arrow shifts up and down and gets reversed in each step.

Q:2 The correct answer is **option 2**.

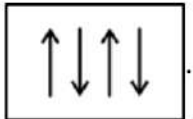

Logic: Letters are moving one step ahead in clockwise direction and arrow also moving 90 degree in clockwise direction.

All 4 elements are shifting their position in a clockwise direction.

Q:4 The correct answer is **option 3** i.e.

An arrow is added and the arrow's face is reversed from the previous arrow in each figure.

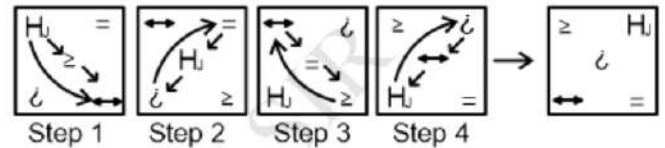

Arrow is added getting reversed in each figure

Q:5 The correct answer is **option 2**.

Logic: In the given series In each step, top left corner element comes in center, the element of center comes in top right corner and the rest elements are move one step in clockwise direction.

Q:6 The correct answer is **option 4**

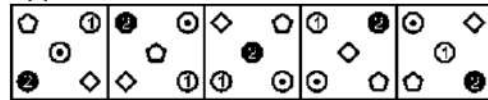

Q:7 The correct answer is **option 1**

Logic: In the given series curve is increasing by one in each step.

Hence, the correct answer is **option 1**.

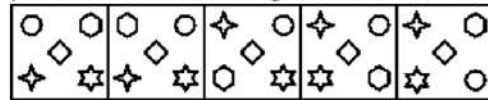

Q:8 The correct answer is **option 3**

In the given figures series upper left symbol shifted in the centre of the figure, middle symbol shifted towards right upper corner, right upper corner symbol shifted right bottom side, right bottom side symbol is shifted left bottom corner and left bottom symbol shifted to left upper corner.

Q:9 The correct answer is **option 1**

In the given figure series Hexagon rotated 90° in an anticlockwise direction, all other symbols remained in their original place till three figures then changed their place in the fourth figure 90° in a clockwise direction.

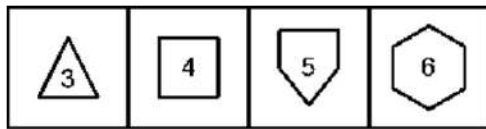

Q:10 The correct answer is **option 3**

The logic followed is that moving from one figure to another the lines in the figure are increasing by one.

Q:11 The correct answer is **option 2**

The logic followed is that the number inside the figure is the number of lines in the figure and moving from one figure to another the lines in the figure are being increased by one.

Q:12 The correct answer is **option 1**

Logic for numbers at the top: $6 + 6 = 12$, $12 + 6 = 18$, $18 + 6 = 24$, $24 + 6 = 30$

Logic for numbers at the bottom: $78 - 6 = 72$, $72 - 12 = 60$, $60 - 18 = 42$, $42 - 24 = 18$
