

MIRROR AND WATER IMAGE PRACTICE SET

PIYUSH VARSHNEY SIR

There are mainly two types of Mirror:

1. Vertical Mirror
2. Horizontal Mirror

(1) Vertical Mirror/ Mirror Image:

By default we use this mirror. In this Top and Bottom remain same while Left and Right are interchanged. Also all the individual figures in the main figure get changed with mirror image. For e.g.

In the above mirror image P and L are at top and bottom respectively but with mirror image. While Q and F interchanged their positions with mirror image.

Mirror image of Letters:

Letters	Mirror-Images	Letters	Mirror-Images	Letters	Mirror-Images
A	A	J	ɹ	S	Ɔ
B	B	K	⅂	T	T
C	Ɔ	L	J	U	U
D	D	M	M	V	V
E	E	N	И	W	W
F	ɹ	O	O	X	X
G	Ɔ	P	q	Y	Y
H	H	Q	Q	Z	Ʒ
I	I	R	Я	-	-

Mirror image of digits:

0 1 2 3 4 5 6 7 8 9
0 1 5 8 4 2 6 7 8 9

(2) Horizontal Mirror/ Water Image:

In this Left and Right remain same while Top and Bottom are interchanged. Also all the individual figures in the main figure get changed with water image. For e.g.

In the above water image Q and F are at Left and Right positions respectively but with water image. While P and L interchanged their positions with water image.

Water image of Letters:

Letters	A	B	C	D	E	F	G	H	I
Water-Images	⅂	B	Ɔ	D	E	ɹ	Ɔ	H	I
Letters	J	K	L	M	N	O	P	Q	R
Water-Images	ɹ	⅂	J	⅂	И	O	ɹ	Q	Я
Letters	S	T	U	V	W	X	Y	Z	--
Water-Images	Ɔ	T	U	V	⅂	X	Y	Ʒ	--

Water image of Digits:

Digits	0	1	2	3	4	5	6	7	8	9
Water-Images	0	1	5	3	4	2	9	7	8	6

To solve mirror and water image questions easily we can use the following trick-

Trick: The part of the figure which is nearer to mirror will appear first and the part which is far from the mirror will appear later in the image.

Now eliminate those options which do not follow this trick. For e.g.

1. PHNSURB ⅂ B ⅂ URSHNP

Since B was nearer to mirror, it appeared first and P was farthest from the mirror, it appeared last.

- 2.

Here rectangle was nearer to mirror, it appeared first and circle was farthest from the mirror, it appeared last.

Vertical Symmetry:

If after cutting a picture vertically from the middle we get same left and right parts of the picture, it is called Vertical Symmetry.

The mirror image of vertically symmetric figures remain unchanged. For e.g.

Horizontal Symmetry:

If after cutting a picture horizontally from the middle we get same top and bottom parts of the picture, it is called Horizontal Symmetry.

The water image of horizontally symmetric figures remain unchanged. For e.g.

- (i) No. of letters remain unchanged in both Mirror and Water Image:

4 letters → H, I, O, X

- (ii) No. of letters remain unchanged in Water Image:

9 letters → H, I, O, X, B, C, D, E, K

- (iii) No. of letters remain unchanged in Mirror Image:

11 letters → H, I, O, X, A, M, T, U, V, W, Y

Directions (1-2): In each of the following questions which of the answer figures is exactly the mirror image of the question figure when the mirror is held at MN?

Ex1. Question figure:

Answer figures:

Sol: Here we will get mirror image. Therefore left and right parts will get interchanged. So options (B) and (C) are incorrect. Similarly circle and the shaded region of leaf are in opposite directions in the question figure. Hence option (D) is incorrect. Finally option (A) will be our answer.

Ex2. Question figure:

Answer figures:

Sol: In this question we will get water image, therefore top and bottom parts will get interchanged. So options (B) and (D) are incorrect. In water image left and right parts don't get interchanged, hence option (A) is incorrect. Thus option (C) will be correct.

Directions (3-4): In the following questions, you are given a combination of alphabets and/or numbers followed by four options. Choose the option which most closely resembles the mirror image of the given combination.

Ex3. 2 4 7 5 9 6

- (A) 6 9 5 7 4 2 (B) 9 6 2 7 4 5
(C) 2 4 7 5 9 6 (D) 6 9 2 7 4 5

Sol: Option (A) is incorrect as digits are not written in mirror image form.

Option (B) is incorrect as here '9' with mirror image has been given first.

Option (C) is incorrect as in mirror image '6' will appear first.

Hence option (D) is correct.

Ex4. R E A S O N I N G

- (A) K E V S O N I N G (B) G N I N O S A E R
(C) G N I N O S A E R (D) R E A S O N I N G

Sol: In mirror image letter 'G' will appear first, therefore options (A) and (D) are incorrect.

Option (C) is incorrect as letters are not written in mirror image form. Thus option (B) will be correct.

EXERCISE

1. Which of the answer figures is exactly the mirror image of the given figure when the mirror is held at PC?

Question figure:

Answer figures:

(A) (B) (C) (D)

2. Which of the answer figures is exactly the mirror image of the given figure when the mirror is held at MN?

Question figure :

Answer figures:

(A) (B) (C) (D)

3. Which of the answer figures is exactly the mirror image of the given figure when mirror is held as shown?

Question figure:

Answer figures:

(A) (B) (C) (D)

4. If a mirror is placed on the line MN, then which of the answer figures is the correct image of the given question figure?

Question figure:

Answer figures:

(A) (B) (C) (D)

5. If a mirror is placed on the line MN, then which of the answer figures is the right image, of the given figure ?

Question figure:

Answer figures:

(A) (B) (C) (D)

6. Which of the following figures is exactly the mirror image of the question figure when the mirror is held at AB?

Question figure:

Answer figures:

(A) (B) (C) (D)

7. Which of the answer figures is exactly the mirror image of the given figure when the mirror is held at XY?

Question figure:

Answer figures:

(A) (B) (C) (D)

8. A clock with only dots marking 3, 6, 9 and 12 positions has been kept upside down in front of a mirror. In the reflection a time of 4.15 will look approximately like
 (A) 2.15 (B) 8.45
 (C) 8.50 (D) 9.45

Directions (9-10): In each of the following questions which of the answer figures is exactly the mirror image of the question figure when the mirror is held at XY?

9. Question figure:

Answer figures:

(A) (B) (C) (D)

10. Question figure:

X Y

Answer figures:

(A) (B) (C) (D)

11. Which one of the Answer figures is exactly the mirror image of the given figure when the mirror is held at AB?

Question figure:

Answer figures:

(A) (B) (C) (D)

Directions (12-13): In each of the following questions which of the answer figures is exactly the mirror image of the given figure when the mirror is held at AB?

12. Question figure:

Answer figures:

(A) (B) (C) (D)

13. Question figure:

Answer figures:

(A) (B) (C) (D)

14. Which of the answer figures is exactly the mirror image of the given figure, when the mirror is held at AB?

Question figure:

Answer figures:

(A) (B) (C) (D)

15. If a mirror is placed on the line MN, then which of the answer figures is the right image of the given question figure:

Question figure:

Answer figures:

16. If a mirror is placed on the line MN, then which of the answer figures is the right image of the given question figure ?

Question figure :

Answer figures:

17. If a mirror is placed on the line MN, then which of the answer figures is the correct image of the given question figure ?

Question figure:

Answer figures:

18. Which of the answer figures is exactly the mirror image of the question figure, when the mirror is held on the line PQ?

Question figure:

Answer figures:

19. Which of the answer figure is exactly the mirror image of the given figure, when the mirror is held on the line AB ?

Question figure:

Answer figures:

20. Which of the answer figures is exactly the mirror image of the question figure, when the mirror is held on the line AB?

Question figure:

Answer figures:

21. Which of the answer figure is exactly the mirror image of the given figure, when the mirror is held on the line A B ?

Question figure:

Answer figures:

22. Which of the answer figures is exactly the mirror image of the given figure, when the mirror is held on the line MN?

Question figure:

Answer figures:

(A) (B) (C) (D)

23. Find out the mirror image of the given figure :

Question figure:

Answer figures:

(A) (B) (C) (D)

24. Which of the answer figures is the mirror image of the given figure if the mirror is held at AB ?

Question figure:

Answer figures:

(A) (B) (C) (D)

25. If a mirror is placed on the line x, then which of the answer figures is the right image of the given figure?

Question figure:

Answer figures:

(A) (B) (C) (D)

26. Which is the mirror image of the question figure when the mirror is held at X ?

Question figure:

Answer figures:

(A) (B) (C) (D)

27. Which of the answer figures is exactly the mirror image of the given figure, when the mirror is held on the line A B ?

Question figure:

Answer figures:

(A) (B) (C) (D)

28. Find out the mirror image of the given figure.

Question figure:

Answer figures:

(A) (B) (C) (D)

29. If a mirror is placed on the line MN, then which of the answer figures is the right image of the given figure ?

Question figure:

Answer figures:

(A) (B) (C) (D)

30. SEPTEMBER

(A) SEPTEMBER
(B) SEPTEMBER
(C) SEPTEMBER
(D) SEPTEMBER

Directions (31-32): In each of the following questions, if a mirror is placed on the line MN, then which of the answer figures is the right image of the given figure?

31. **Question figure:**

Answer figures:

(A) (B) (C) (D)

32. **Question figure:**

Answer figures:

(A) (B) (C) (D)

Directions (33-34): In the following questions, a mirror is placed on line MN. Then which of the answer figures is the correct image of the given figure ?

33. **Question figure:**

Answer figures:

(A) (B) (C) (D)

34. Question figure:

Answer figures:

35. From the answer figures, find out the figure which is the exact mirror image of the question figure, when the mirror is placed on the line 'MN' ?

Question figure:

Answer figures:

36. Which of the answer figures is exactly the mirror image of the given pattern of numbers when the mirror is held at MN ?

Question figure:

Answer figures:

37. If a mirror is placed on the line MN, then which of the answer figures is the right image of the given figure :

Question figure:

Answer figures:

38. If a mirror is placed on the line MN, then which of the answer figures is the right image of the given figure?

Question figure:

Answer figures:

39. From the answer figures, find out the figure which is the exact mirror image of the question figure, when the mirror is placed on the line 'MN'.

Question figure:

Answer figures:

40. If a mirror is placed on the line MN, then which of the answer figures is the right image of the given figure ?

Question figure:

Answer figures:

41. If a mirror is placed on the line MN, then which of the answer figures is the right image of the given figure ?

Question figure:

Answer figures:

42. If a mirror is placed on the line MN, then which of the answer figures is the right image of the given figure?

Question figure:

Answer figures:

Directions (43-44): In each of the following questions, if a mirror is placed on the line AB, then which of the answer figures is the right image of the given figure?

43. **Question figure:**

Answer figures:

44. **Question figure:**

Answer figures:

45. If a mirror is placed on the line MN, then which of the answer figures is the correct image of the question figure ?

Question figure:

Answer figures:

46. If a mirror is placed on the line MN, then which of the answer figures is the right image of the given figure ?

Question figure:

Answer figures:

47. Which of the answer figures is exactly the mirror image of the given figure, when the mirror is held on the line AB ?

Question figure:

Answer figures:

48. If a mirror is placed on the line MN, then which of the answer figures is the right image of the given figure?

Question figure:

Answer figures:

49. Identify the alternative which resembles the mirror-image of the given word.

SECRETARY

- (A) YRATERCES (B) YRATERCES
(C) YRATERCES (D) YRATERCES

50. In the question, if a mirror is placed on the line AB then which of the answer figures is the right image of the given figure ?

Question figure:

Answer figures:

ANSWER KEY

1. (B)	6. (D)	11. (D)	16. (D)	21. (D)	26. (A)	31. (D)	36. (C)	41. (C)	46. (C)
2. (C)	7. (A)	12. (D)	17. (B)	22. (A)	27. (B)	32. (C)	37. (B)	42. (A)	47. (B)
3. (B)	8. (A)	13. (A)	18. (B)	23. (C)	28. (B)	33. (C)	38. (B)	43. (A)	48. (A)
4. (B)	9. (C)	14. (D)	19. (D)	24. (B)	29. (B)	34. (C)	39. (C)	44. (B)	49. (D)
5. (B)	10. (D)	15. (C)	20. (A)	25. (A)	30. (D)	35. (C)	40. (D)	45. (D)	50. (B)

In the questions related to this topic a paper is shown by dotted line which tells us how the paper is folded or cut. Then we have to answer that after folding or unfolding what figure is formed.

While solving these questions we use the same tricks given in mirror and water image chapter. We unfold the given paper one by one and form the images of them.

If we unfold the paper vertically, then we get mirror image. If we unfold the paper horizontally, then we get water image. Also if we unfold the paper diagonally, we get diagonal image.

Let's understand it with the help of following examples:

Directions (1-3): A piece of paper is folded and punched as shown in the figure below. How will it appear when unfolded?

Ex1. Question figure:

Answer figures:

Sol: While unfolding the paper we will go in reverse direction i.e. open the cut paper in same way as it is folded and cut. Thus we will get Option (B) as our answer.

Ex2. Question figure:

Answer figures:

Sol: Here the paper is one fourth after folding and two triangles are there. So these two triangles are shown in all four parts as water and mirror image. Hence Option (C) is our answer.

Ex3. Question figure:

Answer figures:

Sol: In this question the paper is one eighth after folding and then three holes are made. So these three holes are shown in all eight parts. Hence Option (C) is our answer.

EXERCISE

1. A piece of circular paper is folded and cut as shown below. How will it appear when opened? Select your response from answer figures.

Question figure:

Answer figures:

2. A triangular piece of paper is folded and punched as shown in the question figure. How will it appear when opened? Select your response from answer figures.

Question figure:

Answer figures:

3. A paper is folded as shown in the given figures and two holes are made. When opened how will it appear? Choose from the given responses.

Question figure:

Answer figures:

(A) (B) (C) (D)

4. A paper is folded as shown in the given figures and a cut is made. When opened how will it appear ? Choose from the given responses.

Question figure:

Answer figures:

(A) (B) (C) (D)

Directions (5-6) : In the following questions, a piece of paper is folded and cut as shown below. From the given answer figures indicate how it will appear when opened.

5. Question figure:

Answer figures:

(A) (B) (C) (D)

6. Question figure:

Answer figures:

(A) (B) (C) (D)

7. A piece of paper is folded and punched as shown in the figure below. How will it appear when unfolded ?

Question figure:

Answer figures:

(A) (B) (C) (D)

8. A piece of paper is folded and punched as shown below. From the given responses, indicate how it will appear when opened.

Question figure:

Answer figures:

(A) (B) (C) (D)

9. A piece of paper is folded and punched as shown below. From the given responses indicate how it will appear when opened.

Question figure:

Answer figures:

(A) (B) (C) (D)

10. A triangular piece of paper is folded and punched as shown below. From the given responses indicate how it will appear when opened.

Question figure:

Answer figures:

(A) (B) (C) (D)

- Directions (11-17): A piece of paper is folded and a cut is made as shown below. From the given responses indicate how it will appear when opened.

11. Question figure:

Answer figures:

(A) (B) (C) (D)

12. Question figure :

Answer figures :

(A) (B) (C) (D)

13. Question figure:

Answer figures:

(A) (B) (C) (D)

14. Question figure:

Answer figures:

(A) (B) (C) (D)

15. Question figure:

Answer figures:

(A) (B) (C) (D)

16. Question Figures :

Answer Figures :

(A) (B) (C) (D)

17. Question figure:

Answer figures:

(A) (B) (C) (D)

18. A square sheet of paper has been folded twice and punched and then unfolded. The pattern of holes on the sheet of paper has been shown as in the question figure. Find out the punched hole pattern when the question figure is folded twice.

Question figure:

Answer figures:

19. A square-sheet of paper is fourfolded (i.e. 4 layer of paper are made of the sheet). Then it is cut on one edge of the triangular fold. Find the figure pattern of sheet on unfolding from the answer figures.

Question figure:

Answer figures:

20. A round punched paper is given as shown in the question figure. Figure out from the four alternatives as to how it will appear when folded.

Question figure:

Answer figures:

Directions (21-30): A piece of paper is folded and punched as shown below. From the given Answer Figures indicate how it will appear when opened.

21. **Question figure:**

Answer figures:

22. **Question figure:**

Answer figures:

23. **Question figure:**

Answer figures:

24. **Question figure:**

Answer figures:

25. Question figure:

Answer figures:

26. Question figure:

Answer figures:

27. Question figure:

Answer figures:

28. Question figure:

Answer figures:

29. Question figure :

Answer figures :

30. Question figure:

Answer figures :

Directions (31-32) : In each of the following questions, a piece of paper is folded and cut as shown below in the question figures. From the given answer figures, indicate how it will appear when opened?

31. Question figure:

Answer figures:

32. Question figure:

Answer figures:

Directions (33-42): A piece of paper is folded and cut as shown below in the question figures. From the given answer figures, indicate how it will appear when opened ?

33. Question figure:

Answer figures:

34. Question figure:

Answer figures:

35. Question figure:

Answer figures:

36. Question figure :

Answer figures:

39. Question figure:

Answer figures:

40. Question figure:

Answer figures:

41. Question figure :

Answer figures :

42. Question figure:

Answer figures :

43. How will it look like when a transparent paper with given figure is folded on the dotted line as shown?

Question figure:

Answer figures :

44. If the following pattern is drawn in a transparent square sheet and folded along the dotted lines, how does it appear ?

Question figure:

Answer figures:

45. A piece of paper is folded and cut as shown below in the question figures. From the given answer figures, indicate how it will appear when opened.

Answer figures:

46. A piece of paper is folded and cut as shown below in the question figures. From the given answer figures, indicate how it will appear when opened.

Question figure:

Answer figures:

47. A square transparent sheet with a pattern is given. Figure out from amongst the four alternatives as to how the pattern would appear when the transparent sheet is folded along the marked line ?

Question figure:

Answer figures:

48. A circular sheet of paper is folded in a particular manner and a punch is made. When unfolded, the paper appears as given in the question figure. Find out the manner in which the paper is folded and punch is made from the responses given.

Question figure:

Answer figures:

49. A triangular piece of paper is folded and cut as shown below. Find out from the answer figures how it will appear when opened.

Question figure:

Answer figures:

50. A circular paper is folded and punched as shown below. From the responses given find out how it will appear when unfolded?

Question figure:

Answer figures:

ANSWER KEY

1. (C)	6. (C)	11. (D)	16. (A)	21. (C)	26. (B)	31. (B)	36. (B)	41. (B)	46. (D)
2. (C)	7. (B)	12. (B)	17. (D)	22. (A)	27. (B)	32. (C)	37. (D)	42. (A)	47. (D)
3. (B)	8. (B)	13. (C)	18. (C)	23. (A)	28. (C)	33. (D)	38. (A)	43. (D)	48. (A)

In the questions related to this topic we are given a figure and we have to find in which of the given options is the given figure embedded.

The best approach to solve these questions is that we check each option one by one and see whether in the option is the given figure embedded or not. Thus check all the options and find the correct answer.

Directions (1-3) : From the answer figures, select the one in which the question figure is hidden/embedded.

Ex1. Question figure:

Answer figures:

(A) (B) (C) (D)

Sol: On close observation we find that the question figure is embedded in option (C) as shown below:

Ans (C)

Ex2. Question figure:

Answer figures:

(A) (B) (C) (D)

Sol: On close observation we find that the question figure is embedded in option (C) as shown below:

Ans (C)

Ex3. Question figure:

Answer figures:

(A) (B) (C) (D)

Sol: On close observation we find that the question figure is embedded in option (D) as shown below:

Ans (D)

EXERCISE

Directions(1-2): In which answer figures is the given figure embedded?

1. Question figure:

Answer figures:

2. Question figure:

Answer figures:

3. In which answer figure is the given question figure embedded?

Question figure:

Answer figures:

4. In which Answer Figure is the given figure embedded ?

Question figure:

Answer figures:

5. In which answer figure is the question figure embedded?

Question figure:

Answer figures:

6. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

7. In which answer figure is the given figure embedded ?

Question figure:

Answer figures:

8. From the given answer figures, select the one in which the question figure is hidden/embedded in the same direction

Question figure:

Answer figures:

9. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

10. From the given answer figures, select the one in which the question figure is hidden/ embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

11. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

12. From the given answer figures, select the one in which the question figure is hidden/ embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

Directions (13-15) : In following questions from the given answer figures, select the one in which the question figure is hidden/embedded

13. **Question figure:**

Answer figures:

(A) (B) (C) (D)

14. **Question figure:**

Answer figures:

(A) (B) (C) (D)

15. **Question figure:**

Answer figures:

(A) (B) (C) (D)

Directions (16-18) : From the answer figures, select the one in which the question figure is hidden/ embedded.

16. **Question figure:**

Answer figures:

(A) (B) (C) (D)

17. Question figure:

Answer figures:

18. Question figure:

Answer figures:

19. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

20. Which of the answer figures is embedded in the question figure?

Question figure:

Answer figures:

Directions (21-23) : From the given Answer Figures select the one in which the question figure is hidden/embedded.

21. Question figure:

Answer figures:

22. Question figure:

Answer figures:

23. Question figure:

Answer figures:

24. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

25. From the given answer figures, select the one in which the question figure is hidden/embedded :

Question figure:

Answer figures:

26. Select the answer figure in which the question figure is hidden/ embedded.

Question figure:

Answer figures:

27. Select the answer figure in which the question figure is hidden/embedded.

Question figure:

Answer figures:

28. Select the answer figure in which the question figure is hidden/embedded.

Question figure:

Answer figures:

Directions (29-30) : In each of the following questions, from the given answer figures, select the one in which the question figure is hidden/embedded.

29. **Question figure:**

Answer figures:

30. **Question figure:**

Answer figures:

31. Select the answer figure in which the question figure is hidden.

Question figure:

Answer figures:

32. Select the answer figure in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

33. Find out which of the following answer figures will exactly make up the question figure ?

Question figure:

Answer figures:

(A) (B) (C) (D)

34. Which of the answer figures includes the separate components found in the question figure ?

Question figure:

Answer figures:

(A) (B) (C) (D)

35. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

36. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

37. From the given answer figures, select the one in which the question figure is hidden/ embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

38. Select the answer figure in which the question figures are hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

39. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

40. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

41. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

42. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

43. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

44. Find out which answer figure will exactly make up the question figure.

Question figure:

Answer figures:

(A) (B) (C) (D)

45. From the given answer figures, select the one in which the question figure is hidden/embedded.

Question figure:

Answer figures:

(A) (B) (C) (D)

46. Select the answer figure which is the same as question figure.

Question figure:

Answer figures:

47. From the given answer figures, select the one in which the question figure is hidden/ embedded.

Question figure:

Answer figures:

48. From the given answer figures, select the one in which the question figure is hidden/ embedded.

Question figure:

Answer figures:

49. From the given answer figures, select the one in which the question figure is hidden/ embedded.

Question figure:

Answer figures:

50. From the given answer figures, select the one in which the question figure is hidden/ embedded.

Question figure:

Answer figures:

ANSWER KEY

1. (C)	6. (A)	11. (C)	16. (B)	21. (D)	26. (B)	31. (B)	36. (A)	41. (B)	46. (D)
2. (C)	7. (B)	12. (B)	17. (C)	22. (C)	27. (D)	32. (D)	37. (C)	42. (D)	47. (D)
3. (A)	8. (A)	13. (C)	18. (D)	23. (D)	28. (A)	33. (B)	38. (A)	43. (C)	48. (B)
4. (D)	9. (D)	14. (C)	19. (A)	24. (C)	29. (D)	34. (A)	39. (B)	44. (C)	49. (C)
5. (D)	10. (D)	15. (B)	20. (B)	25. (A)	30. (C)	35. (B)	40. (B)	45. (C)	50. (B)

33. Here we need 2 (curved lines, circles, dots and equal length straight lines).
Option (A) is incorrect as two unequal straight lines can't make shape 'V'.
Option (C) is incorrect as there are two 'V'.
Option (D) is incorrect as there are not given dots.
Hence option (B) is correct.

34. Options (B),(C) and (D) are incorrect as pentagon is not present in them.

Here option (A) is correct as all the components are present in it.

38. Options (B),(C) and (D) are incorrect as two triangles are not present in them. Here in option (A), two triangles and one square are present. Hence it is correct.

44. Here we need one circle, one dot, one big line and one small line. All these are present in option (C). Hence it is correct.

In the questions related to this topic we are given a picture which is divided into four parts and one part out of those four parts is missing. We have to find the missing part from the options.

In this chapter also we use the concept of mirror and water image because the given picture is symmetric either vertically or horizontally.

If the picture is vertical symmetric then find the missing part using the concept of mirror image and if the picture is horizontal symmetric then find the missing part using the concept of water image. Thus we will complete the given picture.

Directions (1-3): In the following questions, select a figure from amongst the four options, which when placed in the blank space of figure (X) would complete the pattern.

Ex1. Question figure:

Answer figures:

Sol: Clearly the figure in option (B) will complete the pattern when placed in the blank space as shown below:

Ex2. Question figure:

Answer figures:

Sol: Clearly the figure in option (A) will complete the pattern when placed in the blank space as shown below:

Ex3. Question figure:

Answer figures:

Sol: Clearly the figure in option (A) will complete the pattern when placed in the blank space as shown below:

EXERCISE

Directions (1-2): Which answer figure will complete the question figure?

1. **Question figure:**

Answer figures:

(A) (B) (C) (D)

2. **Question figure:**

Answer figures:

(A) (B) (C) (D)

3. Which one of the answer figures shall complete the given question figure ?

Question figure:

Answer figures:

(A) (B) (C) (D)

4. Which one of the answer figures shall complete the given question figure ?

Question figure:

Answer figures:

(A) (B) (C) (D)

5. Which one of the answer figures shall complete the given question figure ?

Question figure:

Answer figures:

(A) (B) (C) (D)

6. Which one of the answer figures shall complete the given question figure ?

Question figure:

Answer figures:

(A) (B) (C) (D)

7. Which answer figure will complete the pattern in the question figure ?

Question figure:

Answer figures:

(A) (B) (C) (D)

8. Which answer figure will complete the question figure ?

Question figure:

Answer figures:

9. In the following question, which answer figure will complete the pattern in the question figure ?

Question figure:

Answer figures:

- Directions (10-11): Which answer figure will complete the question figure?

10. Question figure:

Answer figures:

11. Question figure:

Answer figures:

- Directions (12-13): In the following questions, which one of the answer figures shall complete the given question figure?

12. Question figure:

Answer figures:

13. Question figure:

Answer figures:

14. In the given question, a part of the figure is missing. Select one of the response figures which exactly fits into the missing part of the question figure.

Question figure:

Answer figures:

Directions (15-16): In each of the following questions which one of the answer figures shall complete the given question figure?

15. Question figure:

Answer figures:

(A) (B) (C) (D)

16. Question figure:

Answer figures:

(A) (B) (C) (D)

Directions (17-18): In each of the following questions which one of the answer figures shall complete.

17. Question figure:

Answer figures:

(A) (B) (C) (D)

18. Question figure:

Answer figures:

(A) (B) (C) (D)

19. Which one of the answer figures shall complete the given question figure?

Question figure:

Answer figures:

(A) (B) (C) (D)

20. Which answer figure will complete the pattern in the question figure?

Question figure:

Answer figures:

(A) (B) (C) (D)

21. Which answer figure will complete the question figure?

Question figure:

Answer figures:

(A) (B) (C) (D)

22. Which answer figure will complete the pattern in the question figure?

Question figure:

SOLUTION

47. Here the arrows in first, second and third column are rotating clockwise, anti clockwise and clockwise respectively.

Generally in the questions related to this topic we are given a total of 9 figures and we have to classified them into 3 groups. Each group will consist of 3 figures. Here we should remember that all the figures in a group should be identical.

The best approach to solve these questions is that first we create one identical group and eliminate those options in which the identical group is not present and then repeat the same procedure and find the correct answer.

Directions (1-3): In the following questions, group the given figures into three classes on the basis of identical properties.

- (A) 1,3,9 ; 2,5,8 ; 4,6,7
(B) 1,5,8 ; 4,6,7 ; 2,3,9
(C) 4,5,9 ; 1,3,8 ; 2,6,7
(D) 1,8,9 ; 4,6,7 ; 2,3,5

Sol: (1,5,8) $\Rightarrow$ Open figures bisected by a line segment.
(2,3,9) $\Rightarrow$ Closed figures intersected by a line segment.
(4,6,7) $\Rightarrow$ Closed figures touching a line segment.

Ans (B)

- (A) 1,3,6 ; 4,5,8 ; 2,7,9 (B) 2,3,9 ; 4,5,8 ; 1,6,7
(C) 1,6,8 ; 3,7,9 ; 2,4,5 (D) 3,8,9 ; 1,2,7 ; 4,5,6

Sol: (1,6,8) $\Rightarrow$ Figures formed using straight as well as curved lines.

(2,4,5) $\Rightarrow$ Figures formed using straight lines only.

(3,7,9) $\Rightarrow$ Figures shaded with oblique lines. **Ans (C)**

- (A) 2,4,7 ; 1,8,9 ; 3,5,6 (B) 2,6,9 ; 1,5,7 ; 3,4,8
(C) 2,6,7 ; 1,5,8 ; 3,4,9 (D) 2,8,7 ; 1,5,9 ; 3,4,6

Sol: (1,5,7) $\Rightarrow$ Rectangle with its two diagonals.

(2,6,9) $\Rightarrow$ Triangle with its three medians.

(3,4,8) $\Rightarrow$ Circle with its two mutually perpendicular diameters. **Ans (B)**

EXERCISE

Directions: In each of the following questions a series of figures is given which can be grouped into classes. Select the groups into which the figures can be classified.

(A) (1,2,3); (4,5,6); (7,8,9) (B) (3,6,9); (1,5,8); (2,4,7)
(C) (5,6,9); (4,7,8); (1,2,3) (D) (1,5,9); (3,4,8); (2,6,7)

(A) 1, 4, 9 (B) 1, 4, 9
2, 5, 7 2, 3, 8
3, 6, 8 5, 6, 7
(C) 1, 4, 9 (D) 1, 4, 9
2, 5, 8 2, 6, 3
3, 6, 7 5, 7, 8

(C) 3,6,2; 1,4,8; 5,7,9 (D) 3,6,8; 2,5,9; 1,4,7

36.

- (A) [1,7; 2,4; 3,5; 6,8] (B) [1,4; 2,7; 3,5; 6,8]
(C) [1,3; 2,7; 6,8; 4,5] (D) [1,4; 2,6; 3,5; 7,8]

37.

- (A) (1, 2, 3; 4, 5, 8; 6, 7, 9)
(B) (1, 5, 6; 2, 3, 4; 7, 8, 9)
(C) (1, 3, 5; 2, 4, 8; 6, 7, 9)
(D) (1, 4, 7; 2, 5, 8; 3, 6, 9)

38.

- (A) 1,6,9; 2,4,7; 3,5,8 (B) 1,6,9; 3,4,7; 2,5,8
(C) 2,6,9; 1,4,3; 5,7,8 (D) 2,9,3; 1,8,7; 4,5,6

39.

- (A) 789, 243, 156 (B) 132, 457, 689
(C) 168, 347, 259 (D) 169, 347, 258

40.

- (A) 3, 4, 9; 5,7,8; 1,2,6 (B) 1,5,6; 2,4,8; 3,7,9
(C) 4,6,8; 3,5,7; 1,2,9 (D) 1,2,7; 3,5,9; 4,6,8

41.

- (A) 1,3,7; 2,4,6; 5,8,9 (B) 1,4,6; 2,5,7; 3,8,9
(C) 1,4,8; 2,5,6; 3,7,9 (D) 1,4,8; 2,7,9; 3,5,6

42.

- (A) 1,2,5; 3,7,8; 4,6,9 (B) 1,7,2; 3,9,6; 4,5,8
(C) 2,3,8; 4,6,9; 1,5,7 (D) 5,6,9; 3,4,1; 2,7,8

43.

- (A) 1,2,3; 4,5,8; 6,9,7 (B) 1,2,5; 3,4,8; 6,7,9
(C) 1,2,8; 3,4,7; 5,6,9 (D) 1,5,8; 2,3,4; 6,7,9

- (A) 127, 359, 468 (B) 179, 258, 346
(C) 174, 258, 369 (D) 179, 358, 246

- (A) 1,4,7; 2,5,8; 3,6,9; (B) 1,4,8; 2,5,9; 3,6,7;
(C) 1,2,3; 4,5,6; 7,8,9; (D) 1,3,4; 2,5,8; 6,7,9;

- (A) 139, 267, 458 (B) 139, 278, 456
(C) 139, 457, 268 (D) 135, 249, 678

- (A) 1,3,4 ; 2,5,9 ; 6,7,8 (B) 1,2,3 ; 4,5,6 ; 7,8,9
(C) 1,5,9 ; 2,4,7 ; 3,6,8 (D) 3,7,8 ; 1,6,5 ; 4,2,9

ANSWER KEY

1. (D)	6. (D)	11. (C)	16. (A)	21. (B)	26. (C)	31. (C)	36. (B)	41. (C)	46. (A)
2. (A)	7. (B)	12. (C)	17. (D)	22. (A)	27. (C)	32. (A)	37. (B)	42. (A)	47. (A)

SOLUTION

1. (1, 5, 9) $\Rightarrow$ Figures formed using curved lines only.
(3, 4, 8) $\Rightarrow$ Figures formed using both straight and curved lines.
(2, 6, 7) $\Rightarrow$ Figures formed using straight lines only.
2. Figures 1, 4, 9 have garments.
Figures 2, 5, 7 have stationery items.
Figures 3, 6, 8 have geometrical figures.
3. (1, 4, 8) $\Rightarrow$ Letters formed using three straight lines.
(2, 5, 7) $\Rightarrow$ Letters formed using four straight lines.
(3, 6, 9) $\Rightarrow$ Letters formed using both straight and curved lines.
4. Figures 1, 4, 7 consist of full circle.
Figures 2, 5, 8 consist of one-pointed end figure.
Figures 3, 6, 9 are bucket shaped figures.
5. Figures 1, 4, 9 are Cuboids.
Figures 3, 5, 7 have half circles.
Figures 2, 6, 8 are pots with lid.
6. Figures 1, 4, 7 are composed of straight lines only.
Figures 2, 6, 9 have one big and one small circle.
Figures 3, 5, 8 are composed of straight lines and oval.
7. (1, 8, 9) $\Rightarrow$ Figures having two black dots.
(2, 3, 5) $\Rightarrow$ Figures having one black dot.
(4, 6, 7) $\Rightarrow$ Figures having three black dots.
8. Figures 1, 4, 6 are pots with lid having rectangular top.
Figures 2, 3, 8 are pots with lid having circular top.
Figures 5, 7, 9 are pots with handle and without lid.
9. (1, 3, 9) $\Rightarrow$ In these figures one element is placed inside another element.
(2, 5, 6) $\Rightarrow$ These figures are divided into four parts by two perpendicular lines.
(4, 7, 8) $\Rightarrow$ Two similar different sized elements are attached together.
10. (1, 5, 8) $\Rightarrow$ Composed of triangle and circle.
(2, 4, 7) $\Rightarrow$ Funnel shaped figures.
(3, 6, 9) $\Rightarrow$ Composed of straight lines only.
11. Figures 1, 3, 7 have three segments each.
Figures 4, 8, 9 have one segment each.
Figures 2, 5, 6 have five segments each.
12. (2, 3, 6) $\Rightarrow$ Pots having base but not lid.
(5, 8, 9) $\Rightarrow$ Pots having base as well as lid.
(1, 4, 7) $\Rightarrow$ Pots which have neither a base nor a lid.
13. Figures 1, 4, 7 are composed of straight lines only.
Figures 2, 6, 9 have one big and one small circle.
Figures 3, 5, 8 are composed of straight lines and oval.
14. Figures 1, 5, 7 have single design.
Figures 2, 4, 9 have two similar designs intersecting each other.
Figures 3, 6, 8 have three similar designs intersecting each other.
15. (1, 4, 7) $\Rightarrow$ Rectangular figures.
(2, 6, 9) $\Rightarrow$ Figures in which three of the corners are shaded.
(3, 5, 8) $\Rightarrow$ Figures having similar design in the middle (four leaves are placed around a small circle).
16. (1, 4, 9) $\Rightarrow$ Figures in which lower part is shaded.
(2, 5, 8) $\Rightarrow$ Figures with curved and straight lines.
(3, 6, 7) $\Rightarrow$ Leaves.
17. Figures 1, 6, 9 are half shaded.
Figures 2, 4, 7 have one black dot in the center.
Figures 3, 5, 8 have four shaded parts.
18. (1, 2, 6) $\Rightarrow$ Two different figures intercepting each other.
(3, 5, 7) $\Rightarrow$ Each figure has one circle in it.
(4, 8, 9) $\Rightarrow$ Figures having two parallel lines.
19. (1, 5, 7) $\Rightarrow$ Two similar figures.
(2, 3, 9) $\Rightarrow$ One complete and one incomplete figure.
(4, 6, 8) $\Rightarrow$ Figures divided into four parts by two perpendicular lines.
20. (1, 4, 8) $\Rightarrow$ Figures showing similarity (Geometrical figures).
(2, 5, 7) $\Rightarrow$ Pots having base.
(3, 6, 9) $\Rightarrow$ Fish like figures.
21. (1, 4, 9) $\Rightarrow$ Two similar different sized figures.
(2, 5, 7) $\Rightarrow$ Two straight lines in the main figure.
(3, 6, 8) $\Rightarrow$ Figures are divided into two parts by one straight line.
22. (1, 4, 6) $\Rightarrow$ Source of light.
(2, 7, 8) $\Rightarrow$ Stationery/Study material.
(3, 5) $\Rightarrow$ Sports items.
23. (1, 3, 8) $\Rightarrow$ Two similar different sized figures out of which the smaller one is shaded.
(2, 5, 7) $\Rightarrow$ Figures having one black dot in the center.
(4, 6, 9) $\Rightarrow$ Two similar different sized figures.
24. (1, 5, 7) $\Rightarrow$ Each figure has one circle, one arrow head and one line segment.
(2, 4, 8) $\Rightarrow$ Each figure has one arrow.
(3, 6, 9) $\Rightarrow$ Each figure has one curved line with arrow head.
25. (1, 4, 9) $\Rightarrow$ Figures with two dots.
(2, 7, 8) $\Rightarrow$ Consist of two geometrical figures.
(3, 5, 6) $\Rightarrow$ There are line segments inside the figure.
26. (1, 4, 8) $\Rightarrow$ Figures having four sides.
(2, 6, 9) $\Rightarrow$ Figures consist of curved and/ or straight lines.
(3, 5, 7) $\Rightarrow$ Figures formed using six straight lines.
27. (1, 4, 7) $\Rightarrow$ Completely shaded figures.
(2, 6, 8) $\Rightarrow$ Figures partially shaded with straight lines.
(3, 5, 9) $\Rightarrow$ Figures partially shaded with slant lines.

GROUPING OF FIGURES

28. (1, 4, 6) $\Rightarrow$ Two similar figures are intersecting each other.
(2, 5, 8) $\Rightarrow$ Figure with curved lines and circle inside it.
(3, 7, 9) $\Rightarrow$ Each figure is divided into eight parts.
29. (1, 2, 4) $\Rightarrow$ Figures formed using three lines.
(3, 5, 8) $\Rightarrow$ Figures formed using four lines.
(6, 7, 9) $\Rightarrow$ Figures formed using five lines.
30. (1, 5, 7) $\Rightarrow$ Each figure contains an English letter, two circles and shaded oblique pattern.
(2, 4, 9) $\Rightarrow$ Each figure contains an English letter and one black dot.
(3, 6, 8) $\Rightarrow$ Each figure contains an English letter and cross sign.
31. (1, 4, 9) $\Rightarrow$ Two similar different sized figures.
(2, 5, 7) $\Rightarrow$ Two straight lines in the main figure.
(3, 6, 8) $\Rightarrow$ Figures are divided into two parts by one straight line.
32. (1, 4, 7) $\Rightarrow$ Pot with lid.
(2, 5, 8) $\Rightarrow$ Kettle like designs.
(3, 6, 9) $\Rightarrow$ Flower like designs.
33. (1, 5, 7) $\Rightarrow$ Quadrilaterals (Diamond shaped designs).
(2, 3, 6) $\Rightarrow$ Circles.
(4, 8, 9) $\Rightarrow$ Figures are divided into two parts by one line.
34. Figures 1, 5 and 9 are three dimensional figures.
Figures 2, 4 and 8 are plain geometrical figures.
Figures 3, 6 and 7 are divided into four parts by two straight lines.
35. (1, 4, 8) $\Rightarrow$ Two similar figures and one out of those may be with broken line pattern.
(3, 6, 7) $\Rightarrow$ Each figure has two circles in it.
(2, 5, 9) $\Rightarrow$ Pots.
36. (1, 4) $\Rightarrow$ The house is with rectangular door and the chimney is on the right side.
(2, 7) $\Rightarrow$ The house is with curved door and the chimney is on the right side.
(3, 5) $\Rightarrow$ The house is with rectangular door and the chimney is on the left side.
(6, 8) $\Rightarrow$ The house is with curved door and the chimney is on the left side.
37. Figures 1,5,6 contain two similar elements, one inside the other.
Figures 2, 3, 4 contain straight lines each dividing the main figure into two equal parts.
Figures 7,8,9 contain two different elements, one inside the other.
38. (1, 6, 9) $\Rightarrow$ Obtuse angles.
(2, 4, 7) $\Rightarrow$ Acute angles.
(3, 5, 8) $\Rightarrow$ Right angles.
39. (1, 6, 9) $\Rightarrow$ Triangles.
(2, 5, 8) $\Rightarrow$ Figures formed using five lines.
(3, 4, 7) $\Rightarrow$ Figures having four sides.
40. (1, 2, 7) $\Rightarrow$ Plain Geometrical Figures.
(3, 5, 9) $\Rightarrow$ Two different figures, one inside the other.
(4, 6, 8) $\Rightarrow$ Two different figures attached together.
41. (1, 4, 8) $\Rightarrow$ Two similar Different sized figures attached together.
(2, 5, 6) $\Rightarrow$ Each contains three shapes out of which two are similar.
(3, 7, 9) $\Rightarrow$ Each contains two figures and one is placed inside another.
42. (1, 2, 5) $\Rightarrow$ Each figure has a pattern formed using four lines curved in a concave direction.
(3, 7, 8) $\Rightarrow$ Each figure has a pattern formed using four lines curved in a convex direction.
(4, 6, 9) $\Rightarrow$ Each figure has a pattern formed using straight lines.
43. (1, 5, 8) $\Rightarrow$ Similar figures.
(2, 3, 4) $\Rightarrow$ Similar figures.
(6, 7, 9) $\Rightarrow$ Similar figures.
44. (1, 7, 9) $\Rightarrow$ All the three figures are similar, just rotated in different directions.
(2, 4, 6) $\Rightarrow$ Two similar different sized figures.
(3, 5, 8) $\Rightarrow$ Open ended figures.
45. (1, 4, 7) $\Rightarrow$ Quadrilaterals.
(2, 5, 8) $\Rightarrow$ Three dimensional figures.
(3, 6, 9) $\Rightarrow$ Triangles.
46. (1, 3, 9) $\Rightarrow$ Two different geometrical figures are intercepting.
(2, 6, 7) $\Rightarrow$ Figures having curved as well as straight lines.
(4, 5, 8) $\Rightarrow$ Each figure contains a bulb like shape.
47. (1, 3, 4) $\Rightarrow$ Figures formed using three lines.
(2, 5, 9) $\Rightarrow$ Figures formed using five lines.
(6, 7, 8) $\Rightarrow$ Figures formed using four lines.

In these questions we are given some figures and from the options we have to find the next figure in the series. The given series will follow a logical pattern. The logical pattern can be based on Rotation or on No. of lines or anything which follows a logical pattern. We have to complete the given series using this logical pattern.

Directions (1-3): In the following questions, complete the series of figures by selecting the correct answer figure from the given responses.

Ex1. Question figures:

Answer figures:

Sol: Here in each step one of the pins gets inverted sequentially from right to left. **Ans (D)**

Ex2. Question figures:

Answer figures:

Sol: In each step the number of sides in the figure as well as the number of parts increases by one. **Ans (A)**

Ex3. Question figures:

Answer figures:

Sol: In each step one line segment and one dot are added to the figure. In one step they are added to the left side and in next step to the right side of the figure. **Ans (C)**

SERIES
EXERCISE

1. Find the missing figure from the given responses.

Question figures:

Answer figures:

Directions (2-3): Find the missing figure in the series from the given answer figures.

2. **Question figures:**

Answer figures:

3. **Question figures:**

Answer figures:

Directions (4-5): Complete the series of figures, by selecting correct answer figure from the given responses.

4. **Question figures:**

Answer figures:

5. **Question figures:**

Answer figures:

Directions (6-8): Find the missing figure of the series from the given answer figures.

6. **Question figures:**

Answer figures:

7. **Question figures:**

Answer figures:

8. **Question figures:**

Answer figures:

Directions (9-10): Find the missing figure in the series from the given answer figures.

9. **Question figures:**

Answer figures:

10. Question figures:

Answer figures:

(A) (B) (C) (D)

11. Find the missing figure in the series from the given answer figures.

Question figures:

Answer figures:

(A) (B) (C) (D)

12. Which of the following answer figures can complete the given series?

Question figures:

Answer figures:

(A) (B) (C) (D)

Directions (13-14): In each of the following questions a series is given with one term missing. Choose the correct alternative from the given ones that will complete the series.

13. Question figures:

Answer figures:

(A) (B) (C) (D)

14. Question figures:

Answer figures:

(A) (B) (C) (D)

Directions (15-18): In following questions, find the missing figure of the series from the given answer figures.

15. Question figures:

Answer figures:

(A) (B) (C) (D)

16. Question figures:

Answer figures:

(A) (B) (C) (D)

17. Question figures:

Answer figures:

(A) (B) (C) (D)

18. Question figures:

Answer figures:

(A) (B) (C) (D)

Directions (19-20): In following questions, a series is given with one term missing. Choose the correct alternative from the given ones that will complete the series.

19. Question figures:

Answer figures:

20. Question figures:

Answer figures:

21. Question figures:

Answer figures:

22. Question figures:

Answer figures:

23. Question figures:

Answer figures:

24. Question figures:

Answer figures:

25. Question figures:

Answer figures:

26. Question figures:

Answer figures:

27. Question figures:

Answer figures:

Directions (28-29): A series is given with one term missing. Choose the correct alternative from the given ones that will complete the series.

28. Question figures:

Answer figures:

29. Question figures:

Answer figures:

Directions (30-32): Select the missing figure from the given responses.

30. Question figures:

Answer figures:

31. Question figures:

Answer figures:

32. Question figures:

Answer figures:

33. Question figures:

Answer figures:

34. Question figures:

Answer figures:

35. Question figures:

Answer figures:

Directions (36-37): In the following questions, find the missing figure from the given responses.

36. Question figures:

Answer figures:

37. Question figures:

Answer figures:

Directions (38-39): In each of the following questions, find the missing figure from the given responses.

38. Question figures:

Answer figures:

39. Question figures:

Answer figures:

40. Question figures:

Answer figures:

ANSWER KEY

1. (B)	5. (C)	9. (B)	13. (D)	17. (D)	21. (C)	25. (D)	29. (B)	33. (B)	37. (C)
2. (B)	6. (A)	10. (A)	14. (A)	18. (A)	22. (C)	26. (A)	30. (D)	34. (A)	38. (C)
3. (B)	7. (C)	11. (D)	15. (B)	19. (A)	23. (D)	27. (A)	31. (D)	35. (A)	39. (A)
4. (D)	8. (A)	12. (A)	16. (A)	20. (A)	24. (B)	28. (C)	32. (C)	36. (A)	40. (B)

1. We get 3rd figure after rotating the 1st figure through 90° clockwise. Similarly we get 4th figure after rotating the 2nd figure through 90° clockwise. In the same way we will get answer figure (option B) after rotating the 3rd figure through 90° clockwise.
2. Here both the hands of clock are moving in opposite direction. Hence option (B) will be correct.
3. In each step the line segment rotates 90° clockwise and two arrow heads are added (one at each end).
4. In each step the black dot moves 2,3,4,5... spaces respectively in clockwise direction.
5. In each step the square rotates 45° clockwise. Also the black and white dots are moving anti clockwise.
6. In first step the cross sign moves downwards while the minus sign remains static. In second step the cross sign remains static while the minus sign moves westwards. In third step the cross sign will move to bottom middle position while the minus sign will remain static.
7. In each step the figure rotates 45° clockwise and one leaf is added. Also the lining pattern changes alternately. Therefore option (C) will be correct.
8. In each step the circle moves anticlockwise around the pentagon while the cross sign moves clockwise. Also the 'Swastika' moves 2,3,4,5....spaces respectively in clockwise direction.
9. In each step the bigger figure rotates through 90° clockwise and changes its position diagonally. Also the circle is moving clockwise but the shaded region inside the circle is moving anti clockwise.
10. In each step the given figure rotates through 45° clockwise.
11. In each step the triangle is changing its position diagonally while the circle is moving anti clockwise.
12. In each step one small dot is added and one curve is removed.
13. In each step one line segment is removed in a particular way.
14. In each step the bigger design rotates through 45° anti clockwise while the smaller design rotates through 90° clockwise.
15. In each step the three designs are moving from left to right in a way that the rightmost design moves to the leftmost position. Also the shading pattern is moving from right to left.
16. In each step the four designs (3 triangles and 1 rectangle) are moving from left to right in a way that the rightmost design moves to the leftmost position.
17. In each step the design with small circle rotates through 90° anti clockwise while the design with arrow is moving clockwise.
18. Except the pin head the figures (1) and (4) are similar to each other. Hence the answer figure will be similar to the figure (2). Also the pin head is changing its position upwards-downwards in each step. Hence option (A) will be correct.
19. In each step the main design rotates through 90° anti clockwise. Also the small line segments at the two ends are changing their positions inwards-outwards.
20. In each step the figure rotates through 90° clockwise along with its design.
21. In each step one circle is added and one line segment is removed.
22. In first step we remove one triangle diagonally from the rectangle that is placed at top. In second step one rectangle is removed from the bottom. In third step we again remove one triangle from the top. Thus we will remove rectangle in the 4th step. Hence option (C) will be correct.
23. In each step one line segment is added.
24. In each step one line segment is removed. Also the circle moves clockwise.
25. In each step the black dot is moving anti clockwise while the inner circle is rotating through 90° clockwise.
26. In each step one small line segment is added in the middle. Also one arrow is added in clockwise direction.
27. From 1st figure to 3rd figure the top and bottom designs interchanged positions. Similarly from 2nd to 4th figure the left and right designs interchanged positions. Therefore from 3rd figure to 5th figure the top and bottom designs will interchange positions and option (A) will be correct.
28. From 1st figure to 2nd figure the two arrows interchanged positions. Similar changes would occur from 3rd figure to 4th figure.
29. In each step one chord of the circle becomes straight in anti clockwise direction.
30. In each step the figure rotates through 90° clockwise.
31. In each step the oval rotates through 90° clockwise. Also one line segment is added to the main figure.
32. In each step one side of the square is converted into a curved line.
33. We get 3rd figure after rotating the 1st figure through 90° clockwise. Similarly we will get answer figure (option B) after rotating the 2nd figure through 90° clockwise.
34. In each step the shaded sector moves two steps in clockwise direction while the sector with cross signs moves two steps in anti clockwise direction.
35. In each step the figure rotates through 90° clockwise along with its design.
36. In each step the figure rotates 90° clockwise and one line segment is added.
37. In each step the triangle is moving clockwise and the circle is moving diagonally (2 steps in clockwise direction). Also the cross sign is moving between top and middle position.
38. Here figures (1) and (3) are similar to each other. Therefore the answer figure will be similar to figure (2).
39. From 1st figure to 2nd figure the designs placed in opposite directions (top-bottom and left-right) interchanged positions. Similar changes would occur from 3rd figure to 4th figure.
40. In each step the number of sides in each design is increasing by one and one circle is added.

In the questions related to this topic we are given a logical relation between two figures. Using this we have to find the fourth figure which is related to the third figure in the same way in which the second figure is related to the first figure.

Sometimes the first and third figures can be related to each other and the second and fourth figures can be related to each other.

Directions (1-3): In the following questions, select the related figure from the given alternatives.

Ex1. Question Figures:

Answer figures:

(A) (B) (C) (D)

Sol: From 1st figure to 2nd figure, the outer design is divided into two parts out of which only the upper part is kept. It gets shaded and moves to lower position. Also the inner shaded design becomes white and rotates through 45° . Then it moves to upper position after reducing in size. **Ans (C)**

Ex2. Question Figures:

Answer figures:

(A) (B) (C) (D)

Sol: From 1st figure to 2nd figure, each upper element is replaced by the lower element and each lower element is replaced by the upper element. **Ans (B)**

Ex3. Question Figures:

Answer figures:

(A) (B) (C) (D)

Sol: From 1st figure to 2nd figure, the middle-right and lower-middle squares rotate through 90° anticlockwise while the other squares rotate through 90° clockwise. **Ans (B)**

EXERCISE

Directions (1-2): Which one of the answer figures shall complete the given analogy?

1. Question Figures:

Answer figures:

(A) (B) (C) (D)

2. Question Figures:

Answer figures:

(A) (B) (C) (D)

Directions (3-5): Select the related figure from the answer figures.

3. Question Figures:

Answer Figures:

(A) (B) (C) (D)

4. Question Figures:

Answer Figures:

5. Question figures:

Answer figures:

Directions (6-8): Select the related figure from the answer figures.

6. Question figures:

Answer figures:

7. Question figures:

Answer figures:

8. Question figures:

Answer figures:

Directions (9-11): In each of the following questions select the related figure from the given alternatives.

9. Question figures:

Answer figures:

10. Question figures:

Answer figures:

ANSWER KEY

1. (C)	6. (C)	11. (B)	16. (D)	21. (B)	26. (D)	31. (D)	36. (B)	41. (A)	46. (D)
2. (B)	7. (A)	12. (D)	17. (B)	22. (D)	27. (B)	32. (B)	37. (C)	42. (C)	47. (B)
3. (C)	8. (C)	13. (D)	18. (C)	23. (D)	28. (C)	33. (B)	38. (B)	43. (C)	48. (A)
4. (B)	9. (D)	14. (A)	19. (A)	24. (C)	29. (D)	34. (C)	39. (A)	44. (A)	49. (A)
5. (B)	10. (A)	15. (D)	20. (B)	25. (B)	30. (D)	35. (D)	40. (A)	45. (C)	50. (B)

1. From 1st figure to 2nd figure the inner circle rotates through 90° anti clockwise while the black dot in outer circle is moving clockwise. Similar changes would occur from 3rd figure to 4th figure.
2. We get the 2nd figure after rotating the first figure through 180° . Similarly we will get 4th figure after rotating the 3rd figure through 180° .
3. From 1st figure to 2nd figure the upper and lower designs interchanged their positions along with the number but shading pattern is the same as before. Also the left and right designs interchanged positions. Similar changes would occur from 3rd figure to 4th figure.
4. From 1st figure to 2nd figure the three designs around the bigger figure moved anticlockwise. The square also rotates through 45° . Also the white designs become shaded and the shaded designs become white. Similar changes would occur from 3rd figure to 4th figure.
5. From 1st figure to 2nd figure the number of sides got one less.
Similarly we will get 4th figure (option B) from the 3rd figure.
6. From 1st figure to 2nd figure the main design rotates through 45° clockwise and the line segments got doubled.
Similarly we will get 4th figure (option C) from the 3rd figure.
7. From 1st figure to 2nd figure the left and right designs moved to upper and lower positions respectively. The inner designs also moved to upper and lower positions.
Similarly we will get 4th figure (option A) from the 3rd figure.
8. From 1st figure to 2nd figure the two designs are converted individually into mirror image but the middle line segment of the left design remains unchanged. Similar changes would occur from 3rd figure to 4th figure.
9. The 2nd figure is the mirror image of the 1st figure. Similarly the 4th figure will be the mirror image of the 3rd figure.
10. From 1st figure to 2nd figure the number of sides got one less. Also the inner circles moved out of the figure and the outer circle moved inside the figure. Similar changes would occur from 3rd figure to 4th figure.
11. From 1st figure to 2nd figure the following changes took place:

Similar changes would occur from 3rd figure to 4th figure.

12. From 1st figure to 2nd figure the left and right designs interchanged positions. Also the top and bottom designs interchanged positions.
Similar changes would occur from 3rd figure to 4th figure.
13. From 1st figure to 2nd figure the horizontal arrow rotates through 45° clockwise.
14. From 1st figure to 2nd figure the design rotates through 90° clockwise.
15. From 1st figure to 2nd figure the outer and inner designs interchanged positions.
16. From 1st figure to 2nd figure the middle and the innermost designs interchanged positions.
17. From 1st figure to 2nd figure there lefts only third design and the other designs are removed.
18. Here the 3rd figure is the mirror image of 2nd figure. Similarly 4th figure will be mirror image of the 1st figure.
19. We get the 2nd figure after rotating the first figure through 180° . Similarly we will get 4th figure after rotating the 3rd figure through 180° .
20. From 1st figure to 2nd figure one line segment is added to the bottom of the given letter and another letter is formed. Similarly we will get letter 'L' from letter 'T'.
21. The three line segments from the 1st figure converted into a triangle (3-sided figure) in 2nd figure. Similarly the six line segments from the 3rd figure will convert into a hexagon (6-sided figure) in 4th figure.
22. From 1st figure to 2nd figure one design is removed and the remaining two designs are rotated through 90° . Also the circle is made half shaded. Similar changes would take place from 3rd to 4th figure.
23. From 1st figure to 2nd figure the middle design rotates through 90° clockwise. Then it is moved to the side of square and the same design is formed on the opposite side. Similar changes would take place from 3rd to 4th figure.
24. From 1st figure to 2nd figure three line segments (2 slant lines and 1 vertical line) are added.
25. From 1st figure to 2nd figure two arrows and one plus sign are removed and remaining arrows are inverted. Similar changes would take place from 3rd to 4th figure.
26. We get the 2nd figure after dividing the 1st figure vertically. Similarly we will get 4th figure (option D) from the 3rd figure.
27. From 1st figure to 2nd figure the middle design rotates through 90° . Also the shaded part becomes white and the white part becomes shaded.
28. From 1st figure to 2nd figure the design rotates through 180° and 3 circles are added. Similarly we will get 4th figure (option C) from the 3rd figure.
29. From 1st figure to 2nd figure one design is added and then the 3 designs rotate through 90° anticlockwise. Also the smallest line segments at the bottom of the arrows will shift to the opposite side. Therefore we will get option (D) from the 3rd figure.

From 1st figure to 2nd figure the same design is added in a particular way.</p> <p>40. From 1st figure to 2nd figure the four designs around the plus sign move 90° clockwise.</p> | <p>41. From 1st figure to 2nd figure one line segment and one triangle are added. Similarly we will get 4th figure (option A) from the 3rd figure.</p> <p>42. We get the 2nd figure after rotating the 1st figure through 45°.</p> <p>43. Here we get the 2nd figure by connecting the ends of inner design in the 1st figure. Also the outer design is removed.</p> <p>44. The 2nd figure is the mirror image of 1st figure. Similarly 4th figure will be mirror image of 3rd figure.</p> <p>45. The 2nd figure is the water image of 1st figure. Similarly 4th figure will be water image of 3rd figure.</p> <p>46. From 1st figure to 2nd figure the outer design is reduced in size and then it is rotated through 180°. Also the inner design is made larger in size. Then both the designs will be attached together.</p> <p>47. We get the 2nd figure after rotating the 1st figure through 180°.</p> <p>48. From 1st figure to 2nd figure the design is made shaded.</p> <p>49. From 1st figure to 2nd figure the two dimensional figure is converted into a three dimensional figure.</p> <p>50. From 1st figure to 2nd figure the circle is converted into a square but its position is same as before.</p> |
|---|---|

In the questions related to this topic we are given 4 figures out of which 3 figures are alike in some manner while the rest one is different. The figure which is different from the rest will be our answer. The figure can be different on the basis of Rotation or Structure or No. of lines etc.

Directions (1-3): In the following questions, out of the five figures, four are similar in a certain manner and one is different. Choose the figure which is different from the rest.

Sol: Except (A), all other figures are similar as they can be rotated into each other.
Ans (A)

Sol: In option (A), the drawn line segments are perpendicular to different bases while in all other figures the line segments are perpendicular to only one base.
Ans (A)

Sol: Except (B), in all other figures the number of circles inside the triangle and outside the triangle are the same.
Ans (B)

EXERCISE

Directions: In each of the following questions find the odd figure from the given alternatives.

30. 
(A) (B) (C) (D)
31. 
(A) (B) (C) (D)
32. 
(A) (B) (C) (D)
33. 
(A) (B) (C) (D)
34. 
(A) (B) (C) (D)
35. 
(A) (B) (C) (D)

36. 
(A) (B) (C) (D)
37. 
(A) (B) (C) (D)
38. 
(A) (B) (C) (D)
39. 
(A) (B) (C) (D)
40. 
(A) (B) (C) (D)

ANSWER KEY

1. (A)	5. (A)	9. (D)	13. (D)	17. (B)	21. (A)	25. (C)	29. (B)	33. (C)	37. (C)
2. (A)	6. (C)	10. (C)	14. (D)	18. (C)	22. (C)	26. (B)	30. (D)	34. (A)	38. (A)
3. (B)	7. (D)	11. (A)	15. (D)	19. (D)	23. (D)	27. (C)	31. (D)	35. (C)	39. (A)
4. (D)	8. (D)	12. (A)	16. (B)	20. (B)	24. (B)	28. (D)	32. (B)	36. (A)	40. (B)

1. Except (A), all other figures are irregular. There is a regular pentagon in option (A).
2. Except (A), all other figures are the same.
3. Except (B), in all other figures two same designs are attached together.
4. Except (D), in all other figures there are two triangles. There is only one triangle in option (D).
5. Except (A), all other figures are divided into a few parts.
6. The figure given in option (C) is symmetric while all other figures are not symmetric.
7. Except (D), all other figures have two types of designs (1 circle and 1 triangle). The figure in option (D) has three types of designs (1 circle and 2 types of triangles).
8. Except (D), in all other options there are two similar figures. In option (D) there are one circle and one ellipse.
9. Except (D), in all other figures the diagonals are in different directions. In option (D) all the diagonals are in same direction.
10. Except (C), in all other options the figure has been divided into three parts.
11. Except (A), all other figures are similar as they can be rotated into each other.
12. Except (A), in all other figures there are one vertical line and two slant lines while in option (A) there are one horizontal line and two slant lines.
13. Except (D), in all other options, the figures have been divided into six parts.
14. Letter 'O' is a vowel while all other letters are consonants.
15. Except (D), in each option all the three designs are facing different directions. In option (D), two designs are facing same direction.
16. Except (B), in all other figures there are two different designs partially intersecting each other. In option (B), two same designs are intersecting each other.
17. Except (B), all other figures are formed using six lines.
18. Except (C), all other figures are narrow opened. The figure in option (C) is wide opened.
19. Except (D), in all other options there are similar figures at equal distance.
20. Except (B), in all other figures only one hand is up.
21. Except (A), in each option the figure has been divided into four equal parts.
22. Except (C), in all other figures the shading pattern of circle is the same.
23. Except (D), in all other figures there are 5 similar designs. In option (D), one design (square) is different.
24. Except (B), each option has three similar designs.
25. Except (C), in all other figures the inner line segments form triangles.
In option (C), the inner line segments form triangles and quadrilaterals.
26. Except (B), in all other figures the line segments are of equal lengths.
27. Except (C), all other figures are similar as they can be rotated into each other.
28. Except (D), in all other options two quadrilaterals are intersecting each other.
29. Except (B), in all other figures, the straight line touches the vertex of triangle. While in option (B), the straight line touches the side of triangle. Or we can say that in option (B), triangle is inverted.
30. Except (D), in all other figures the outer design and the bigger design are similar.
31. Except (D), in all other options there are two similar figures inside the main figure.
32. Except (B), in all other options, the figure is divided vertically.
33. Except (C), in all other figures, the number of cross signs is equal to the number of sides in the figure.
34. Except (A), in each option the arrow points towards the open side of the figure.
35. Except (C), in all other figures the oblique line pattern has been used in one of the squares.
36. Except (A), in all other figures the number of dots is one more than the number of sides while there is a circle (A circle doesn't have any sides) in option (A).
37. Except (C), in all other figures the similar pattern is used in left and right parts.
38. Except (A), in all other figures there has been used one kind of lining pattern.
In option (A), different kind of lining patterns has been used.
39. Except (A), in all other figures the number of pins is one less than the number of sides in the figure.
40. Except (B), in all other figures one line segment and one arrow are intersecting each other at 90° . In option (B) there are two line segments and one arrow. Also they are not intersecting each other at 90° .

This chapter is based on the concept of Venn-diagram. In the question some dots, which are surrounded by some figures, are given and we have to tell in which of the given options the given dots can be placed correctly as they are placed in the question figure.

For e.g. in the question figure one dot is placed in the common region of triangle and circle and another dot is placed in the common region of triangle, circle and square. Now the option in which we can find the common region of only triangle and circle and the common region of all three triangle, circle and square will be correct i.e. the option in which the given two dots can be placed in the same way will be correct.

Directions (1-3): In the following questions, from amongst the four options, select the one which satisfies the same conditions of placement of the dot as in figure (X).

Ex1. Question figure:

Answer figures:

Sol: In figure (X), the dot lies in the region common to triangle and circle only. Here only option (C) contains the same common region as shown below:

Ex2. Question figure:

Answer figures:

Sol: In figure (X), one dot lies in the region common to square and triangle only and another dot lies in the region common to all figures. Here only option (D) contains the same common region as shown below:

Ex3. Question figure:

Answer figures:

Sol: In figure (X), one dot lies in the region common to circle and square only. Another dot lies in the region common to triangle and square only and the third dot lies in triangle only. Here only option (C) contains the same common region as shown below:

common region of square and triangle only

EXERCISE

Directions (1-10): In each of the following questions, a figure (X) consisting of dot (s) is given. Choose an alternative figure which has the same conditions of regions in which dot (s) must be placed as in the given figure (X).

1. Question figure:

(X)

Answer Figures:

(A) (B) (C) (D)

2. Question figure:

(X)

Answer Figures:

(A) (B) (C) (D)

3. Question figure:

(X)

Answer Figures:

(A) (B) (C) (D)

4. Question figure:

(X)

Answer Figures:

(A) (B) (C) (D)

5. Question figure:

(X)

Answer Figures:

(A) (B) (C) (D)

6. Question figure:

(X)

Answer Figures:

(A) (B)

(C) (D)

7. Question figure:

(X)

Answer Figures:

8. Question figure:

(X)

Answer Figures:

9. Question figure:

(X)

Answer Figures:

10. Question figure:

(X)

Answer Figures:

ANSWER KEY

1. (C)	2. (B)	3. (D)	4. (C)	5. (C)	6. (C)	7. (C)	8. (C)	9. (B)	10. (A)
--------	--------	--------	--------	--------	--------	--------	--------	--------	---------

1. In figure (X), the dot lies in the region common to square and circle only. Here only option (C) contains the same common region as shown below:

2. In figure (X), one dot lies in the region common to circle and rectangle only. Another dot lies in the region common to rectangle, square and circle only and the third dot lies in the region common to triangle, square and circle only. Here only option (B) contains the same common region as shown below:

3. In figure (X), one dot lies in the region common to circle and triangle only and another dot lies in circle only. Here only option (D) contains the same common region as shown below:

4. In figure (X), one dot lies in the region common to square and triangle only. Another dot lies in the region common to triangle and circle only and the third dot lies in the region common to triangle and rectangle only. Here only option (C) contains the same common region as shown below:

5. In figure (X), the dot lies in the region common to all the three figures-square, triangle and circle. Here only option (C) contains the same common region as shown below:

6. In figure (X), one dot lies in the region common to square and circle only. Another dot lies in the region common to all the three figures-triangle, square and circle and the third dot lies in the region common to triangle and circle only. Here only option (C) contains the same common region as shown below:

7. In figure (X), one dot lies in the region common to square, circle and rectangle only. Another dot lies in the region common to square and circle only and the third dot lies in the region common to triangle, square and rectangle only. Here only option (C) contains the same common region as shown below:

8. In figure (X), one dot lies in the region common to circle and triangle only and another dot lies in the region common to triangle and square only. Here only option (C) contains the same common region as shown below:

9. In figure (X), one dot lies in the region common to square, circle and rectangle only. Another dot lies in the region common to all four figures and the third dot lies in the region common to triangle, circle and rectangle only. Here only option (B) contains the same common region as shown below:

10. In figure (X), one dot lies in the region common to circle and rectangle only and another dot lies in the region common to circle, triangle and square only. Here only option (A) contains the same common region as shown below:

In the questions related to this topic we are given 4 or 5 pieces of a figure and we have to tell which option figure will be formed using these pieces of the figure.

To solve these questions easily, we have to check each option carefully, then eliminate the options and find the correct answer.

Directions (1-3): In the following questions, find out which of the figures can be formed from the pieces given in figure (X).

Ex1. Question figure:

(X)

Answer figures:

(A) (B) (C) (D)

Sol: Here we have numbered the pieces given in the question figure to solve the question easily:

Thus the following figure can be constructed from the pieces given in question figure:

Ans (B)

Ex2. Question figure:

(X)

Answer figures:

(A) (B) (C) (D)

Sol: Here we have numbered the pieces given in the question figure to solve the question easily:

Thus the following figure can be constructed from the pieces given in question figure:

Ans (C)

Ex3. Question figure:

(X)

Answer figures:

(A) (B) (C) (D)

Sol: Here we have numbered the pieces given in the question figure to solve the question easily:

Thus the following figure can be constructed from the pieces given in question figure:

Ans (B)

FIGURE FORMATION EXERCISE
