Q:4 A cuboid-shaped wooden block has 6 cm length, 4 cm breadth, and 1 cm height. Two faces measuring $4 \text{ cm} \times 1 \text{ cm}$ are colored in black. Two faces measuring $6 \text{ cm} \times 1 \text{ cm}$ are coloured in red. Two faces measuring $6 \text{ cm} \times 4 \text{ cm}$ are coloured in green. The block is divided into 6 equal cubes on sides 1 cm (from 6 cm side), and 4 equal cubes on side 1 cm (from 4 cm side).

How many cubes will have a green color on two sides and the rest of the sides have no colour?

एक घनाभ के आकार के लकड़ी के ब्लॉक की लंबाई 6 सेमी, चौड़ाई 4 सेमी और ऊँचाई 1 सेमी है। $4 \text{ सेमी} \times 1 \text{ सेमी}$ माप वाले दो फलक काले रंग में रंगे हैं। $6 \text{ सेमी} \times 1 \text{ सेमी}$ माप वाले दो फलक लाल रंग में रंगे हैं। $6 \text{ सेमी} \times 4 \text{ सेमी}$ माप वाले दो फलक हरे रंग में रंगे हैं। ब्लॉक को 1 सेमी (6 सेमी की भुजा से) भुजाओं वाले 6 बराबर घन में और 1 सेमी (4 सेमी की भुजा से) भुजा वाले 4 बराबर घनों में विभाजित किया गया है।

कितने घनों में दो भुजाओं पर हरा रंग होगा और शेष भुजाओं पर कोई रंग नहीं होगा?

Q:102 According to the diagram shown on the sides of a single dice, the letters are G, H, I, J, K and L. What is the letter on the opposite surface of the letter K?

एक पासे के किनारों पर दिखाए गए अक्षरों के अनुसार, अक्षर G, H, I, J, K और L हैं। अक्षर K के विपरीत सतह पर कौन सा अक्षर है?

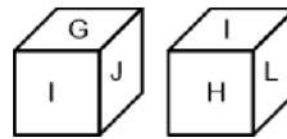

[RPF Constable - 03 Feb 2019 - Shift 1]

1. I
2. J
3. G
4. L

Q:103 According to the given figure, six letters G, H, I, J, K and L are printed on each part of the dice. Which letter has been printed on the opposite part of the letter H?

दी गई आकृति के अनुसार, पासे के प्रत्येक तरफ छह अक्षर G, H, I, J, K और L चिह्नित हैं। H अक्षर के विपरीत भाग पर कौन-सा अक्षर चिह्नित है?

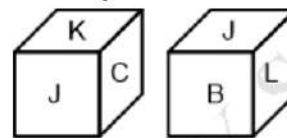

[RPF Constable - 05 Feb 2019 - Shift 1]

1. G
2. K
3. L
4. J

Q:104 According to the given picture, 6 letters A, B, C, J, K and L are printed on each page of the dice. On which page will the letter opposite to letter J be printed?

दी गई आकृति के अनुसार, पासे के प्रत्येक फलक पर 6 अक्षर A, B, C, J, K और L अंकित हैं। J अक्षर के विपरीत अक्षर किस फलक पर अंकित होगा?

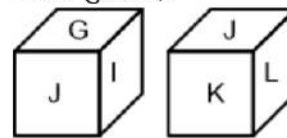

[RPF Constable - 10 Feb 2019 - Shift 2]

1. C
2. A
3. B
4. K

Q:105 As shown in the given image, each side of the dice has been printed with 6 letters G, H, I, J, K and L. Which letter is printed on the opposite side of G?

चूँकि दिए गए आकृति में दिखाया गया है, पासे के प्रत्येक भुजा पर 6 अक्षर G, H, I, J, K और L मुद्रित हैं। G के विपरीत भुजा पर कौन सा अक्षर मुद्रित है?

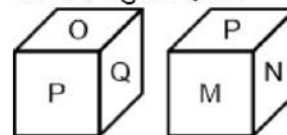

[RPF Constable - 08 Feb 2019 - Shift 2]

1. L
2. I
3. J
4. K

Q:106 According to the given diagram, on each page of the dice, 6 letters M, N, O, P, Q and R are inscribed. When the letter 'O' is printed on the top, what letter will be printed at the bottom?

दिए गए आरेख के अनुसार, पासे के प्रत्येक पृष्ठ पर 6 अक्षर M, N, O, P, Q और R अंकित हैं। जब शीर्ष पर 'O' अक्षर मुद्रित है, तो नीचे कौन-सा अक्षर मुद्रित होगा?

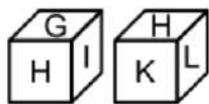

[RPF Constable - 08 Feb 2019 - Shift 1]

1. N
2. O
3. P
4. M

Q:107 As shown in the given image, each part of the dice has been marked with 6 letters G, H, I, J, K and L. Which letter is in the opposite part of L?

जैसा कि दी गई छवि में दिखाया गया है, पासे के प्रत्येक भाग को 6 अक्षरों G, H, I, J, K और L से चिह्नित किया गया है। कौन सा अक्षर L के विपरीत भाग में है?

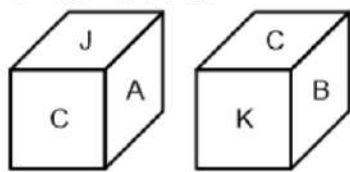

[RPF Constable - 02 Feb 2019 - Shift 1]

1. J
2. G
3. I
4. K

Q:108 On each face of the dice, there are 6 letters A, B, C, J, K and L, as shown in the picture. Which letter is marked on the opposite face of letter K?

पासे के प्रत्येक फलक पर 6 अक्षर A, B, C, J, K और L अंकित हैं, जैसा कि चित्र में दिखाया गया है। K अक्षर के विपरीत फलक पर कौन सा अक्षर अंकित है?

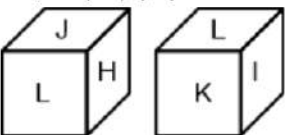

[RPF Constable - 10 Feb 2019 - Shift 1]

Answers and Solutions

Q:1 The correct answer is **Option 2** i.e. **8**.

Number of cubes having 3 colored sides = Number of cubes at the corners = **8**

Q:2 The correct answer is **option 2** i.e. **4**.

In dice 2 and 3, 4 is common and on the same surface then the remaining surfaces will be opposite to each other.

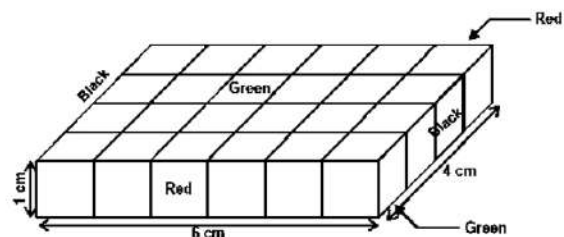

Thus, the number **4** is on the face opposite the face having '2'.

Q:3 The correct answer is **option 1** i.e. **24**.

In dice 2 and 3, 23, and 26 are common. Then the remaining surface will be opposite to each other.

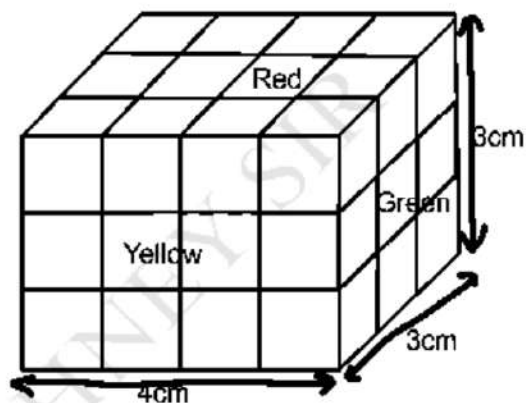

Thus, the number **24** is on the face opposite 21.

Q:4 The correct answer is **Option 4** i.e. **8**

There are 16 small cubes attached to the outer walls of the cuboid which will have either 3 or more colored sides. Therefore, the remaining inner small cubes will be the cubes having two sides green colored. So the required number = $24 - 16 = 8$

Q:5 The correct answer is **option 2** i.e. **16**.

The opposite faces of dimensions 4×3 are coloured yellow.

The opposite faces of other dimensions 4×3 are coloured red.

The opposite faces of dimensions 3×3 are coloured green.

Number of small cubes having only two faces coloured = 6 from the front + 6 from the back + 2 from the left + 2 from the right = 16

Q:6 The correct answer is **option 1** i.e. **1**.

In dice 2 and 4, 2 and 4 are common. Then the remaining surface will be opposite to each other.

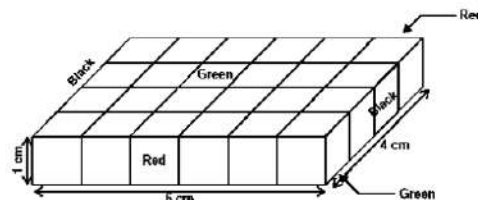

Thus, number **1** is on the face opposite to the face showing '6'.

Q:7 The correct answer is **option 4** i.e. **6**.

In dice 1 and 2, 4 is common and on the same surface. Then the remaining surfaces will be opposite to each other.

Thus, the number **6** is on the face opposite to the face showing '3'.

Q:8 The correct answer is **Option 1** i.e. **16**

There are 16 small cubes attached to the outer walls of the cuboid.

So, the remaining number of small cubes have only 2 sides Green.

Hence, the number of remaining cubes is = $24 - 8 = 16$

Q:9 The correct answer is **option 4** i.e. **1**.

Opposite pairs of dice will be

$2 \Leftrightarrow X, 3 \Leftrightarrow Z, 1 \Leftrightarrow Y$

So, Y is opposite to 1.

Hence, the correct answer is **1**.

Q:10 The correct answer is **option 1** i.e. **D**.

Opposite pairs = $F \Leftrightarrow C, B \Leftrightarrow A, D \Leftrightarrow E$

So E is opposite to D

Hence, the correct answer is **D**.

Q:11 The correct answer is **option 4** i.e. **B**.

Opposite pairs will be:

$C \Leftrightarrow E, A \Leftrightarrow F, B \Leftrightarrow D$

So, B is opposite to D.

Hence, the correct answer is **B**.

Q:12 The correct answer is **option 4** i.e. **1**.

Opposite pairs = $1 \Leftrightarrow 4, 3 \Leftrightarrow 6, 2 \Leftrightarrow 5$

So, 4 is opposite to 1.

Hence, the correct answer is **1**.

Q:13 The correct answer is **option 1** i.e. **3**.

Opposite pairs = $3 \Leftrightarrow 2$ (as 4 and 5 are common in both dice)

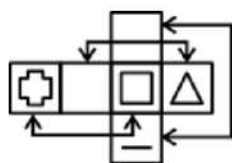

Hence, the correct answer is **3**.

Q:14 The correct answer is **option 3** i.e. **1**.

On comparing dice 2 and dice 3 we get that they have two same number. So, the remaining numbers will be opposite to each other.

So, **6** is opposite to **1**.

Q:15 The correct answer is **option 2** i.e.

To form a cube the opposite pairs should not be adjacent. **Option (2)**, follows the logic so, it can be formed.

Q:16 The correct answer is **option 2** i.e. **4**.

On comparing dice 1 and dice 2 we get 4 is common in both dices. So, we write the letters from 4 in clockwise direction.

Dice 1: 4 6 5

Dice 2: 4 3 1

So, **4** is the opposite of **2**.

Q:17 The correct answer is **option 3** i.e. **1**.

On comparing dice 1 and dice 2 we get 3 is common in both dices. So, we write the letters from 3 in clockwise direction.

Dice 1: 3 6 2

Dice 2: 3 5 4

So, **3** is opposite to **1**.

Q:18 The correct answer is **option 4** i.e. **6**.

In dice 1 and 3, 2 and 4 are common then the remaining surface will be opposite to each other.

Thus, the number **6** is on the face opposite the face showing '3'.

Q:19 The correct answer is **option 3** i.e. **A**.

In both dices, R is common and on the same surface. Then the remaining surfaces will be opposite to each other.

Thus, the letter **A** is on the face opposite to C.

Q:20 The correct answer is **option 3** i.e. **11**.

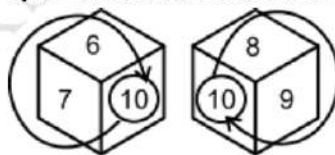

On comparing dice 2nd and 3rd 9, 8, 7 and 10 are adjacent faces of 12. Hence, remaining number 11 is on the face opposite 12.

Q:21 The correct answer is **option 1** i.e. **B**.

In both dice, Q is common and on the same surface. Then the remaining surfaces will be opposite to each other.

Thus, the letter **B** is on the face opposite to A.

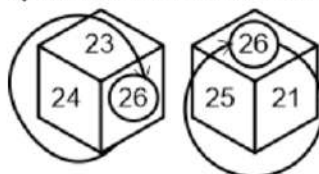

Q:22 The correct answer is **option 1** i.e. **10**.

In dice 1 and 2, 10 is common and on the different surface. Then we can rotate in a clockwise direction.

Thus, the number **10** is on the face opposite 5.

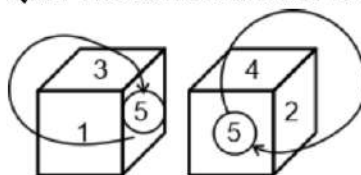

Q:23 The correct answer is **option 2** i.e. **22**.

In dice 1 and 3, 26 is common and on the different surface. Then we can rotate in a clockwise direction.

Thus, the number **22** is on the face opposite 26.

Q:24 The correct answer is **option 1** i.e. **6**.

In dice 2 and 3, 5 is common and on the different surface. Then we can rotate in a clockwise direction.

Thus, the number **6** is on the face opposite the face showing '5'.

Q:25 The correct answer is **option 2** i.e. **3**.

When we compare both dice, we see that dot 2 and dot 1 are common. So, the remaining dots are opposite each other.

So, 6 is opposite to 3.

Q:26 The correct answer is **option 3** i.e. **O**.

On comparing dice 1, 2, and 3 we get that M is common on all 3 dices. So, the adjacent alphabets of M is not opposite to M.

So, M is the opposite of **O**.

Q:27 The correct answer is **option 4** i.e. **1**.

On comparing dice 1 and dice 2 we get that they have two same numbers i.e. 5. So, the remaining unique figures will be opposite to each other.

So, **3** is the opposite of **1**.

Q:28 The correct answer is **option 4** i.e. **L**.

In both dices, N and M are common. Then the remaining surfaces will be opposite to each other.

Thus, the letter **L** that will be on the face opposite to the one having **O**.

Q:29 The correct answer is **option 4** i.e. **5**.

In dice 1 and 2, 3 is common and on the different surface. Then we can rotate in a clockwise direction start from 3.

Thus, number **5** is on the face opposite to '1'.

Q:30 The correct answer is **option 4** i.e. **P**.

Opposite pairs = $P \Leftrightarrow M$, $Q \Leftrightarrow L$, $N \Leftrightarrow O$

So, letter **P** on the face opposite **M**.

Hence, the correct answer is **P**.

Q:31 The correct answer is **option 4** i.e. **5**.

In dice 1 and 2, 6 and 4 are common then the remaining surface will be opposite to each other.

Thus, the number **5** is on the face opposite the face showing '3'.

Q:32 The correct answer is **option 2** i.e. **5**.

In dice 1 and 3, 1 and 2 are common then the remaining surface will be opposite to each other.

Thus, the number **5** is on the face opposite the face showing '3'.

Q:33 The correct answer is **option 2** i.e. **3**.

When we compare dice 2 and 3, we find that numbers 4 and 1 are common in both. So, the rest numbers 3 and 6 are opposite to each other.

Hence, 6 is opposite to **3**.

Q:34 The correct answer is **option 2** i.e. **6**.

When we compare both dice, we see that the number 3 is common on both. So, the adjacent numbers are not opposite 3. The remaining numbers are opposite each other.

Hence, 3 is opposite to **6**.

Q:35 The correct answer is **option 3** i.e. **L**.

When we compare the first and third dice, we see that **L** is common on both. So, adjacent to **L** are not opposite of **L**.

Hence, the opposite of **N** is **L**.

Q:36 The correct answer is **option 4** i.e. **1**.

On comparing 2nd and 3rd dice we get that the number 3 is common on both dices. So, the remaining are opposite to each other.

Hence, 6 is opposite to **1**.

Q:37 The correct answer is **option 1** i.e. **3**.

When we compare both dice, we see that the number 3 is common. So, adjacent numbers to 3 are not opposite numbers.

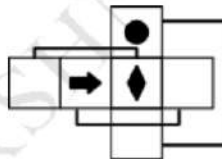

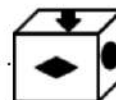

Hence, the opposite of **3** is **6**.

Q:38 The correct answer is **option 4** i.e. **5**.

When we compare 1st and 2nd dice, we see that the number 6 is common. So, adjacent numbers of 6 are not opposite to 6. Remainings are opposite to each other.

Hence, the opposite of **4** is **5**.

Q:39 The correct answer is **option 1** i.e. **1**.

The opposite pairs should not be adjacent to form a cube. Only **option (1)** can be formed.

Q:40 The correct answer is **option 2** i.e. **2**.

On comparing the 1st and 3rd dice we get that number 2 is common on both dices so, adjacent of 2 are not opposite of 2

Hence, 1 is the opposite of **2**.

Q:41 The correct answer is **option 4** i.e. **5**.

In figure 1 and 2, 5 is common and on the same surface. Then the remaining surface will be opposite to each other.

Thus, the number **5** is on the face opposite to the one showing '1'.

Q:42 The correct answer is **option 2** i.e. **4**.

On comparing the 1st and 2nd dice, we see that number 2 is common in both dice. So, the remaining are opposite to each other.

Hence, 2 is the opposite of **4**.

Q:43 The correct answer is **option 2** i.e. **4**.

When we compare the first and second figures, we see that number 1 is common in both figures. So, the remaining figures are opposite each other.

Hence, 6 is opposite to **4**.

Q:44 The correct answer is **option 4** i.e. **S**.

When we compare the two dice, we see that U and T are common. So, the remaining surfaces are opposite each other.

Hence, R is opposite to S.

Q:45 The correct answer is **option 2** i.e. **K**.

In both dice, K is common and on different surfaces. Then we can rotate clockwise starting from K.

$K \Leftrightarrow M$; $J \Leftrightarrow L$; $N \Leftrightarrow O$

Thus, the letter **K** is on the face opposite to M.

Q:46 The correct answer is **option 4** i.e. **5**

In dice 1 and 2, 3 is common and on the different surface. Then we can rotate in a clockwise direction start from 3.

Thus, number **5** is on the face opposite to '2'.

Q:47 The correct answer is **option 1** i.e. **9**.

In dice 2 and 3, 7 is common and on the different surfaces. Then we can rotate in a clockwise direction.

$8 \Leftrightarrow 11$; $12 \Leftrightarrow 10$; $7 \Leftrightarrow 9$

Thus, the number **9** is on the face opposite 7.

Q:48 The correct answer is **option 4** i.e. **H**.

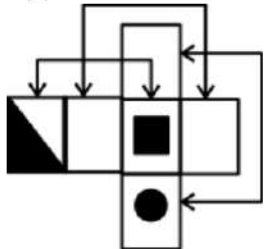

In both dice, T is common and on the same surface then the remaining surfaces will be opposite to each other.

Thus, the letter **H** is on the face opposite to P.

Q:49 The correct answer is **option 4** i.e.

Opposite face of the given dice is:

Opposite face of dice are never adjacent to each other.

Hence, only dice given in option (4)

Q:50 The correct answer is **option 4** i.e. **A**

In both dices, B and C is common in both the dice. Then the remaining surfaces will be opposite to each other.

Thus, the letter **A** is on the face opposite to 'D'.

Q:51 The correct answer is **option 2** i.e. **R**

In both dices, P is common and on the same surface. Then the remaining surfaces will be opposite to each other.

Thus, the letter **R** is on the face opposite to 'B'.

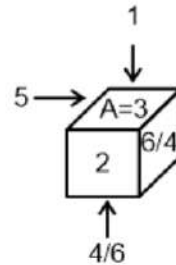

Q:52 The correct answer is **option 2** i.e. **1**.

In the first and third cubes, 4 and 2 are common. So, the remaining faces are opposite to each other. So, 3 is opposite to 1.

Q:53 The correct answer is **option 3** i.e. **3**.

From dice 1 and 2, 3 and 5 are common. So, 2 is opposite to 1. 3 will be opposite to either 4 or 6. 5 will be opposite to either 6 or 4.

Now from dice 1 and 3;

So, '3' comes in place of A.

Q:54 The correct answer is **option 1** i.e. **4**.

From the first two dice, 1 and 5 are common, so, the remaining faces are opposite to each other. So, 2 is opposite to 4.

Hence, the correct answer is **4**.

Q:55 The correct answer is **option 4** i.e. **5**.

On comparing dice 1, and 2 we get 3 and 4 are common so, 1 will be opposite to 5.

Q:56 The correct answer is **option 1** i.e. **6**.

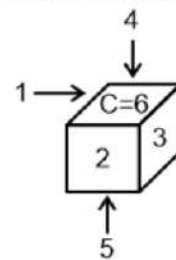

From first two dices, 5 is common.

1 is opposite to 3.

2 is opposite to 4.

So, 5 will be opposite to 6.

Now from first and third dice;

So, '6' comes in place of C.

Q:57 The correct answer is **option 3** i.e. **1**.

In the first and third dice, 1 and 4 are common. So, 2 is opposite to 5.

In the first and second dice, 1 and 5 are common. So, 3 is opposite to 4.

So, the remaining opposite pair is 1 and 6.

Q:58 The correct answer is **option 2** i.e. **#**.

From Comparing the dice 1 and 2 we get two figures are the same so, the rest of the figures are opposite to each other

Dice 1	@	\$	%
Dice 2	@	\$	#

So, #opposite to%.

Q:59 The correct answer is **option 1** i.e. **4**.

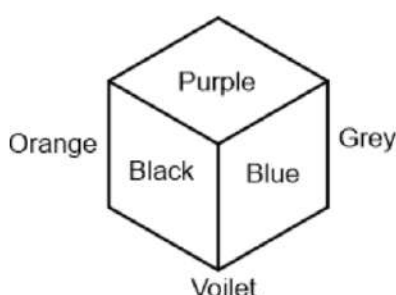

In the first and the third dice; numbers 3 and 5 are common. So, the remaining numbers will be opposite to each other.

So, 6 is opposite to 4.

Q:60 The correct answer is **option 4** i.e. **A**.

From the given information, we can deduce the following relationships:

- Purple is not adjacent to violet because they are opposite.
- Black is not adjacent to grey because they are opposite.
- Blue is not adjacent to orange because they are opposite.

Now let's evaluate the options:

- A) Purple is not adjacent to Black and grey - **False**
- B) Blue is adjacent to Purple - **True**
- C) Orange is adjacent to Grey - **True**
- D) Black is adjacent to Blue - **True**

So, the option that is definitely false is A) Purple is not adjacent to Black and grey.

Q:61 The correct answer is **option 1** i.e. **A**.

A) White is not adjacent to Violet and Orange - **False** (As violet and orange are opposite pairs so, one of them will definitely be adjacent to white at a time)

- B) Blue is adjacent to White - **True**
- C) Orange is adjacent to White - **True**
- D) Black is adjacent to Orange - **True**

Q:62 The correct answer is **option 3** i.e. **A**.

- Green is opposite to orange
- Purple is opposite to pink
- Maroon is opposite to black.

From the given information, we can deduce the following relationships:

- Green is not adjacent to orange as they are opposite.
- Purple is not adjacent to pink as they are opposite.
- Maroon is not adjacent to black as they are opposite.

Let us now evaluate the options:

A) Maroon is not adjacent to Pink and Violet - **False**
(Maroon can either be adjacent to Pink or Violet but not both.)

- B) Green is adjacent to Pink: **True**
- C) Maroon is adjacent to Orange: **True**
- D) Violet is adjacent to Green: **True**

Q:63 The correct answer is **option 1** i.e. **A**.

As per the given information;

- 3 is opposite to 6.
- 4 is opposite to 5.
- 2 is opposite to 1.

From statement 1, we know that 3 and 6 are opposite, so they cannot be adjacent.

From statement 2, we know that 4 and 5 are opposite, so they cannot be adjacent.

From statement 3, we know that 2 and 1 are opposite, so they cannot be adjacent.

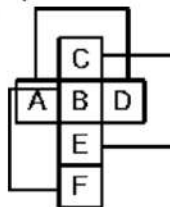

Now, let us evaluate the options:

Opposite pairs: $3 \Leftrightarrow 6$, $4 \Leftrightarrow 5$, $2 \Leftrightarrow 1$

- A) 4 is not adjacent to 3 and 6 - **False**
- B) 4 is adjacent to 2 - **True**
- C) 4 is adjacent to 1 - **True**
- D) 5 is adjacent to 3 - **True**

So, the option that is definitely false is **A) 4 is not adjacent to 3 and 6**.

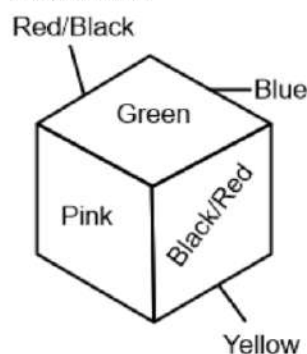

Q:64 The correct answer is **option 3** i.e. **C**.

- A) A is between C and B: **False**
- B) A is adjacent to D: **False**
- C) B is between A and D: **True**
- D) F is between B and E: **False**

Q:65 The correct answer is **option 3** i.e. **C**.

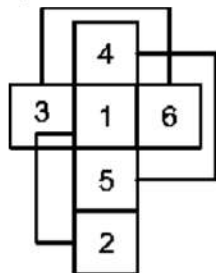

As per the given question, in a dice, each face is colored as follows:

The following arrangement can be assumed.

Statement:

- A) Black is between Blue and Green → **False** (Because black is between blue and pink.)
 B) Black is adjacent to Red → **False** (Black is opposite to Red.)
 C) Green is Between Black and Red → **True** (It is clear from the figure that green is between black and red.)
 D) Yellow is between Green and Pink → **False** (Because yellow is between blue and pink.)
Q:66 The correct answer is **option 1** i.e. **C**.

- A) 3 is between 5 and 1 - **False**.
 B) 3 is opposite to 1 - **False**.
 C) 1 is between 3 and 6 - **True**.
 D) 2 is between 1 and 4 - **False**.

Q:67 The correct answer is **option 3** i.e. *****.

In the first and second dice, % is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 1: % # &

Dice 2: % x #

So, % is opposite to *.

Anticlockwise direction:

Dice 1: % & #

Dice 2: % # x

So, % is opposite to *.

Hence, **option 3** is the correct answer.

Q:68 The correct answer is **option 1** i.e. **2**.

When the sheet is folded along the lines to form a cube, the opposite pairs are;

3 is opposite to 6.

1 is opposite to 2.

5 is opposite to 4.

Hence, **option 1** is the correct answer.

Q:69 The correct answer is **option 4** i.e. **6**.

In the first and second cubes, 2 and 4 are common. So, the remaining face will be opposite to each other.

So, 3 is opposite to 6.

Hence, **option 4** is the correct answer.

Q:70 The correct answer is **option 3** i.e.

When the sheet is folded along the lines to form a cube, the opposite pairs are;

+ is opposite to x.

- is opposite to /.

Blank face is opposite to ?.

In option 1, 2, and 4, the opposite pairs are adjacent to each other. Hence, none can be formed.

In option 2, there are no opposite pairs that are adjacent to each other. Hence, this cube can be formed.

Hence, **option 3** is the correct answer.

Q:71 The correct answer is **option 4** i.e. **J**.

When the sheet is folded along the lines to form a cube, the opposite pairs are;

F is opposite to J.

H is opposite to W.

Q is opposite to E.

Hence, **option 4** is the correct answer.

Q:72 The correct answer is **option 3** i.e. **1**.

In both the dice, 5 is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 1: 5 6 3

Dice 2: 5 4 2

So, 5 is opposite to 1.

Anticlockwise direction:

Dice 1: 5 3 6

Dice 2: 5 2 4

So, 5 is opposite to 1.

Hence, **option 3** is the correct answer.

Q:73 The correct answer is **option 3** i.e. **6**.

In the first and second dice, 5 is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 1: 5 4 2

Dice 2: 5 3 6

So, 2 is opposite to 6.

Anticlockwise direction:

Dice 1: 5 2 4

Dice 2: 5 6 3

So, 2 is opposite to 6.

Hence, **option 3** is the correct answer.

Q:74 The correct answer is **option 2** i.e. **G**.

In the first and third dice, R is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 1: R G E

Dice 2: R T A

So, G is opposite to T.

Anticlockwise direction:

Dice 1: R E G

Dice 2: R A T

So, G is opposite to T.

Hence, **option 2** is the correct answer.

Q:75 The correct answer is **option 1** i.e. =.

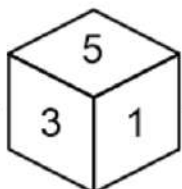

In both dice, ! is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 1: ! % \$

Dice 2: ! # @

So, ! is opposite to =.

Q:76 The correct answer is **option 2** i.e.

When the sheet is folded along the lines;

5 is opposite to 2.

3 is opposite to 4.

6 is opposite to 1.

In options 1, 3, and 4 opposite pairs are adjacent to each other. Hence, these cubes cannot be formed.

In option 2, no opposite pairs are adjacent to each other.

Q:77 The correct answer is **option 1** i.e. I.

In both the dice, H is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 1: H G F

Dice 2: H I J

So, G is opposite to I.

Q:78 The correct answer is **option 4** i.e. 1.

When the sheet is folded along the lines;

6 is opposite to 1.

3 is opposite to 5.

4 is opposite to 2.

Q:79 The correct answer is **option 3** i.e. 6.

In the first and third dice, 3 is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 1: 3 6 5

Dice 2: 3 1 2

So, 1 is opposite to 6.

Q:80 The correct answer is **option 3** i.e. 4.

When the sheet is folded along the lines;

4 is opposite to 5.

2 is opposite to 1.

6 is opposite to 3.

Q:81 The correct answer is **option 4** i.e. 4.

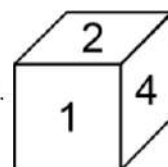

In both dice, 4 is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 1: 4 1 2

Dice 2: 4 5 6

So, 3 is opposite to 4.

Q:82 The correct answer is **option 1** i.e.

When the dice are rotated 4 times 90 degrees clockwise then 3 will be at the top or the dice will be the same as the dice shown in question.

then once the dice is rotated anticlockwise

then 2 will be at the top and 3 will not be visible at the front.

Q:83 The correct answer is **option 4** i.e. 4.

When the sheet is folded along the lines;

6 is opposite to 1.

5 is opposite to 3.

4 is opposite to 2.

From this, 2 cannot be adjacent to 4.

Hence, **option 4** is the correct answer.

Q:84 The correct answer is **option 2** i.e. ☐.

In the first and third dice, -- is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 1: ☐ ☒

Dice 3: -- ☒ →

So, → is opposite to ☐.

Anticlockwise direction:

Dice 1: ☒ ☐

Dice 3: -- ☒ →

So, → is opposite to ☐.

Hence, **option 2** is the correct answer.

Q:85 The correct answer is **option 2** i.e. 6.

In both the dice, 1 dot is common. So, start rotating in the clockwise direction from 1 dot.

Dice 1: 1 5 2

Dice 2: 1 4 3

So, 1 dot is opposite to 6 dots.

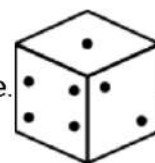

Q:86 The correct answer is **option 1** i.e. 1.

In the second and third dice, 5 is common. So, start rotating in the clockwise direction from 5.

Dice 2: 5 6 2

Dice 3: 5 1 3

So, 6 is opposite to 1.

Q:87 The correct answer is **option 4** i.e.

When the sheet is folded along the cubes, the opposite pairs are;

1 is opposite to 6.

2 is opposite to 5

3 is opposite to 4

In options 1, 2, and 3 opposite pairs are adjacent to each other. Hence, any of the cubes cannot be formed.

In option 4, none of the opposite pairs are adjacent to each other. Hence, this cube can be formed.

Q:88 The correct answer is **option 3** i.e. **6**.

In both the dice, 1 dot is common. So, start rotating in the clockwise direction.

Dice 1: 1 2 3

Dice 2: 1 5 4

So, **6** is opposite to **1**.

Q:89 The correct answer is **option 2** i.e. **5**.

In the second and third dice, 3 is common. So, start rotating in the clockwise direction from 3:

Dice 2: 3 2 4

Dice 3: 3 1 6

So, 3 is opposite to 5.

Q:90 The correct answer is **option 4** i.e. **K**.

In the second and third dice, T is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 2: T A Q

Dice 3: T K G

So, A is opposite to K.

Anticlockwise direction:

Dice 2: T K G

Dice 3: T G K

So, A is opposite to K.

Hence, **option 4** is the correct answer.

Q:91 The correct answer is **option 3** i.e. **3**.

In the second and third dice, 6 is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 2: 6 3 2

Dice 3: 6 4 1

So, 3 is opposite to 4.

Anticlockwise direction:

Dice 2: 6 2 3

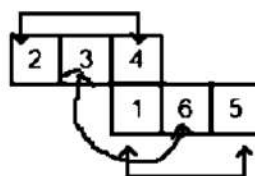

Dice 3: 6 1 4

So, 3 is opposite to 4.

Hence, **option 3** is the correct answer.

Q:92 The correct answer is **option 3** i.e. **15**

In the dice, faces opposite to each other:

So, the sum of 3 and 4 and their opposites are = $3 + 6 + 4 + 2 = 15$

Q:93 The correct answer is **option 1** i.e. **In**.

In both the dice, Yes is common. So, start rotating in the clockwise direction.

Dice 1: Yes If No

Dice 2: Yes It Is

So, Yes is opposite to In.

Q:94 The correct answer is **option 3** i.e. **L**.

In the second and third dice, O is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 2: O M N

Dice 3: O L J

So, M is opposite to L.

Anticlockwise direction:

Dice 2: O N M

Dice 3: O J L

So, M is opposite to L.

Hence, **option 3** is the correct answer.

Q:95 The correct answer is **option 1** i.e. **5**.

In the second and third dice, 3 is common. So, start rotating either in the clockwise or anticlockwise direction.

Clockwise direction:

Dice 2: 3 6 4

Dice 3: 3 5 2

So, 6 is opposite to 5.

Anticlockwise direction:

Dice 2: 3 4 6

Dice 3: 3 2 5

So, 6 is opposite to 5.

Hence, **option 1** is the correct answer.

Q:96 The correct answer is **option 1** i.e. **U**.

When the sheet is folded to form a cube, the opposite pairs are;

A is opposite to O.

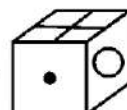

I is opposite to Z.

So, E is opposite to U.

Q:97 The correct answer is **option 1** i.e. **E**.

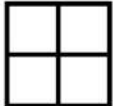

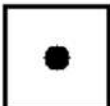

In the second and third dice, C and D are common. So, the remaining faces are opposite to each other.

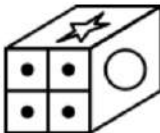

So, B is opposite to E.

Q:98 The correct answer is **Option 3** i.e.

DIAGRAM

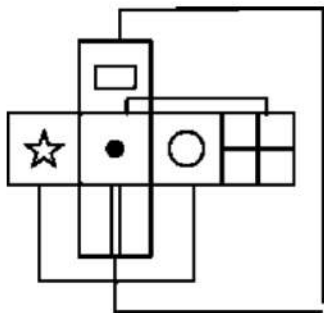

In option 3, the opposite pairs  and  are adjacent to each other. So, this cube cannot be formed.

Q:99 The correct answer is **Option 1** i.e. .

 is the opposite to 
 is the opposite to 
 is the opposite to 

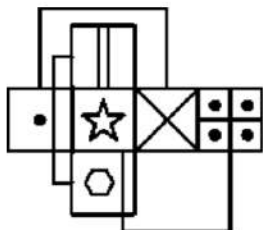

In option 1, the opposite pairs  and  are adjacent to each other. So, the cube in **option 1** cannot be formed.

Q:100 The correct answer is **option 4** i.e. .

To form a cube the opposite pairs should not be adjacent. In option (4) the opposite pair  is opposite to  are adjacent to each other. So, it can't be formed.

Q:101 The correct answer is **option 2** i.e. .

In option 2, the opposite pair  is opposite to  are adjacent to each other. So, it cannot be formed.

Q:102 The correct answer is **option 1** i.e. **I**.

The letter H is common in both dice so, we will write the letters in the clockwise direction from H.

Dice 1: H → G → I

Dice 2: H → L → K

So, the letter on the opposite surface of the letter K is 'I'.

Q:103 The correct answer is **option 4** i.e. **J**.

The letter I is common in both dice so, we will write the letters in the clockwise direction from I.

Dice 1: I → G → J

Dice 2: I → L → H

Thus, J is the opposite letter of H.

Q:104 The correct answer is **option 2** i.e. **A**.

The letter J is common in both dice so, we will write the letters in the clockwise direction from J.

Dice 1: J → K → C

Dice 2: J → L → B

Thus, A will be opposite to letter J.

Q:105 The correct answer is **option 1** i.e. **L**.

The letter J is common in both dice so, we will write the letters in the clockwise direction from J.

Dice 1: J → G → I

Dice 2: J → L → K

Thus, letter 'L' is printed on the opposite side of G.

Q:106 The correct answer is **option 1** i.e. **N**.

The letter P is common in both dice so, we will write the letters in the clockwise direction from P.

Dice 1: P → O → Q

Dice 2: P → N → M

Thus, when the letter 'O' is printed on the top, then letter 'N' will be printed at the bottom.

Q:107 The correct answer is **option 2** i.e. **G**.

The letter H is common in both dice so, we will write the letters in the clockwise direction from H.

Dice 1: H → G → I

Dice 2: H → L → K

So, the letter L is the opposite of G.

Q:108 The correct answer is **option 2** i.e. **A**.

The letter C is common in both dice so, we will write the letters in the clockwise direction from C.

Dice 1: C → J → A

Dice 2: C → B → K

So, the letter K is the opposite of A.

Q:109 The correct answer is **option 1** i.e. **G**.

The letter L is common in both dice so, we will write the letters in the clockwise direction from L.

Dice 1: L → J → H

Dice 2: L → I → K

Thus, G is the opposite letter of L.

Q:110 The correct answer is **option 1** i.e. **O**.

The letter N is common in both dice so, we will write the letters in the clockwise direction from N.

Dice 1: $N \rightarrow O \rightarrow R$

Dice 2: $N \rightarrow Q \rightarrow P$

So, letter O is printed on the face opposite to letter Q.

Q:111 The correct answer is **option 1** i.e. **E**.

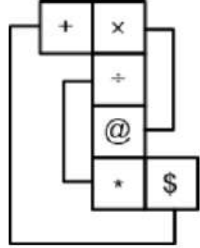

The letter B is common in both dice so, we will write the letters in the clockwise direction of B.

Dice 1: $B \rightarrow G \rightarrow C$

Dice 2: $B \rightarrow F \rightarrow E$

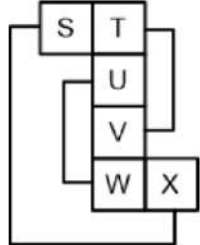

So, the letter **E** is the opposite of C.

Q:112 The correct answer is **Option 3** i.e. **+**.

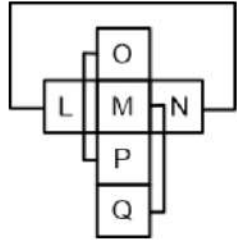

+ will be opposite to **\$**.

Q:113 The correct answer is **Option 2** i.e. **W**.

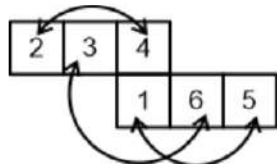

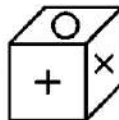

So, **W** is opposite to **U**.

Q:114 The correct answer is **Option 3** i.e. **Q**.

So, **Q** is opposite to **M**.

Q:115 The correct answer is **Option 1** i.e.

So, the figure in Option 1 can form the dice as no opposite sides are adjacent in this figure.
