186. (1)	187. (4)	188. (2)	189. (4)	190. (4)
191. (3)	192. (2)	193. (1)	194. (1)	195. (4)
196. (3)	197. (4)	198. (3)	199. (4)	200. (3)

Answers and Solutions

Q:1 The correct answer is **option 4** i.e. **Only Conclusion (I) follows.**

The least possible Venn Diagram is shown below:

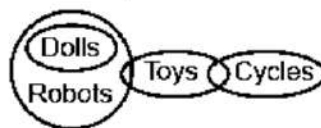

Conclusion:

(I) Some jackals are cows: **Follows** (The part of Jackals that is horse is also Cows because some cows are horses)

(II) Some horses are sheep: **Doesn't follow** (It is possible but not definite)

Q:2 The correct answer is **option 1** i.e. **Neither conclusion (I) nor (II) is true.**

The least possible venn diagram is:

Conclusions:

(I) Some toys are dolls: **False** (It is possible but not definite as no direct relation given between them.)

(II) No cycle is a robot: **False** (It is possible but not definite as no direct relation given between them.)

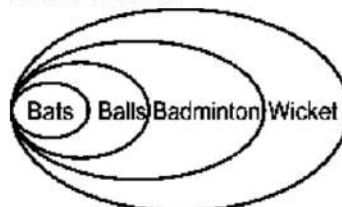

Q:3 The correct answer is **option 4** i.e. **Only conclusion I follows.**

Conclusion I. Some deserts are not mountains- **Follows.**

Conclusion II: Some sandy places are mountains- **Does not follow.**

Q:4 The correct answer is **option 4** i.e. **Both conclusions I and II follow.**

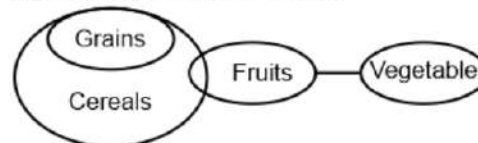

Conclusion:

I. All bats are wickets - **Follows** (As all bats are balls, all balls are badminton. All badminton are wickets so, all bats are wickets)

II. Some badminton are bats - **Follows** (As all bats are balls, all balls are badminton. So, some badminton are bats)

Q:5 The correct answer is **option 2** i.e. **Neither Conclusion I nor II follow.**

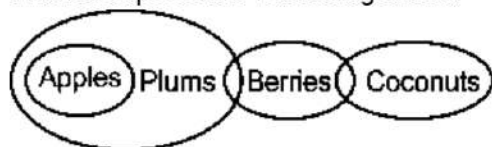

Conclusions:

I. All cereals can be vegetables. - **Does not follow** (because No fruits are vegetable and Some cereals are fruits)

II. All grains are fruits. - **Does not follow** (because there is no direct relation between grains and fruits)

Q:6 The correct answer is **option 4** i.e. **Both conclusions 1 and 3 follow.**

The least possible venn diagram is:

Conclusion:

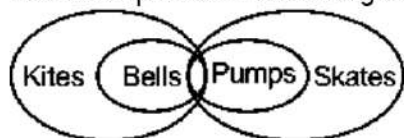

1. Some berries are plums - **Follows** (As some plums are berries so, definitely some berries are plums)

2. All plums are apples - **Does not follow** (As all apples are plums so, it is not definite that all plums are apples)

3. Some coconuts are berries - **Follows** (As Some berries are coconuts so, definitely some coconuts are berries)

Q:7 The correct answer is **option 3** i.e. **All conclusions 1, 2 and 3 follow.**

The least possible venn diagram is:

Conclusion:

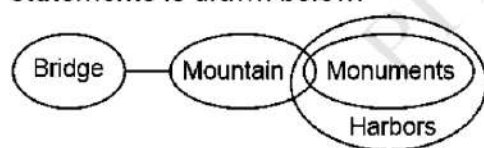

1. Some kites are skates - **Follows**. (As all bells are kites, some bells are pumps and all pumps are skates so definitely some kites are skates)

2. Some skates are bells - **Follows**. (As some bells are pumps and all pumps are skates so this means some skates are bells)

3. Some skates are pumps - **Follows**. (As some bells are pumps and all pumps are skates so definitely some skates are pumps)

Q:8 The correct answer is **option 4** i.e. **Only conclusion I follows.**

The least possible Venn Diagram for the given statements is drawn below:

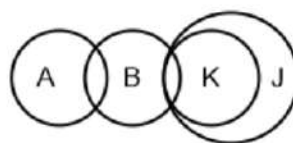

Conclusions:

I. Some harbors are mountains → **True** (As some mountains are monuments, and, all monuments are harbors, so, some harbors are mountains is true.)

II. No bridge is a monument → **False** (It is possible, but no definite conclusion can be drawn.)

Hence, the correct answer is **option 4**.

Q:9 The correct answer is **option 1** i.e. **Only conclusion I follows.**

Conclusion:

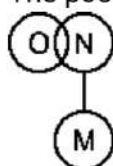

I: Some B are J - **Follows** (As given in the statement some B are K and all K are J then the part of B which is K is also J.)

II: Some A are J - **Does not follow** (It is possible but not definite.)

Hence, the correct answer is **Only conclusion I follows.**

Q:10 The correct answer is **option 1** i.e. **Only conclusion II follows.**

The possible diagram from the above statements-

Conclusions:

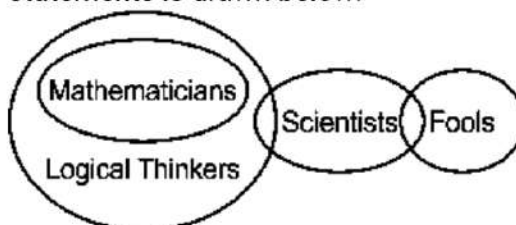

I. All O are M - **Does not follow**. (It is possible but not definite)

II. No N is M - **Follows**. (As it is given in statement No M are N so, No N is M is true)

Hence, the correct answer is **Only conclusion II follows.**

Q:11 The correct answer is **option 1** i.e. **Neither conclusion I nor II follows.**

The least possible Venn Diagram for the given statements is drawn below:

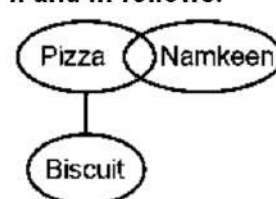

Conclusions:

I. Some scientists are not fools → **False** (It is possible, but no definite conclusion can be drawn.)

II. Some logical thinkers are not scientists → **False** (It is possible, but no definite conclusion can be drawn.)

Hence, the correct answer is **Neither conclusion I nor II follows.**

Q:12 The correct answer is **option 2** i.e. **Both conclusions II and III follows.**

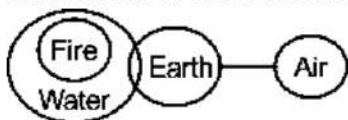

Conclusion:

1. No biscuit is namkeen - **Does not follow.** (As there is no definite relation between biscuit and namkeen. so, it does not follow)
2. No biscuit is pizza - **Follows.** (As no pizza is biscuit so definitely no biscuit is pizza)
3. Some pizza are not biscuit - **Follows.** (As no pizza is biscuit so, its definite that some pizza are not biscuit.)

Q:13 The correct answer is **option 3** i.e. **Neither conclusion (I) nor (II) follows.**

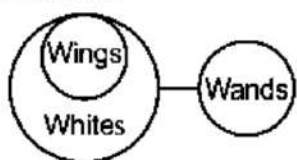

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

- I. Some fire is earth → **False** (It is possible, but no definite conclusion can be drawn.)
- II. Some fire is air → **False** (It is possible, but no definite conclusion can be drawn.)

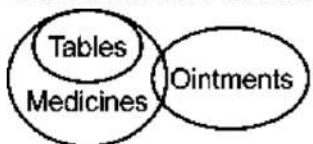

Q:14 The correct answer is **option 1** i.e. **Only conclusion II follows.**

Conclusions:

- I. Some wings are wands - **Does not follow.**
- II. No wand is a white - **Follows.**

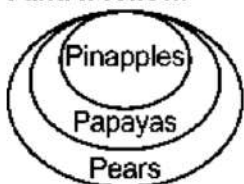

Q:15 The correct answer is **option 1** i.e. **Neither conclusion I nor II follows.**

Conclusions:

- I. Some tablets are ointments - **Does not follow** (As All tablets are medicines and some medicines are ointments)
- II. All ointments are medicines - **Does not follow** (As All tablets are medicines and some medicines are ointments)

Q:16 The correct answer is **option 4** i.e. **Both conclusions I and II follow.**

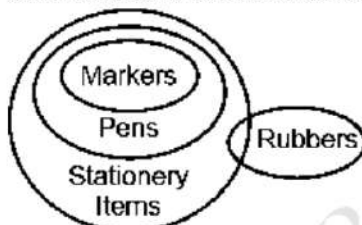

Conclusion:

- I. All pineapples are pears - **Follows** (As All pineapples are papayas and All papayas are pears, so all pineapples are pears is true)
- II. Some pears are pineapples - **Follows** ((As All pineapples are papayas and All papayas are pears, so some pears are pineapples is true)

Q:17 The correct answer is **option 1** i.e. **Neither conclusion I nor II follows.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

- I. Some stationery items are not rubbers → **False** (It is possible, but no definite conclusion can be drawn.)
- II. Some markers are not stationary items → **False** (It is possible, but no definite conclusion can be drawn.)

Hence, **Neither conclusion I nor II follows.**

Q:18 The correct answer is **option 2** i.e. **Neither Conclusion I nor II follows.**

The least possible Venn diagram is shown below:

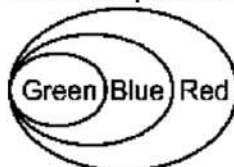

Conclusions:

- I. All games are matches - **Does not follow.** (It is possible but not definite, as no direct relationship between the two is given).
- II. No game is a tournament - **Does not follow.** (As all games are tournaments, no game is a tournament, which is not true.)

Q:19 The correct answer is **option 2** i.e. **None of the conclusions follow.**

The least possible Venn diagram is shown below:

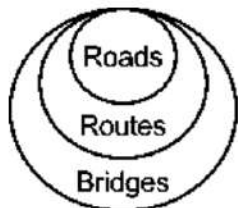

Conclusions:

- I. No red is a blue - **Does not follow.** (As All blues are reds so, No red is a blue is not true.)
- II. No blue is a green - **Does not follow.** (As All greens are blues so, No blue is a green is not true.)

III. No green is a red - **Does not follow.** (As All blues are reds and All greens are blues so, No green is a red is not true.)

Q:20 The correct answer is **option 3** i.e. **Both conclusions I and II follow.**

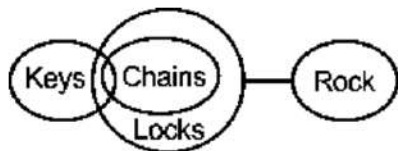

Conclusion:

I. Some routes are roads - **Follows.** (As all roads are routes so, Some routes are roads is definitely true.)

II. All roads are bridges - **Follows.** (As all roads are routes and all routes are bridges so, all roads are bridges is definitely true.)

Q:21 The correct answer is **option 3** i.e. **Only conclusion II follows.**

The least possible Venn Diagram for the given statements is drawn below:

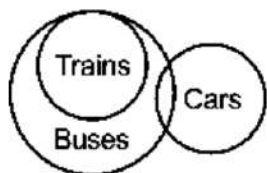

Conclusions:

I. No rock is a key → **False** (It is possible, but no definite conclusion can be drawn.)

II. At least some keys are locks → **True** (As some keys are chains and all chains are locks, so, at least some keys are locks is also true.)

Hence, **Only conclusion II follows** is the correct answer.

Q:22 The correct answer is **option 2** i.e. **Only conclusion II follows.**

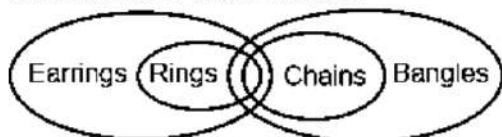

Conclusions:

I. All cars are buses - **Does not follow** (As Some buses are cars so some cars can be buses but all cars cannot be buses)

II. Some buses are trains - **Follows** (As All trains are buses so some buses are trains is true)

Q:23 The correct answer is **option 2** i.e. **All conclusions I, II, and III follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

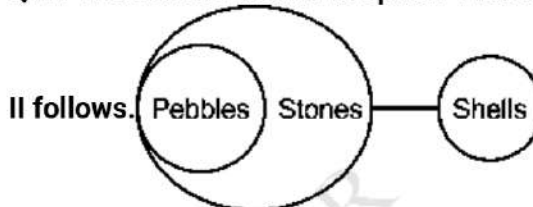

I. Some rings are bangles → **True** (As some rings are chains, and all chains are bangles, so, some rings are bangles is also true.)

II. Some earrings are bangles → **True** (As all rings are earrings, some rings are chains, and all chains are bangles, so, some earrings are bangles is also true.)

III. Some chains are earrings → **True** (As all rings are earrings, some rings are chains, and all chains are bangles, so, some chains are earrings is also true.)

Hence, **All conclusions I, II, and III follow.**

Q:24 The correct answer is **option 4** i.e. **Only conclusion II follows.**

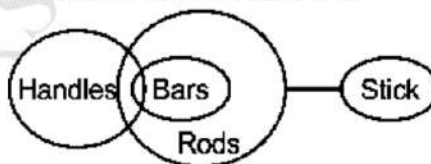

Conclusions:

I. Some pebbles are shells - **Does not follow** (As All pebbles are stones and No stones are shells.)

II. No shells are stones - **Follows** (As No stones are shells so No shells are stones is also true)

Q:25 The correct answer is **option 3** i.e. **Both conclusions I and II follow.**

The least possible Venn Diagram for the given statements is drawn below:

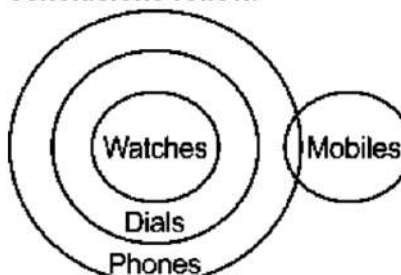

Conclusions:

I. Some handles are rods → **True** (As some handles are bars, and all bars are rods, so, some handles are rods is also true.)

II. No bar is a stick → **True** (As all bars are rods, and no rod is a stick, so, no bar is a stick is also true.)

Hence, **Both conclusions I and II follow.**

Q:26 The correct answer is **option 1** i.e. **None of the conclusions follow.**

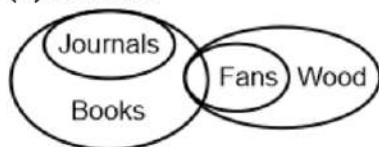

Conclusions:

I. No watch is a phone → **False** (Since, All watches are dials and All dials are phones. So, No watch is a phone is definitely false)

II. Some dials are mobiles → **False** (It is possible, but no definite conclusion can be drawn.)

Q:27 The correct answer is **option 3** i.e. **Only conclusion (II) follows.**

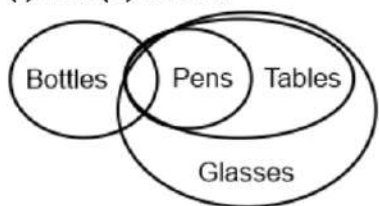

Conclusion:

(I) Some journals are wood - **Does not follow.**

(II) Some fans are books - **Follows.**

Q:28 The correct answer is **option 3** i.e. **Both conclusions (I) and (II) follow.**

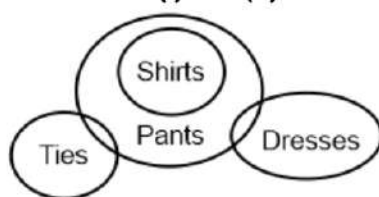

Conclusion:

(I) Some glasses are bottles - **Follows.**

(II) Some pens are glasses - **Follows.**

Q:29 The correct answer is **option 4** i.e. **Neither conclusion (I) nor (II) follows.**

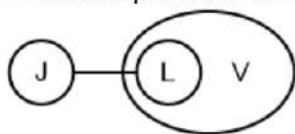

Conclusion:

(I) Some dresses are ties - **Does not follow.**

(II) Some ties are shirts - **Does not follow.**

Q:30 The correct answer is **option 1** i.e. **Neither conclusion follows.**

The least possible Venn Diagram is

Conclusions:

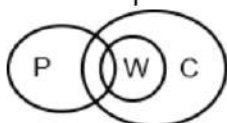

I. All V are L. → **Doesn't follow** (All V are L is a possibility but not definite.)

II. All J are V. → **Doesn't follow** (All L are V and No L is J, so, all J can never be V.)

Hence, the correct answer is **Neither conclusion follows.**

Q:31 The correct answer is **option 2** i.e. **Both conclusion I and III follows.**

The least possible venn diagram is,

Conclusion:

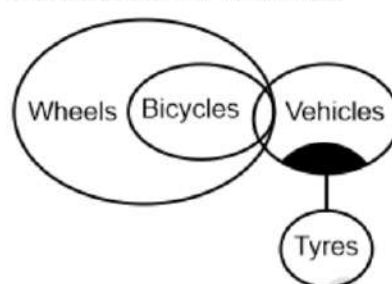

I. Some C are P → **Follows** (All W are C and some P are W implies that some C are definitely P).

II. No P is C → **Does not Follow** (As, all W are C and some P are W which means that some P are definitely C).

III. Some C are W → **Follows** (As, all W are C so definitely some C are W).

Hence, the correct answer is **Both conclusion I and III follows.**

Q:32 The correct answer is **option 2** i.e. **Neither conclusion I nor II follows**

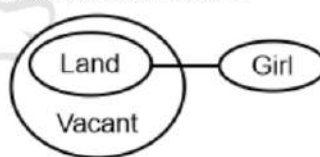

Conclusion I: Some bicycles are tyres: **Doesn't follow** (It is possible but not definite as there is no relation between the elements)

Conclusion II: Some wheels are not vehicles: **Doesn't follow** (It is possible but not definite as there is no negative relation between the elements)

Hence, the correct answer is **Neither conclusion I nor II follows.**

Q:33 The correct answer is **option 2** i.e. **Neither conclusion follows**

Conclusions:

I. All vacant are land: **Doesn't follow** (It is possible but not definite)

II. All girls are vacant: **Doesn't follow** (It is possible but not definite)

Q:34 The correct answer is **option 4** i.e. **Only conclusion I follows.**

The least possible Venn diagram is as follows:

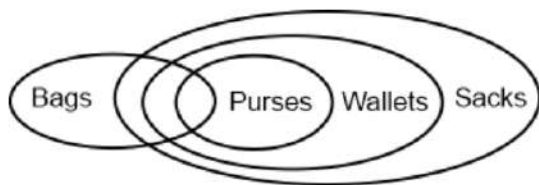

Conclusions:

I. No white is road. - **Follows** (Because No road is white.)

II. No road is table. - **Does not follow** (Because there is no direct relation between road and table so it can be possible but not definite)

III. No white is table. - **Does not follow** (Because Some table are white. So Some white can be table it is definite)

Q:35 The correct answer is **option 1** i.e. **Both conclusions (I) and (II) are follow.**

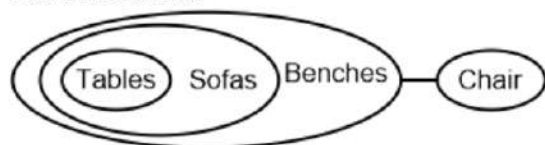

Conclusions:

I. All purses are sacks: **Follows** (All purses are wallets and all wallets are sacks. So, all purses are sack)

II. Some wallets are bags: **Follows** (Some bags are purses and all purses are wallets. So, some wallets are bags)

Q:36 The correct answer is **option 4** i.e. **Only conclusions I and III follow.**

Conclusions:

I. No table is a chair: **Follows** (All tables are sofas, all sofas are benches and no bench is chair so, no table is chair)

II. Some sofas are chairs: **Doesn't follow** (All sofas are benches and no bench is chair so, no sofa is chair)

III. All tables are benches: **Follows** (All tables are sofas, and all sofas are benches so, all tables are benches)

Q:37 The correct answer is **option 2** i.e. **Only conclusion II follows.**

The least possible Venn diagram is:

Conclusions:

I. Some lawyers are teachers → **Does not follow** (As, Some lawyers are not teachers. So, it is possible but not definite.)

II. Some engineers are lawyers → **Follow** (As, Some engineers are doctors and all doctors are lawyers. So, some part of engineers is common with doctors which whole comes in lawyers, therefore it is definitely true.)

Thus, Only conclusion II follows.

Q:38 The correct answer is **option 2** i.e. **Only conclusion I follows from the statements.**

The least possible Venn diagram is as follows:

Conclusions:

I. Some B are not A. - **Follows** (because No A is B. So, Some B are not A too)

II. Some P are not A. - **Does not follow** (because we don't have enough information to establish a direct relationship between P and A.)

Q:39 The correct answer is **option 1** i.e. **Neither conclusion follows.**

The least possible Venn diagram is:

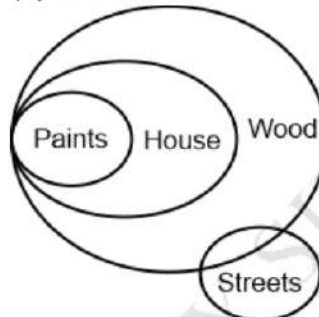

Conclusions:

I. Some rats are not red → **Does not follow** (As no direct relation is given between red and rat is given, so it does not follow.)

II. Some red are black → **Does not follow** (As no red is black, so it is not possible that some red are black.)

Q:40 The correct answer is **option 2** i.e. **Only conclusion (II) follows.**

Conclusion:

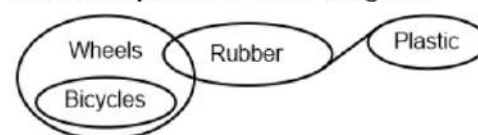

I. Some streets are houses - **Does not follow.** (All houses are wood and some wood is street. So, some streets are house is possible but not definitely followed.)

II. All paints are wood. - **Follows.** (All paints are houses and all houses are wood. So, All paints are wood is definitely follows.)

Hence, the correct answer is **Only conclusion (II) follows.**

Q:41 The correct answer is **option 1** i.e. **Only conclusion I follows.**

The least possible Venn diagram:

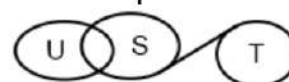

Conclusion I : Some wheels are bicycles. - **Follows** (because All bicycles are wheels. So, Some wheels are bicycles also)

Conclusion II : Some wheels are plastics. - **Does not follow** (because there is no direct relation between wheels and plastics. So, it can be possible but not definite)

Q:42 The correct answer is **option 2** i.e. **Only conclusion I follows.**

The least possible Venn diagram is as follows:

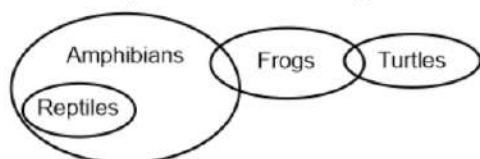

Conclusions:

I. Some U are not T. - **Follows** (because No S is T and Some U are S. So, Some U are not T)

II All T are U. - **Does not follow** (because there is no direct relation between U and T. So, it can be possible but not definite)

Q:43 The correct answer is **option 2** i.e. **Neither conclusion I nor II follows.**

The least possible Venn diagram is as follows:

Conclusion I: Some amphibians are not reptiles. - **Does not follow** (because All reptiles are amphibians given. So, Some amphibians are not reptiles it is not possible)

Conclusion II: Some turtles are amphibians. - **Does not follow** (because there is no direct relation between turtles and amphibians so it can be possible but not definite)

Q:44 The correct answer is **option 2** i.e. **Neither conclusion I nor II follows.**

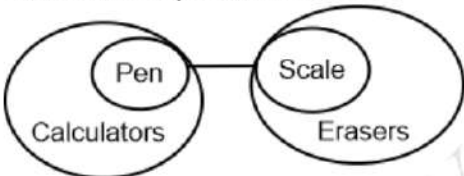

The least possible Venn diagram is as follows:

Conclusion I: No land is forest. - **Does not follow** (because there is no direct relation between them. So, it can be possible but not definite)

Conclusion II: Some air are water. - **Does not follow** (because there is no direct relation between them. So, it can be possible but not definite)

Q:45 The correct answer is **option 2** i.e. **Neither conclusions I, II nor III follows.**

Conclusions:

I. Some erasers are calculators - **Does not follow**

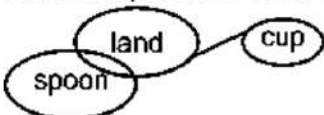

(because there is no direct relation between erasers and calculators so it can be possible but not definite)

II. No pen is an eraser - **Does not follow** (because there is no direct relation between erasers and pen so it can be possible but not definite)

III. No scale is a calculator - **Does not follow** (because there is no direct relation between scale and calculator so it can be possible but not definite)

Q:46 The correct answer is **option 4** i.e. **Only conclusion III follows.**

The least possible Venn diagram is as follows:

Conclusions:

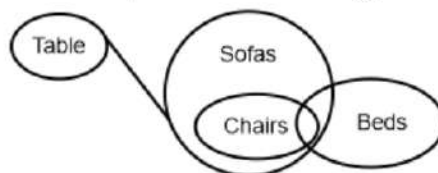

I. All cup are land. - **Does not follow** (because No land is cup. So it can be possible but not definite)

II. All cup are spoon. - **Does not follow** (because there is no direct relation between cup and spoon. So it can be possible but not definite)

III. Some cup are not land. - **Follows** (because No land is cup. So, Some cup are not land too)

Q:47 The correct answer is **option 3** i.e. **Both conclusions II and III follow.**

The least possible Venn diagram:

Conclusions:

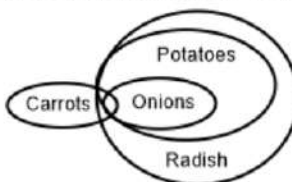

I. Some tables are beds. - **Does not follow** (because there is no direct relation between tables and beds. So it can be possible but not definite)

II. No table is a chair. - **Follows** (because All chairs are sofas and No sofa is a table. So, No table is a chair too)

III. Some sofas are beds. - **Follows** (because All chairs are sofas and Some chairs are beds. So, Some sofas are beds too)

Q:48 The correct answer is **option 3** i.e. **Both conclusions I and II follow.**

The least possible Venn diagram is as follows:

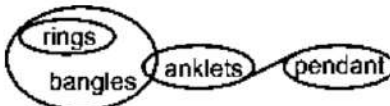

Conclusions:

I. Some carrots are radish. - **Follows** (because Some carrots are onions, All onions are potatoes and All potatoes are radish. So, Some carrots are radish too)

II. All onions are radish. - **Follows** (because All onions are potatoes and All potatoes are radish. So, All onions are radish too)

III. No carrot is a potato. - **Does not follow** (because Some carrots are onions, All onions are potatoes. So, it cannot be possible.)

Q:49 The correct answer is **option 2** i.e. **Both conclusions I and II follow.**

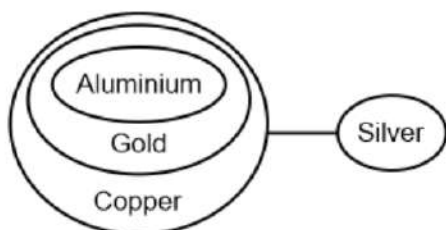

Conclusions:

I. All rings being anklets is a possibility → **Follows** (As all rings are bangles and some bangles are anklets. As whole rings comes in bangles which have some common part with anklets, therefore rings beings can be a possibility.)

II. All bangles can never be pendants → **Follows** (As some bangles are anklets and no anklet is a pendant. As some part of bangles is common with anklets which can not be pendant, therefore all bangles can not be pendants is true)

Q:50 The correct answer is **option 4** i.e. **Both conclusions I and III follow.**

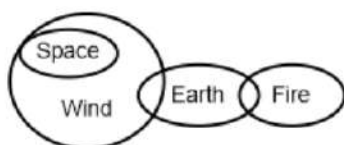

Conclusions:

I. No aluminium is silver. - **Follows** (because All aluminium is gold, All gold is copper and No copper is silver. So, No aluminium is silver too)

II. Some gold is silvers - **Does not follow** (because All gold is copper and No copper is silver. So, Some gold cannot be silvers)

III. All aluminium is copper. - **Follows** (because All aluminium is gold, All gold is copper. So, All aluminium is copper too)

Q:51 The correct answer is **option 1** i.e. **Neither conclusion (I) nor (II) follows**

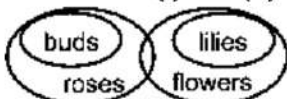

Conclusion:

(I): All earth is space. - **Does not follow** (because there is no relation between earth and space so it can be possible but not definite)

(II): Some wind is fire. - **Does not follow** (because there is no relation between wind and fire so it can be possible but not definite)

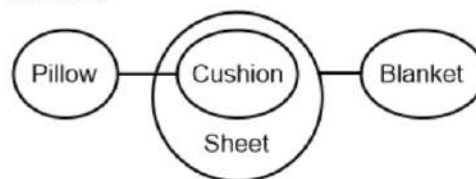

Q:52 The correct answer is **option 4** i.e. **Neither conclusion (I) nor (II) follows.**

Conclusion (I): Some buds are lilies. - **Does not follow** (because there is no relation between buds and lilies. So, it can be possible but not definite)

Conclusion (II): All flowers are buds. - **Does not follow** (because there is no relation between buds and flowers. So, it can be possible but not definite)

Q:53 The correct answer is **option 1** i.e. **Only conclusion I follows.**

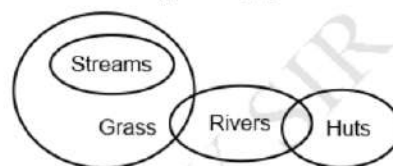

Conclusions:

(I) No cushion is a blanket. - **Follows** (because All cushions are sheets and No sheet is a blanket. So, No cushion is a blanket is true.)

(II) Some pillows are sheets. - **Does not follow** (it is possible but not definite)

Q:54 The correct answer is **option 3** i.e. **Neither conclusion (I) nor (II) follows.**

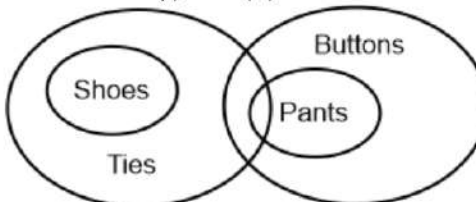

Conclusions:

(I): All grass are streams. - **Does not follow** (It is possible but not definite)

(II): Some grass are huts. - **Does not follow** (It is possible but not definite because there is no relation between grass and huts.)

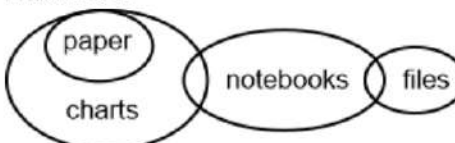

Q:55 The correct answer is **option 3** i.e. **Neither conclusion (I) nor (II) follows.**

Conclusion (I): Some buttons are shoes. - **Does not follow** (because there is no direct relation between buttons and shoes)

Conclusion (II): No ties are buttons. - **Does not follow** (because there is no direct relation between ties and buttons)

Q:56 The correct answer is **option 1** i.e. **Only conclusion II follows.**

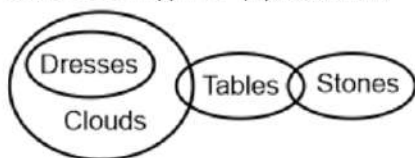

Conclusions:

(I) Some charts are files. - **Does not follow** (because there is no direct relation between charts and files)

(II) All papers being notebooks is a possibility. - **Follows** (because there is no direct relation between papers and notebooks. So it can be possible)

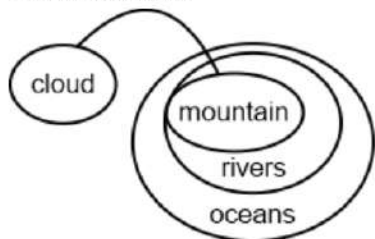

Q:57 The correct answer is **option 1** i.e. **Neither conclusion (I) nor (II) follows.**

Conclusion (I): All stones are dresses. - **Does not follow** (because there is no direct relation between stones and dresses.)

Conclusion (II): Some dresses are tables. - **Does not follow** (because there is no direct relation between tables and dresses.)

Q:58 The correct answer is **option 4** i.e. **Both conclusions I and II follow.**

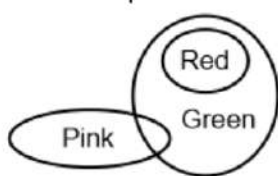

Conclusions:

(I) All rivers can never be clouds. - **Follows** (As All mountains are rivers and no cloud is a mountain so, the part of mountain which is rivers can never be clouds.)

(II) All mountains are oceans. - **Follows** (because All mountains are rivers and all rivers are oceans. So, All mountains are oceans too)

Q:59 The correct answer is **option 4** i.e. **Only conclusion III follows.**

The least possible Venn diagram is as follows:

Conclusions:

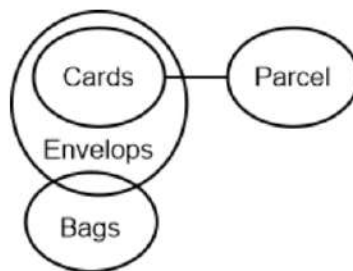

I. Some pink are not red. - **Does not follow** (because there is no direct relation between pink and red. So, it can be possible but not definite)

II. All green are red. - **Does not follow** (because All red are green so some green can be red but all green cannot be red)

III. Some green are red. - **Follows** (because All red are green so some green are also red)

Q:60 The correct answer is **option 1** i.e. **Only I follows.**

The least possible Venn diagram is as follows:

Conclusions:

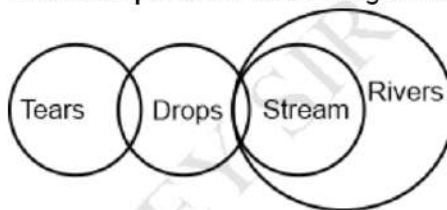

1. **Follows** (Some envelopes that are part of cards can never be parcel)

2. **Doesn't follow** (It is possible but not definite)

3. **Doesn't follow** (It is possible but not definite)

Q:61 The correct answer is **option 4** i.e. **Both II and III conclusion follow.**

The least possible Venn Diagram is as follows:

Conclusions:

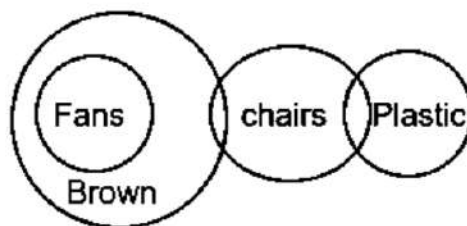

I. **Doesn't follow** (All tears can be rivers in a possible so it is false that all tears can never be rivers.)

II. **Follows** (Some drops are streams and all streams are rivers so, some drops are rivers is true)

III. **Follows** (All tears being stream is a possibility is true as there is no negative relation between the elements)

Q:62 The correct answer is **option 3** i.e. **Only conclusions I and II follow.**

The least possible Venn diagram is as follows:

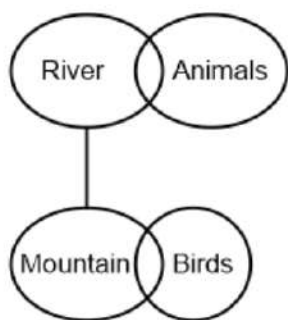

I. **Follows** (As all fans are brown so, some browns are definitely fans)

II. **Follows** (As all browns are chairs so, some chairs are definitely brown)

III. **Doesn't follow** (As some chairs are plastics is given in the statement)

Q:63 The correct answer is **option 2** i.e. **Neither conclusion (I) nor (II) follows.**

The least possible Venn diagram is as follows:

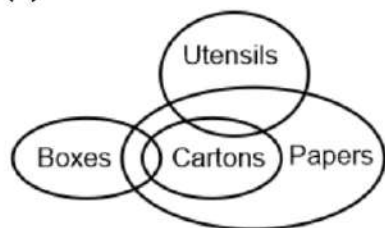

Conclusions:

I: **Doesn't follow** (It is possible but not definite)

II: **Doesn't follow** (It is possible but not definite)

Q:64 The correct answer is **option 3** i.e. **Only conclusion (II) follows.**

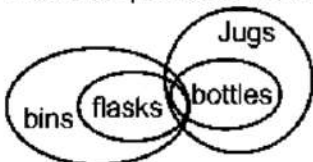

Conclusions:

I: No box is a utensil. → **Does not follow** (It is possible but not definite as there is no direct relation between the elements.)

II: Some papers are utensils. → **Follows** (As some cartons are utensils and all cartons are papers, so, some papers are utensils is possible.)

Q:65 The correct answer is **option 1** i.e. **All conclusions I, II and III follow.**

The least possible Venn diagram is as follows:

Conclusions:

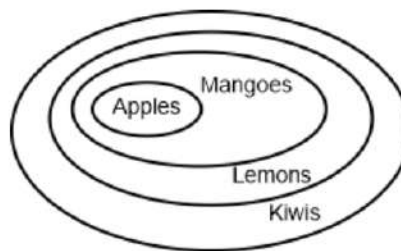

I. Some bottles are bins. - **Follows** (Because, Some bottles are flasks and All flasks are bins)

II. Some jugs are bins. - **Follows** (Because, All bottles are jugs, Some bottles are flasks and All flasks are bins, so Some jugs are also bins)

III. Some flasks are jugs. - **Follows** (Because, All bottles are jugs, Some bottles are flasks and All flasks are bins, so Some flasks are also jugs)

Q:66 The correct answer is **option 4** i.e. **Both conclusions I and II follow.**

The least possible Venn diagram is as follows:

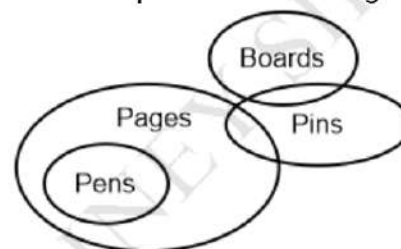

Conclusions:

(I) All apples are lemons. - **Follows** (Because All apples are mangoes and All mangoes are lemons, so, All apples are also lemons)

(II) All mangoes are kiwis. - **Follows** (Because All apples are mangoes and All mangoes are lemons, and All lemons are kiwis, so, All mangoes are also kiwis)

Q:67 The correct answer is **option 2** i.e. **None of the conclusions follow.**

The least possible Venn diagram is as follows:

Conclusions:

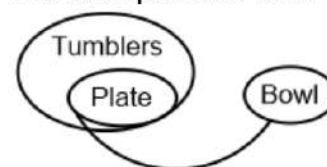

(I) Some pins are pens. - **Does not follow** (Because there is no direct relation given between pins and pens)

(II) Some boards are pages. - **Does not follow** (Because there is no direct relation given between boards and pages)

(III) Some pens are boards. - **Does not follow** (Because there is no direct relation given between boards and pens)

Q:68 The correct answer is **option 4** i.e. **Neither conclusion I nor II follows.**

The least possible Venn diagram is as follows:

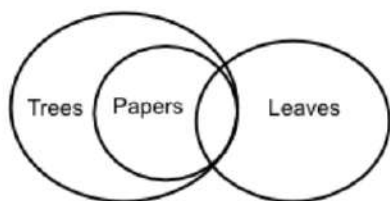

Conclusions:

I. No tumbler is a plate. - **Does not follow** (Because All plates are tumblers so some tumblers can be place only)

II. Some tumblers are bowls. - **Does not follow** (Because there is no direct relation given between tumblers and bowls so it can be possible only)

Q:69 The correct answer is **option 2** i.e. **Both conclusions I and II follow**

The least possible Venn diagram is shown below:

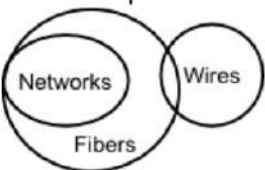

Conclusions:

- I. Some trees are leaves: **Follows** (Some trees that are papers are also leaves)
 II. Some trees are papers: **Follows** (All papers are trees so, some trees are definitely papers)

Q:70 The correct answer is **option 1** i.e. **Neither Conclusion I nor II follows.**

The least possible Venn diagram is shown below:

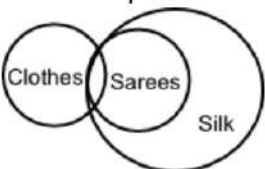

Conclusions:

- I. All networks can never be wires: **Follow** (There is no negative relation between the elements so, all networks can be wires)
 II. Some networks are wires: **Doesn't follow** (It is possible but not definite)

Q:71 The correct answer is **option 4** i.e. **Both conclusions I and II follow**

The least possible Venn Diagram is shown below:

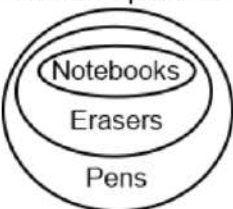

Conclusions:

- I. Some clothes are silks: **Follows** (As some clothes are sarees and all sarees are silk. So, the part of cloth that is saree is also silk)
 II. Some silks are sarees: **Follows** (As all sarees are silk so, some silk are definitely sarees)

Q:72 The correct answer is **option 4** i.e. **Both conclusions I and II follow**

The least possible diagram is shown below:

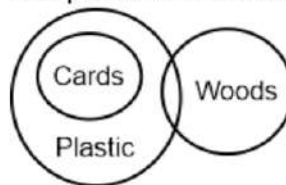

Conclusions:

- I. All notebooks are pens: **Follows** (As all notebooks are erasers and all erasers are pens. So, all notebooks are pens)

II. Some pens are notebooks: **Follows** (As all notebooks are erasers and all erasers are pens. So, some pens are definitely notebooks)

Q:73 The correct answer is **option 4** i.e. **Either conclusion I or II follows.**

The possible Venn diagram is as follows:

Conclusions:

- I. Some cards are woods → **Does not follow** → As, all cards are plastic and some some plastic are woods. So, some cards are woods is possible but not definitely followed.

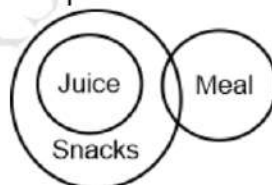

- II. No card is a wood → **Does not follow** → As, all cards are plastic and some some plastic are woods. So, no card is a wood is possible but not definitely followed.

There is a complimentary pair so Either conclusion I or II follows.

Hence, the correct answer is '**Either conclusion I or II follows**'.

Q:74 The correct answer is **option 4** i.e. **Neither Conclusion I nor II follows.**

The possible Venn diagram is as follows:

Conclusions:

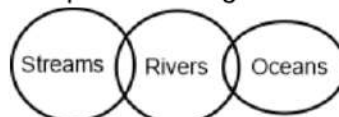

- I. All juices can never be meals → **Does not follow** → As, some snacks are meals and all juices are snacks. So all juices can never be meals is not definitely followed.

- II. All meals are snacks → **Does not follow** → As, some snacks are meals and all juices are snacks. So, all meals are snacks is possible but not definitely followed.

Hence, the correct answer is '**Neither Conclusion I nor II follows**'.

Q:75 The correct answer is **option 4** i.e. **Neither conclusion I nor II follows.**

The possible diagram is as follows:

Conclusions:

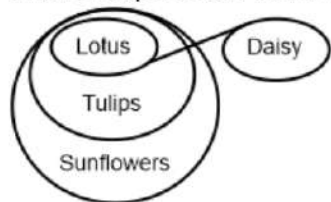

- I. Some streams are oceans → **Does not follow** → As, some streams are rivers and some rivers are oceans. So some streams are oceans is not definitely follow.

- II. All rivers are oceans → **Does not follow** → As, some streams are rivers and some rivers are oceans. So all rivers are oceans is not definitely follow.

Hence, the correct answer 'Neither conclusion I nor II follows'.

Q:76 The correct answer is **option 2** i.e. **Either conclusion II or III follows**.

The least possible Venn diagram is as follows:

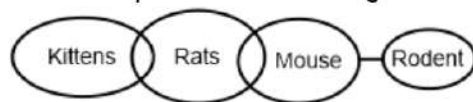

Conclusions:

- I. All daisies are tulips. - **Does not follow** (because there is no direct relation between daisies and tulips)
- II. Some sunflowers are daisies. - **Does not follow** (because All lotuses are tulips, All tulips are sunflowers and No lotus is a daisy. So it can be possible)
- III. No sunflower is a daisy. - **Does not follow** (because All lotuses are tulips, All tulips are sunflowers and No lotus is a daisy. So it can be possible)

So, Either conclusion II or III follows.

Q:77 The correct answer is **option 3** i.e. **Neither conclusion follows**.

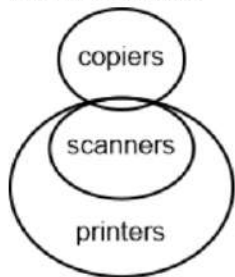

The least possible Venn Diagram is shown below:

Conclusions:

- I. No rodent is a kitten: **Does not follow** (It is possible but not definite)
- II. Some rats are rodents: **Does not follow** (It is possible but not definite)
- III. No kitten is a mouse: **Does not follow** (It is possible but not definite)

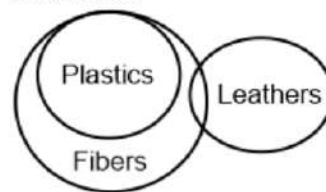

Q:78 The correct answer is **option 3** i.e. **Only conclusions I and III follow**.

Conclusions:

- I. Some printers are copiers - **Follows** - As all scanners are printers and some scanners are copiers. So, some printers are definitely copiers.
- II. No copier is a printer - **Does not follow** - As all scanners are printers and some scanners are copiers so some copiers are definitely printer.
- III. Some printers are scanners - **Follows** - As all scanners are printers. So, some printers are definitely scanners.

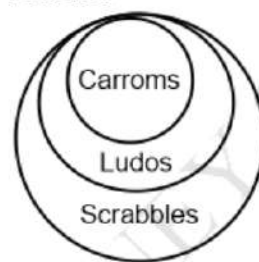

Q:79 The correct answer is **option 1** i.e. **Only conclusion II follows**.

Conclusions:

- I. Some plastics are leather - **Does not follow** (It is possible but not definite)
 - II. Some fibers are plastics - **Follows** (All plastics are fibres. So, some fibers are definitely plastics)
- Hence, the correct answer is **Only conclusion II follows**.

Q:80 The correct answer is **option 1** i.e. **Only conclusion I follows**.

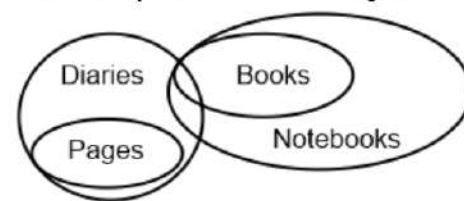

Conclusions:

- I. Some carroms are not scrabble - **Does not follow** - As all carroms are Ludos and all ludos are scrabble. So, All carroms will be scrabble.
- II. Some scrabbles are carroms - **Follows** - As all carroms are Ludos and all ludos are scrabble. So, some scrabble are definitely carroms.

Q:81 The correct answer is **option 3** i.e. **Only conclusion III follows**.

The least possible Venn diagram is as follows:

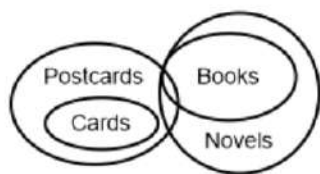

Conclusions:

- I. No page is a notebook. - **Does not follow** (Because there is no direct relation between page and notebook. So it can be possible)
- II. All pages are notebooks. - **Does not follow** (Because there is no direct relation between page and notebook. So it can be possible)
- III. All diaries being notebooks is a possibility. - **Follows** (Because Some diaries are books and All books are notebooks. So, All diaries being notebooks it is possible)

Q:82 The correct answer is **option 4** i.e. **Only conclusion I follows**.

The least possible Venn diagram:

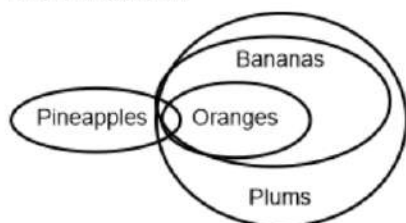

Conclusions:

I. Some postcards are novels. - **Follows** (because Some postcards are books and All books are novels. So, Some postcards are also novels)

II. No card is a book. - **Does not follow** (because there is no direct relation between card and book)

III. All cards are novels. - **Does not follow** (because there is no direct relation between card and novels)

Q:83 The correct answer is **option 2** i.e. **Only conclusions I and II follow.**

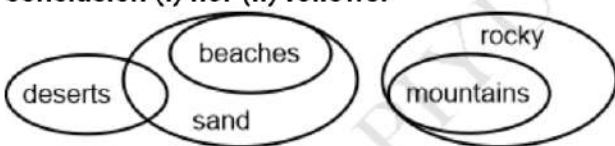

Conclusions:

I. Some pineapples are plums. - **Follows** (because Some pineapples are oranges, All oranges are bananas and All bananas are plums. So, Some pineapples are plums too)

II. All oranges are plums. - **Follows** (because All oranges are bananas and All bananas are plums. So, Some oranges are plums too)

III. No pineapple is a banana. - **Does not follow** (because Some pineapples are oranges, All oranges are bananas. So, it can be possible but not definite)

Q:84 The correct answer is **option 4** i.e. **Neither conclusion (I) nor (II) follows.**

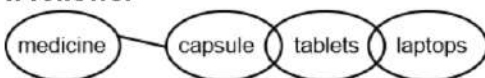

Conclusions:

(I) At least some beaches are desert. - **Does not follow** (because there is no direct relation between beaches and desert.)

(II) At least some sands are rocky. - **Does not follow** (because there is no relation between sands and rocky.)

Q:85 The correct answer is **option 3** i.e. **Only Conclusion II follows.**

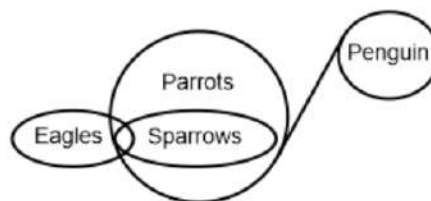

Conclusions:

I. Some capsules are laptops. - **Does not follow** (because there is no direct relation between capsules and laptops. So, it can be possible but not definite)

II. All tablets can never be medicines. - **Follows** (because some capsule are tablets and no medicine is capsule so, all tablets can never be medicines.)

Q:86 The correct answer is **option 1** i.e. **Both conclusions I and II follow.**

Conclusions:

(I) Some parrots are eagles. - **Follows** (because Some eagles are sparrows and All sparrows are parrots. So, Some parrots are also eagles)

(II) No penguin is a sparrow. - **Follows** (because No parrot is a penguin and All sparrows are parrots. So, No penguin is a sparrow too)

Q:87 The correct answer is **option 3** i.e. **Neither conclusion (I) nor (II) follows.**

A possible Venn diagram would be:

Conclusions:

(I) Some Chemicals are Plastic: **Doesn't follow** (It is possible but not definite as no direct relation between the two is given).

(II) No Toy is a Chemical: **Doesn't follow** (It is possible but not definite as no direct relation between the two is given)

Q:88 The correct answer is **option 2** i.e. **Neither conclusion (I) nor (II) follows.**

The least possible Venn Diagram for the given statements is shown below:

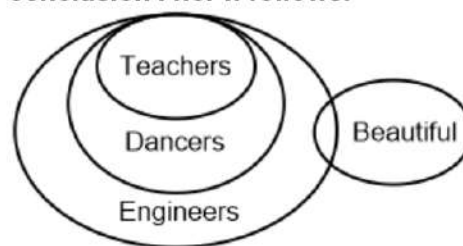

Conclusions:

(I) All vegetables are sour: **Doesn't follow** (It is possible but not definite)

(II) Some sour are green: **Doesn't follow** (It is possible but not definite as no direct relation between the two is given).

Q:89 The correct answer is **option 2** i.e. **Neither conclusion I nor II follows.**

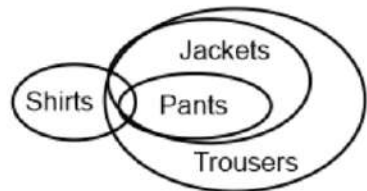

Conclusions:

I. All teachers are beautiful → **Does not follow** (There is no relation between teachers and beautiful)

II. Some dancers are beautiful → **Does not follow** (There is no relation between dancers and beautiful).

Q:90 The correct answer is **option 4** i.e. **Only conclusion I follows.**

Conclusions:

I. Some trousers are shirts. - **Follows** (because Some shirts are pants, All pants are jackets and All jackets are trousers. So, Some trousers are shirts too)

II. All jackets are shirts. - **Does not follow** (It can be possible but not definite)

Q:91 The correct answer is **option 2** i.e. **Only conclusion II follows.**

The least possible Venn diagram is as follows:

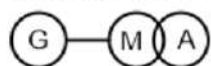

Conclusions:

I. No laptop is mobile. - **Does not follow** (because there is no direct relation between laptop and mobile so it can be possible but not definite)

II. Some laptops are not watch. - **Follows** (because No watch is a laptop given. So, Some laptops are not watch, is true)

Q:92 The correct answer is **option 2** i.e. **Only conclusion I follows.**

The possible Venn diagram is:

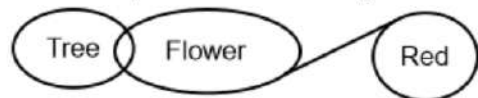

I. Some M are A: **Follows** (As it is given in the statement that some A is M. So, some M are A is definitely true.)

II. Some M are G: **Does not follow** (As it is given in the statement that no G are M so, some M are G is definitely false.)

Q:93 The correct answer is **option 1** i.e. **Only conclusion III follows.**

The least possible Venn diagram is as follows:

Conclusions:

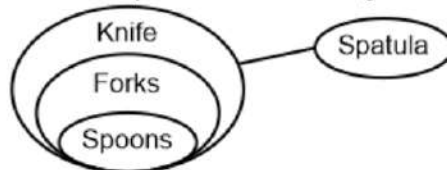

I. All tree are red. - **Does not follow** (because there is no direct relation between tree and red so it can be possible but not definite)

II. All red are flower. - **Does not follow** (As already given in statement no flower is red so no red is flower.)

III. Some tree are not red. - **Follows** (because Some tree are flower and No flower is red. So, Some tree are not red it is true)

Q:94 The correct answer is **option 1** i.e. **Only conclusions I and II follow.**

The least possible Venn diagram is as follows:

Conclusions:

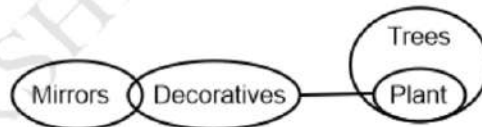

I. Some knives are spoons. - **Follows** (because All spoons are forks, and All forks are knives. So, Some knives are spoons also)

II. No fork is a spatula. - **Follows** (because All forks are knives and No knife is a spatula. So, No fork is a spatula it is true)

III. Some spoons are spatulas. **Does not follow** (because All spoons are forks, All forks are knives and No knife is a spatula. So, No spoon is a spatula)

Q:95 The correct answer is **option 4** i.e. **Neither conclusion (I) nor (II) follows.**

The least possible Venn diagram is as follows:

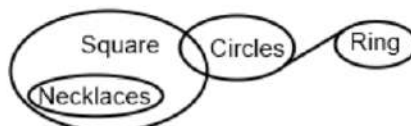

Conclusions:

(I) Some Mirrors are Plants. - **Does not follow** (because there is no direct relation between mirror and plants so it can be possible but not definite)

(II) Some Decoratives are Trees. - **Does not follow** (because there is no direct relation between Decoratives are Trees so it can be possible but not definite)

Q:96 The correct answer is **option 1** i.e. **Only conclusions II and III follow.**

Conclusions:

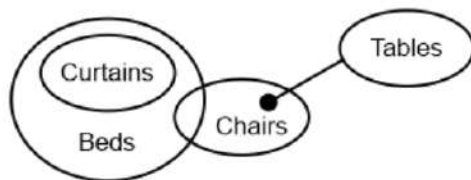

I. No square is a ring. - **Does not follow** (because there is no direct relation between square and ring)

II. No ring is a circle. - **Follows** (because No circle is a ring. So, No ring is also a circle)

III. Some squares are necklaces. - **Follows** (because All necklaces are squares. So, Some squares are necklaces too)

Q:97 The correct answer is **option 3** i.e. **Only conclusion II follows.**

The least possible Venn diagram is as follows:

Conclusion I: Some chairs are tables. - **Does not follow** (because Some chairs are not tables. So, it can be possible but not definite)

Conclusion II: Some chairs being curtains is possible. - **Follows** (because there is no direct relation between curtains and chairs. So, it is true)

Q:98 The correct answer is **option 3** i.e. **Neither conclusion follows**.

The least possible Venn diagram is as follows:

Conclusions:

I. No T is L. - **Does not follow** (because there is no relation between T and L)

II. No G is T. - **Does not follow** (because All T are G given. So, No G is T it is not definite)

Q:99 The correct answer is **option 4** i.e. **Only conclusion I follows**.

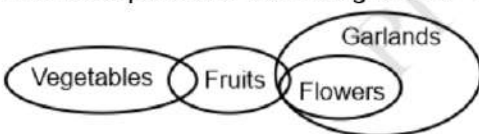

Conclusion:

I: No lipstick is a lotion. - **Follows** (Because, All lipsticks are creams and No cream is a lotion, so No lipstick is a lotion it is definite)

II: No powder is a cream. - **Does not follow** (Because, No powder is a lipstick given but there is no direct relation given between powder and creams)

Q:100 The correct answer is **option 2** i.e. **Only conclusion I follows**.

The least possible venn diagram is:

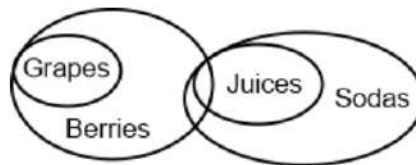

Conclusions:

I. Some garlands are fruits. - **Follows** (because Some fruits are flowers and All flowers are garlands. So, Some garlands are fruits too)

II. Some vegetables are flowers. - **Does not follow** (because there is no direct relation between them)

III. Some vegetables are garlands. - **Does not follow** (because there is no direct relation between them)

Q:101 The correct answer is **option 2** i.e. **Both the conclusions (I) and (II) follow**.

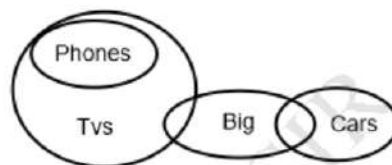

Conclusions:

(I) Some Berries are Grapes. - **Follows** (because All Grapes are Berries given. So, Some Berries are Grapes too)

(II) Some Sodas are Berries. - **Follows** (because Some Berries are Juices and All Juices are Sodas. So, Some Sodas are Berries too)

Q:102 The correct answer is **option 1** i.e. **Only conclusions I and II follow**.

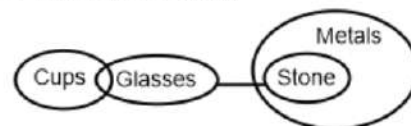

Conclusions:

I. Some TVs are phones. - **Follows** (because All phones are TVs. So, Some TVs are phones too)

II. Some big are TVs. - **Follows** (because Some TVs are big. So, Some big are TVs too)

III. All big are cars. - **Does not follow** (because it is possible but not definite)

Q:103 The correct answer is **option 4** i.e. **Only I and III conclusion follow**.

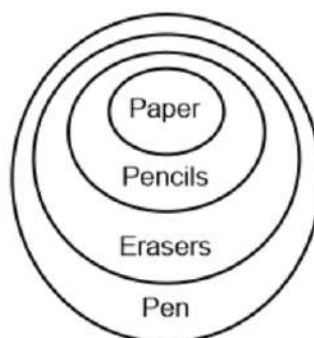

Conclusions:

I. All cups can never be stones. - **Follows** (because the part of cups that is glass can never be stone as no glass is a stone)

II. No cup is a metal. - **Does not follow** (because there is no direct relation between cup and metal so it can be possible but not definite)

III. All metals can never be glasses. - **Follows** (because some part of the metal is stone and no glass is a stone)

Q:104 The correct answer is **option 3** i.e. **Only conclusions II and III follow**.

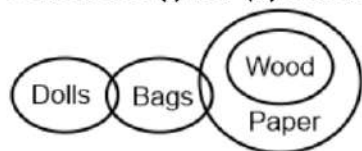

Conclusions:

I. All pens are papers: **Does not follow** (It is possible but not definite.)

II. Some papers are erasers: **Follows** (As all papers are pencils and all pencils are erasers. So some papers are erasers are definitely true.)

III. Some pens are pencils: **Follows** (As all pencils are erasers and all erasers are pen. So some pens are pencils are definitely true.)

Q:105 The correct answer is **option 2** i.e. **Neither conclusion (I) nor (II) follows.**

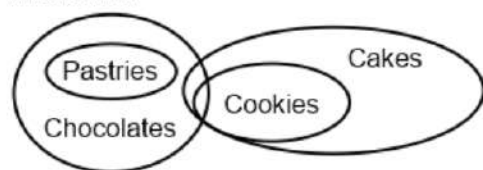

Conclusion:

(I): All dolls are paper. - **Does not follow** (because there is no direct relation between dolls and paper so it can be possible but not definite)

(II): Some bags are wood. - **Does not follow** (because there is no direct relation between bags and wood so it can be possible but not definite)

Q:106 The correct answer is **option 4** i.e. **Only conclusion II follows.**

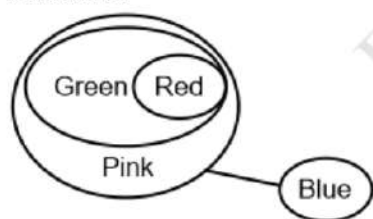

Conclusions:

(I) No pastry is a cake. - **Does not follow** (because there is no direction relation between them)

(II) Some cakes are chocolates. - **Follows** (because Some chocolates are cookies and All cookies are cakes. So, Some cakes are chocolates too)

Q:107 The correct answer is **option 3** i.e. **Only conclusion I follows.**

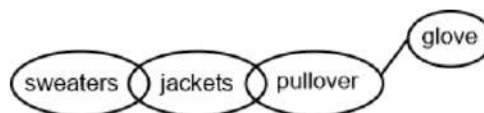

Conclusions:

I. No green is blue. - **Follows** (because All green are pink and No pink is blue. So, No green is blue too)

II. Some blue are red. - **Does not follow** (because All red are green, All green are pink and No pink is blue. So, Some blue cannot be red)

Q:108 The correct answer is **option 3** i.e. **None of the conclusions follow.**

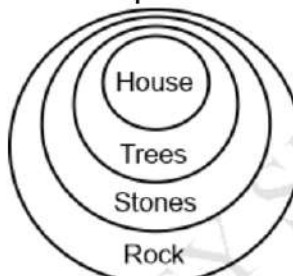

Conclusions:

(I) No jacket is a glove. - **Does not follow** (because there is no direct relation between jacket and glove so it can be possible but not definite)

(II) Some sweaters are pullovers. - **Does not follow** (because there is no direct relation between sweaters and pullovers so it can be possible but not definite)

Q:109 The correct answer is **option 3** i.e. **Both conclusions (I) and (II) follow.**

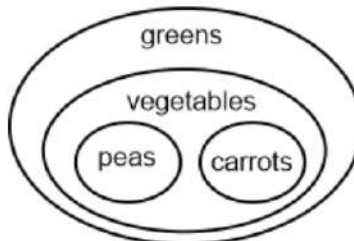

The least possible venn diagram is:

Conclusion (I): Some stones are trees: **Follows** (As, all trees are stones so, some stones are definitely trees.)

Conclusion (II): All houses are rocks: **Follows** (As, All houses are trees, All trees are stones and All stones are rocks so, All houses are rocks definitely.)

Q:110 The correct answer is **option 1** i.e. **Both conclusions I and III follow.**

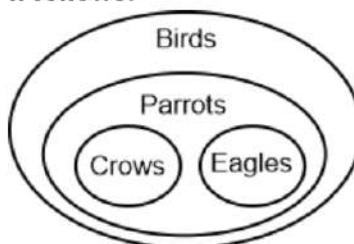

Conclusions:

I. All peas are greens. - **Follows** (because All peas are vegetables and All vegetables are greens. So, All peas are greens too)

II. All greens are carrots. - **Does not follow** (because All carrots are vegetables and All vegetables are greens. So, it is false)

III. Some greens are peas. - **Follows** (because All peas are vegetables and All vegetables are greens. So, Some greens are peas too)

Q:111 The correct answer is **option 1** i.e. **Only conclusion II follows.**

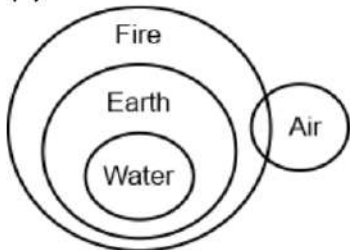

Conclusions:

I. No crow is a bird. - **Does not follow** (because All crows are parrots and All parrots are birds. So, it is false)

II. Some birds are eagles. - **Follows** (because All eagles are parrots and All parrots are birds. So, Some birds are eagles too)

III. All birds are crows. - **Does not follow** (because All crows are parrots and All parrots are birds. So, it is false)

Q:112 The correct answer is **option 2** i.e. **Only conclusion (II) follows.**

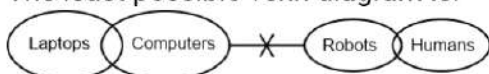

Conclusion (I): Some air is earth. - **Does not follow** (because there is no relation between earth and air so it can be possible but not definite)

Conclusion (II): Some fire is water. - **Follows** (because All water is earth and all earth is fire. So, Some fire is water too)

Q:113 The correct answer is **option 2** i.e. **Only conclusion I follows.**

The least possible venn diagram is:

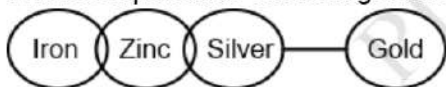

Conclusions:

(I) All humans can never be computers: **Follows** (As no computer is a robot and Some robots are humans so, the part of human which is Robot can never be computers.)

(II) Some robots are laptops: **Does not follow** (It is possible but not definite.)

Q:114 The correct answer is **option 1** i.e. **Only conclusion I follow.**

The least possible venn diagram is:

Conclusions:

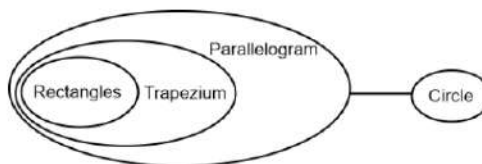

I) Some zinc is not gold. → **Follow** (As Some zinc is silver and no silver is gold so, definitely some zinc is not gold.)

II) Some zinc is gold. → **Does not follow** (As Some zinc is silver and no silver is gold so, it is possible but not definite.)

III) Some silver is iron. → **Does not follow** (As some zinc is iron and some zinc is silver, but this does not means that some silver is iron.)

Q:115 The correct answer is **option 4** i.e. **All conclusion I, II and III.**

The least possible venn diagram is:

Conclusions:

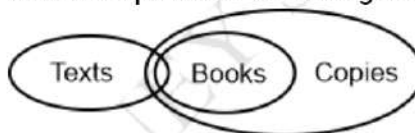

I) No rectangle is circle. → **Follow** (As all rectangles are trapezium, all trapeziums are parallelogram and no parallelogram is circle. so, definitely no rectangle is circle.)

II) No trapezium is circle. → **Follow** (As all trapeziums are parallelogram and no parallelogram is circle so, definitely no trapezium is circle.)

III) All rectangles are parallelogram. → **Follow** (As all rectangles are trapezium and all trapeziums are parallelogram so, definitely all rectangles are parallelogram.)

Q:116 The correct answer is **option 1** i.e. **Only conclusion I follow.**

The least possible venn diagram is:

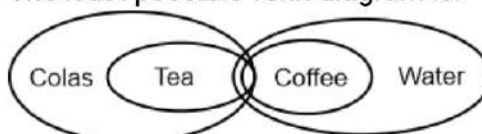

Conclusions:

I. Some texts are copies. → **Follow** (As all books are copies and some books are texts so, definitely some texts are copies.)

II. No text is a copy. → **Does not follow** (As all books are copies and some books are texts so, it is not possible that no text is a copy.)

Q:117 The correct answer is **option 1** i.e. **All the conclusions follow.**

The least possible venn diagram is:

Conclusions:

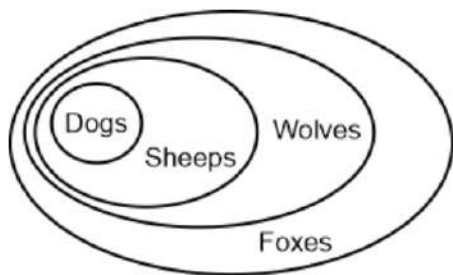

I. Some colas are waters. → **Follow** (As all coffees are waters and some teas are coffees and all teas are colas, so definitely some colas are waters.)

II. Some coffees are colas. → **Follow** (As some teas are coffees and all teas are colas, so definitely some coffees are colas.)

III. Some waters are teas. → **Follow** (As some teas are coffees and all coffees are waters., so definitely some waters are teas.)

Q:118 The correct answer is **option 3** i.e. **Only conclusions II and III follow.**

The least possible Venn diagram is shown below:

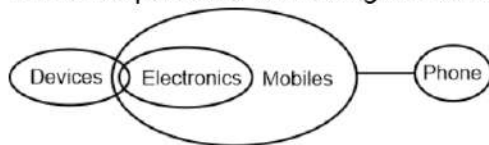

Conclusions:

- I. All wolves are sheep: **Does not follow** (It is possible but not definite)
 II. All dogs are foxes: **Follows** (As all dogs are sheep, all sheep are wolves and all wolves are foxes)
 III. All dogs are wolves: **Follows** (As all dogs are sheep and all sheep are wolves)

Q:119 The correct answer is **option 2** i.e. **Neither conclusion (I) nor (II) follows.**

The least possible Venn diagram is shown below:

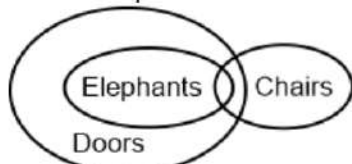

Conclusions:

- (I) No phone is a device: **Does not follow** (It is possible but not definite)
 (II) At least some electronics are phones: **Does not follow** (As there is a negative relation between the elements)

Q:120 The correct answer is **option 1** i.e. **Only conclusion 1 follows.**

The least possible Venn diagram is shown below:

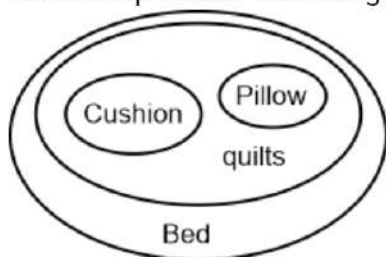

Conclusions:

1. At least some chairs are doors: **Follows** (The part of the chairs that is an elephant is definitely a door)
 2. All doors are elephants: **Does not follow** (It is possible but not definite)

Q:121 The correct answer is **option 1** i.e. **Only conclusions I and II follow.**

The least possible Venn Diagram is shown below:

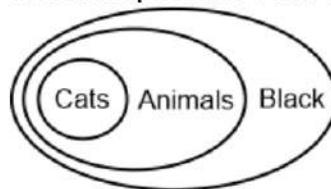

Conclusions:

- I. Some cushions are beds: **Follows** (as all cushions are quilts and all quilts are beds)
 II. Some pillows are beds: **Follows** (as all pillows are quilts and all quilts are beds)
 III. Some cushions are pillows: **Does not follow** (It is possible but not definite)

Q:122 The correct answer is **option 1** i.e. **Both conclusions I and II follow.**

The least possible Venn diagram is shown below:

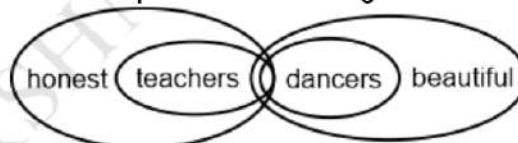

Conclusions:

- I. Some black are cats: **Follows** (As all cats are animals and all animals are black so some black is definitely cat)
 II. All cats are black: **Follows** (As all cats are animals and all animals are black)

Q:123 The correct answer is **option 4** i.e. **Both conclusions I and II follow..**

The least possible venn diagram is:

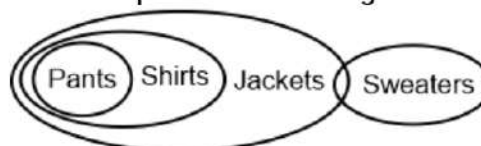

Conclusions:

- I. Some teachers are beautiful. → **Follow** (As some teachers are dancers and all dancers are beautiful. So, definitely some teachers are beautiful)
 II. Some dancers are honest. → **Follow** (As some teachers are dancers and all teachers are honest. So, some dancers are honest.)

Q:124 The correct answer is **option 1** i.e. **Only conclusion I follows..**

The least possible venn diagram is:

Conclusions:

- I. Some jackets are pants. → **Follow** (As all pants are shirts and all shirts are jackets. So, definitely some jackets are pants.)
 II. Some sweaters are shirts. → **Does not follow** (There is no direct relation between sweaters and shirts.)
 III. No pant is a sweater. → **Does not follow** (There is no direct relation between sweaters and pants.)

Q:125 The correct answer is **option 2** i.e. **Neither conclusion I nor II follows.**

The least possible venn diagram is:

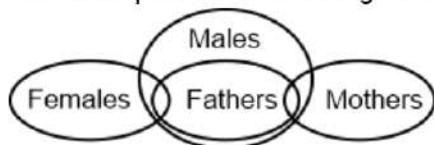

Conclusions:

- I. Some trees are buds. → **Does not follow** (There is no direct relationship given between trees and buds.)
 II. No tree is a bud. → **Does not follow** (There is no direct relationship given between trees and buds.)

Q:126 The correct answer is **option 2** i.e. **Only conclusion III follows.**

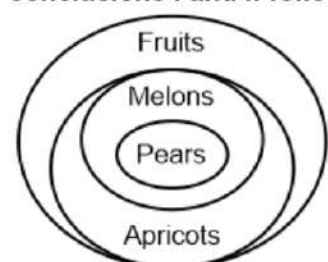

The least possible venn diagram is:

Conclusions:

- I. Some males are not females. → **Does not follow** (As some fathers are females and all fathers are males, so it is possible that some males are not females but not definite.)
 II. Some mothers are females. → **Does not follow** (There is no direct relation between mothers and females.)
 III. Some males are mothers. → **Follow** (As all fathers are males and some fathers are mothers. So, definitely some males are mothers.)

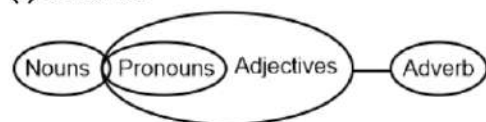

Q:127 The correct answer is **option 2** i.e. **Both conclusions I and II follow.**

Conclusions:

- I. All pears are fruits. - **Follows** (because All pears are melons, All melons are apricots and All apricots are fruits. So, All pears are fruits too)
 II. Some fruits are melons. - **Follows** (because All melons are apricots and All apricots are fruits. So, Some fruits are melons too)

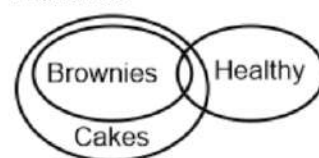

Q:128 The correct answer is **option 4** i.e. **Only conclusion (I) follows.**

Conclusions:

- (I): No pronoun is an adverb. - **Follows** (because All pronouns are adjectives and No adjective is an adverb. So, No pronoun is an adverb too)
 (II): At least some nouns are adverbs. - **Does not follow** (because there is no direct relation between nouns and adverbs so it can be possible but not definite)

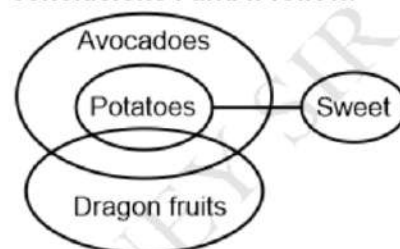

Q:129 The correct answer is **option 4** i.e. **Only conclusion I follows.**

Conclusions:

- I. Some cakes are healthy. - **Follows** (because Some brownies are healthy and All brownies are cakes. So, Some cakes are healthy too)
 II. No cake is healthy. - **Does not follow** (because Some brownies are healthy and All brownies are cakes. So, No cake is healthy it is false)

Q:130 The correct answer is **option 3** i.e. **Both conclusions I and II follow.**

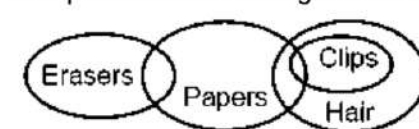

Conclusions:

- I. Some avocadoes are not sweets. - **Follows** (because No potatoes is sweet and All potatoes are avocadoes. So, Some avocadoes are not sweets too)
 II. Some dragon fruits are not sweets. - **Follows** (because No potatoes is sweet and Some potatoes are dragon fruits. So, Some dragon fruits are not sweets too)
 III. Some avocadoes are sweets. - **Does not follow** (because there is no direct relation between them)

Q:131 The correct answer is **option 3** i.e. **Both conclusions (I) and (II) do not follow.**

The possible Venn Diagram will be:

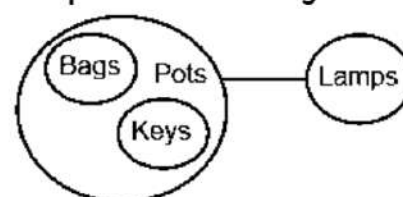

Conclusions:

- (I) All Papers are Hair ⇒ **False** (It is possible but not definite)
 (II) Some Erasers are Clips ⇒ **False** (It is possible but not definite)

Q:132 The correct answer is **option 1** i.e. **Only conclusion (II) follows.**

The possible Venn Diagram will be:

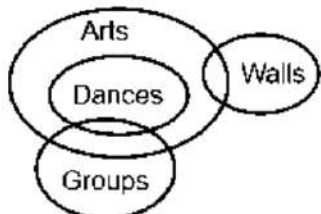

Conclusions:

(I) Some bags are keys $\Rightarrow$ **False** (It is possible but not definite)

(II) No keys are lamps $\Rightarrow$ **True** (As All keys are pots and No lamps are pots so No keys are lamps)

Q:133 The correct answer is **option 4** i.e. **Only conclusion (II) follows.**

The Least possible Venn Diagram will be:

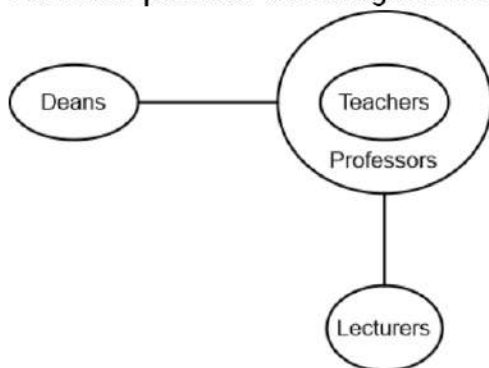

Conclusions:

(I) Some Walls are Dances $\Rightarrow$ **False** (It is possible but not definite)

(II) Some Groups are Art $\Rightarrow$ **True** (As some dances are art so some groups are art)

Q:134 The correct answer is **option 4** i.e. **Neither conclusion I nor II follows.**

The Least possible Venn diagram will be :

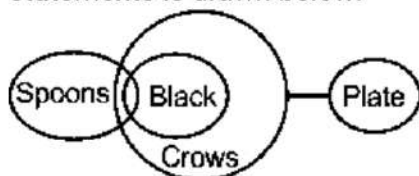

Conclusion :

I. Some deans are lecturers. $\Rightarrow$ **False** (It is possible but not definite)

II. Some teachers are lecturers. $\Rightarrow$ **False** (It is possible but not definite)

Q:135 The correct answer is **option 2** i.e. **Only conclusions I and III follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

I. Some black are spoons. $\rightarrow$ **True** (As spoons are black so, some black are spoon)

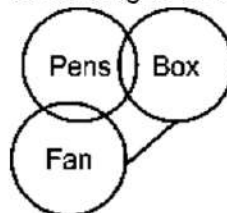

II. All crows are black. $\rightarrow$ **False** (It is possible, but no definite conclusion can be drawn)

III. No plate is a crow. $\rightarrow$ **True** (As no crow is plate)

Hence, **only conclusion I and III follow** is the correct answer.

Q:136 The correct answer is **option 4** i.e. **Only conclusions III and IV follow.**

According to statements the possible venn diagram ,

Conclusions:

I. No pen is a fan. $\rightarrow$ **False** (The statement is not true as some pens are fan)

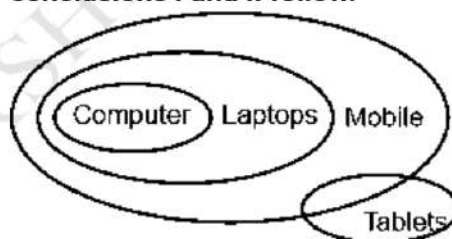

II. No box is a pen. $\rightarrow$ **False** (The statement is not true as some pens are boxes)

III. Some fans are pens. $\rightarrow$ **True** (The statement is true as some pens are fans so, some fans are pens)

IV. Some boxes are pens. $\rightarrow$ **True** (The statement is true as some pens are boxes so, some boxes are pens)

Hence, **only conclusion III and IV follow** is the correct answer.

Q:137 The correct answer is **option 2** i.e. **Only conclusions I and II follow.**

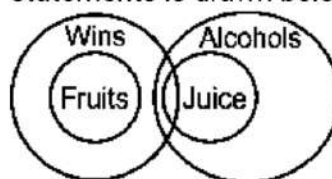

Conclusion I follows because if all computers are laptops, and all laptops are mobiles, then there must be some overlap between computers and mobiles, hence, some mobiles are computers.

Conclusion II follows because if all computers are laptops, and all laptops are mobiles, then all computers are also mobiles.

Conclusion III does not follow because while it's true that some mobiles are tablets, there's no direct relationship established between computers and tablets in the given statements.

Q:138 The correct answer is **option 2** i.e. **All conclusions follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

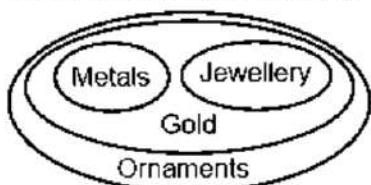

I. Some alcohols are juices. → **True** (As some juices are alcohols is given so some alcohols are juices is definitely true).

II. Some wines are alcohols. → **True** (As some alcohols are wines is given so some wines are alcohols is definitely true).

III. Some wines are fruits. → **True** (As some fruits are wines is given so some wines are fruits is definitely true).

Q:139 The correct answer is **option 1** i.e. **Only conclusions I and III follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

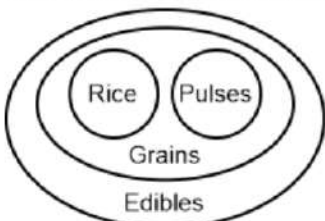

I. Some ornaments are jewellery → **True** (As all jewellery are gold, and all gold are ornaments, so, some ornaments are jewellery is also true.)

II. Some metals are jewellery → **False** (It is possible, but no definite conclusion can be drawn.)

III. All jewellery are ornaments → **True** (As all jewellery are gold, and all gold are ornaments, so, all jewellery are ornaments is also true.)

Q:140 The correct answer is **option 1** i.e. **All conclusions follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

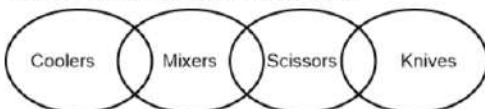

I. All rice are edible → **True** (As all rice are grains, and all grains are edibles, so, all rice are edibles is also true.)

II. All pulses are edible → **True** (As all pulses are grains, and all grains are edibles, so, all pulses are edibles is also true.)

III. Some edibles are grains → **True** (As all grains are edibles, so, some edibles are grains is also true.)

Q:141 The correct answer is **option 3** i.e. **Either conclusion I or IV follows.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

I. Some knives are mixers → **False** (It is possible, but no definite conclusion can be drawn.)

II. Some scissors are coolers → **False** (It is possible, but no definite conclusion can be drawn.)

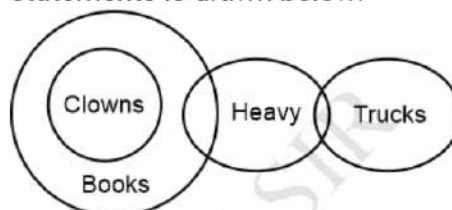

III. Some knives are coolers → **False** (It is possible, but no definite conclusion can be drawn.)

IV. No knife is a mixer → **False** (It is possible, but no definite conclusion can be drawn.)

Conclusion I and IV are complementary pairs.

Q:142 The correct answer is **option 2** i.e. **Only conclusions I and III follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

I. Some books are clowns → **True** (As all clowns are books, so, some books are clowns is also true.)

II. All books are heavy → **False** (It is possible, but no definite conclusion can be drawn.)

III. Some trucks are heavy → **True** (As some heavy are trucks, so, some trucks are heavy is also true.)

Q:143 The correct answer is **option 1** i.e. **Only conclusions I and II follow.**

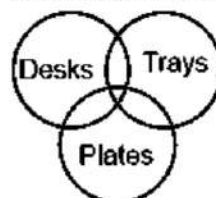

■ **Conclusion I follows** because if all balls are flowers, then there must be some flowers that are balls.

■ **Conclusion II follows** because if all flowers are plates, then there must be some plates that are flowers.

■ **Conclusion III does not follow** because the statements only establish a partial relationship between plates and cups, not a universal one. Therefore, we cannot conclude that all cups are plates.

Q:144 The correct answer is **option 1** i.e. **Only conclusion III follows.**

The least possible Venn Diagram for the given statements is drawn below:

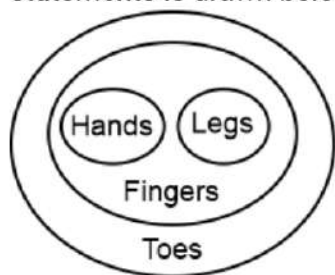

Conclusions:

- I. All desks are plates → **Does not follow** (It is possible, but no definite conclusion can be drawn).
 II. All plates are desks → **Does not follow** (It is possible, but no definite conclusion can be drawn).
 III. Some plates are trays → **Follow** (As some trays are plates, so, some plates are trays).
 IV. All trays are desks → **Does not follow** (It is possible, but no definite conclusion can be drawn).

Q:145 The correct answer is **option 2** i.e. **Only conclusions II and III follow.**

The least possible Venn Diagram for the given statements is drawn below:

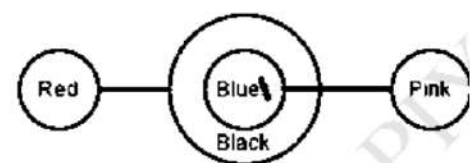

Conclusions:

- I. All toes are fingers → **False** (It is possible but no definite conclusion can be drawn.)
 II. Some toes are hands → **True** (As all hands are fingers, all legs are fingers, and all fingers are toes, so, some toes are hands is also true.)
 III. Some toes are legs → **True** (As all hands are fingers, all legs are fingers, and all fingers are toes, so, some toes are legs is also true.)

Q:146 The correct answer is **option 3** i.e. **Only conclusion 1 follows**

The least possible Venn Diagram for the given statements is drawn below:

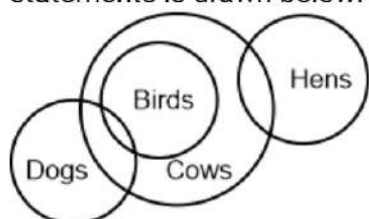

Conclusions:

1. No blue is red → **True** (As no red is black, and all blues are black, so, no blue is red is also true.)
 2. No red is pink → **False** (It is possible but no definite conclusion can be drawn.)

Q:147 The correct answer is **option 4** i.e. **Only conclusion III follows**

The least possible Venn Diagram for the given statements is drawn below:

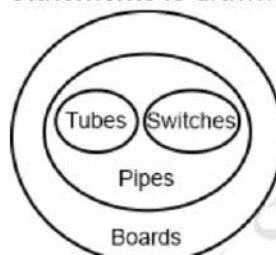

Conclusions:

- I. Some dogs are hens → **False** (This is possible, but not definite conclusion can be drawn).
 II. No hens are birds → **False** (This is possible, but no definite conclusion can be drawn.)
 III. Some cows are dogs → **True** (As all birds are cows and some dogs are birds, so, some cows are dogs is also true.)

Q:148 The correct answer is **option 2** i.e. **Only conclusions I and III follow.**

The least possible Venn Diagram for the given statements is drawn below:

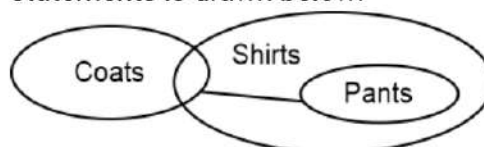

Conclusions:

- I. All switches are boards → **True** (As all switches are pipes, and all pipes are boards, so, all switches are boards is also true.)
 II. All boards are tubes → **False** (It is possible, but no definite conclusion can be drawn.)
 III. Some boards are switches → **True** (As all switches are pipes, and all pipes are boards, so, some boards are switches is also true.)

Q:149 The correct answer is **Option 3** i.e. **Only conclusion II follows.**

The least possible Venn Diagram for the given statements is drawn below:

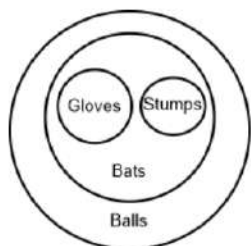

Conclusions:

- I. No coats are shirts → **False** (Some shirts are coats so the negative relation between them is not possible.)
 II. Some shirts are pants → **True** (As all pants are shirts, so some shirts are pants is also true.)
 III. Some pants are coats → **False** (No coats are pants so the positive relation between them is not possible.)

Q:150 The correct answer is **Option 2** i.e. **Only conclusions I and II follow.**

The least possible Venn Diagram for the given statements is drawn below:

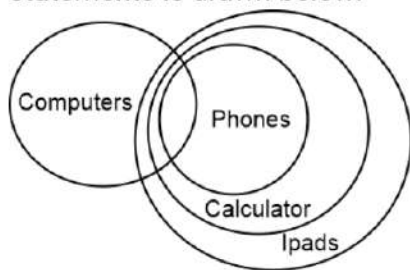

Conclusions:

- I. All stumps are balls → **True** (As all stumps are bats and all bats are balls, so, all stumps are balls is also true.)
 II. Some balls are gloves → **True** (As all gloves are bats, and all bats are balls, so, some balls are gloves is also true.)
 III. Some gloves are stumps → **False** (It is possible, but no definite conclusion can be drawn.)

Q:151 The correct answer is **Option 4** i.e. **Only conclusions 1 and 3 follow.**

The least possible Venn Diagram for the given statements is drawn below:

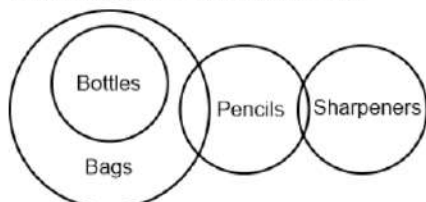

Conclusions:

- I. Some iPads are computers → **True** (As some computers are phones, all phones are calculators, and all calculators are iPads, so, some iPads are computers is also true.)
 II. All calculators are phones → **False** (It is possible, but no definite conclusion can be drawn.)
 II. Some iPads are phones → **True** (As all phones are calculators, and all calculators are iPads, so, some iPads are phones is also true.)

Q:152 The correct answer is **option 2** i.e. **Neither conclusion I nor II follows.**

The least possible Venn Diagram for the given statements is drawn below:

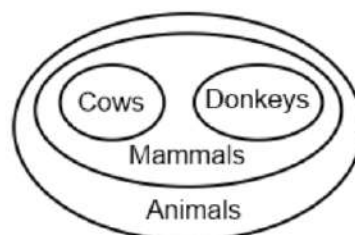

Conclusions:

- I. Some sharpeners are bottles → **False** (It is possible, but no definite conclusion can be drawn.)
 II. Some bottles are pencils → **False** (It is possible, but no definite conclusion can be drawn.)

Q:153 The correct answer is **option 2** i.e. **Only conclusion I follows**

The least possible Venn Diagram for the given statements is drawn below:

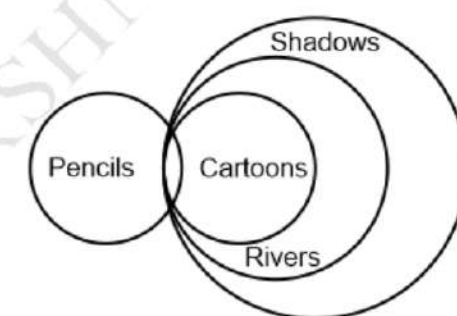

Conclusions:

- I. All donkeys are animals → **True** (As all donkeys are mammals, and all mammals are animals, so, all donkeys are animals is also true.)
 II. All animals are donkeys → **False** (It is possible but no definite conclusion can be drawn.)
 III. Some cows are donkeys → **False** (It is possible but no definite conclusion can be drawn.)

Hence, **Only conclusion I follows.**

Q:154 The correct answer is **option 1** i.e. **Both conclusions II and III follow.**

The least possible Venn Diagram will be:

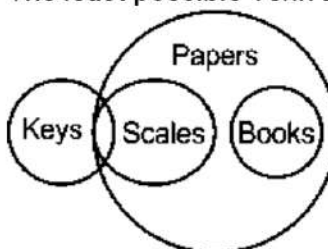

Conclusions:

- (I) All pencils are shadows. ⇒ **False** (It is possible but not definite)
 (II) All cartoons are shadows. ⇒ **True** (As all cartoons are rivers and all rivers are shadows)
 (III) Some shadows are pencils. ⇒ **True** (As Some pencils are cartoons, all cartoons are rivers and all rivers are shadows so part of the shadow which is cartoon will also be a pencil.)

Q:155 The correct answer is **option 3** i.e. **Only conclusion (II) follows.**

The least possible Venn Diagram will be:

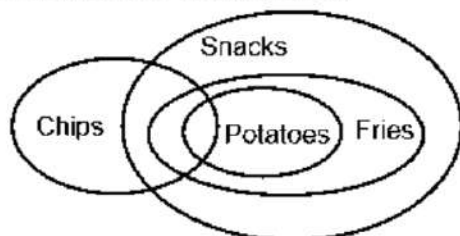

Conclusion:

(I) No books are keys $\Rightarrow$ **False** (It is possible but not definite)

(II) Some papers are keys $\Rightarrow$ **True** (As some keys are scales and all books are papers, so the part of keys which are scale will also be papers)

Q:156 The correct answer is **option 3** i.e. **Both conclusions (I) and (II) follow.**

The least possible Venn Diagram for the given statements is drawn below:

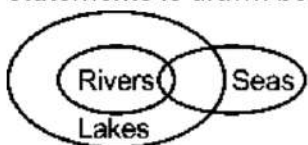

Conclusions:

I. All Potatoes are Snacks $\rightarrow$ **True** (As All potatoes are Fries and all fries are snacks so all potatoes are snacks is definitely true).

II. Some Snacks are Chips $\rightarrow$ **True** (As some chips are potatoes and All potatoes are snacks so some snacks are chips is true).

Q:157 The correct answer is **option 3** i.e. **Only Conclusion I follows.**

The least possible Venn Diagram for the given statements is drawn below:

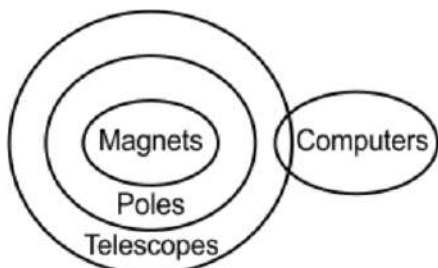

Conclusions:

I. Some seas are lakes $\rightarrow$ **True** (As all rivers are lakes, and some seas are rivers, so, some seas are lakes is also true.)

II. All lakes are rivers $\rightarrow$ **False** (It is possible, but no definite conclusion can be drawn.)

Q:158 The correct answer is **option 4** i.e. **Neither conclusion (I) nor (II) is true.**

The least possible Venn Diagram for the given statements is drawn below:

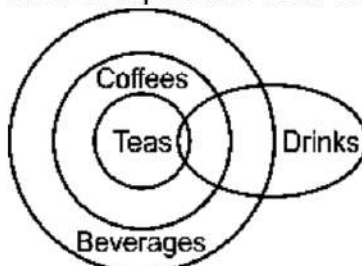

Conclusions:

I. All telescopes are magnets $\rightarrow$ **False** (It is possible, but no definite conclusion can be drawn).

II. Some poles are computers $\rightarrow$ **False** (It is possible, but no definite conclusion can be drawn).

Q:159 The correct answer is **option 1** i.e. **Only conclusion I follows.**

The Least possible Venn diagram will be :

Conclusion:

I. All teas are beverages $\Rightarrow$ **True** (As teas is part of beverages so all teas are beverages)

II. No drink is a coffee. $\Rightarrow$ **False** (It is possible but not definite)

Q:160 The correct answer is **option 3** i.e. **Both conclusions (I) and (II) do not follow.**

The least possible Venn Diagram for the given statements is drawn below:

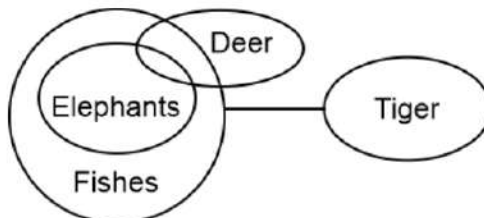

Conclusions:

I. Some Cheese are Eggs $\rightarrow$ **False** (It is possible, but no definite conclusion can be drawn).

II. Some Bagels are Smiles $\rightarrow$ **False** (It is possible, but no definite conclusion can be drawn).

Q:161 The correct answer is **option 4** i.e. **Only conclusion I follows.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

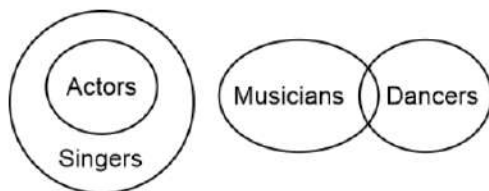

I. Some fishes are deer $\rightarrow$ **True** (As all elephants are fishes, and some deer are elephants, so, some fishes are deer is also true.)

II. No elephant is a deer $\rightarrow$ **False** (As elephants and deer are positive statements, no negative conclusion can be drawn.)

III. Some tigers are fishes $\rightarrow$ **False** (As no fish is a tiger, so, no positive statements can be drawn.)

Q:162 The correct answer is **option 2** i.e. **Only Conclusion II follows.**

The least possible Venn Diagram for the given statements is drawn below:

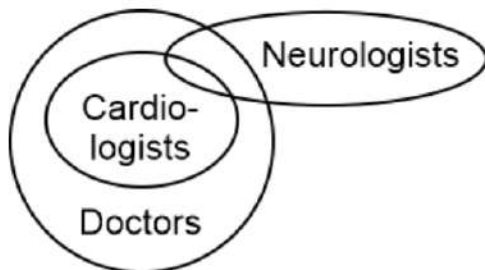

Conclusions:

I. All dancers are musicians → **False** (It is possible but no definite conclusion can be drawn.)

II. Some singers are actors → **True** (As all actors are singers, so, some singers are actors is also true.)

Q:163 The correct answer is **option 1** i.e. **Both Conclusion I and II follow.**

The least possible Venn Diagram for the given statements is drawn below:

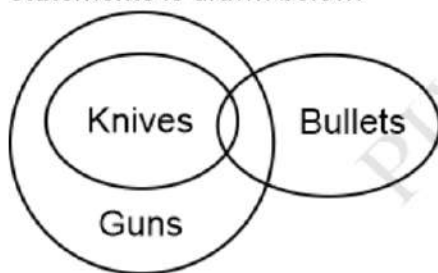

Conclusions:

I. Some doctors are cardiologists → **True** (As all cardiologists are doctors, so, some doctors are cardiologists is also true.)

II. Some doctors are neurologists → **True** (As all cardiologists are doctors and some cardiologists are neurologists, so, some doctors are neurologists is also true.)

Q:164 The correct answer is **option 2** i.e. **Both conclusions I and III follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

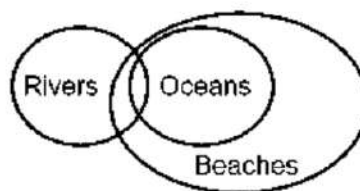

I. Some guns are bullets → **True** (As all knives are guns, and some bullets are knives, so, some guns are bullets is also true.)

II. No bullet is a gun → **False** (As statements are positive, so, no negative conclusion can be drawn.)

III. Some guns are knives → **True** (As all knives are guns, so, some guns are knives is also true.)

Q:165 The correct answer is **option 4** i.e. **Only conclusion I follows.**

The least possible Venn Diagram will be:

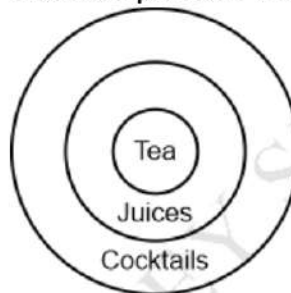

Conclusion:

I. Some rivers are beaches. ⇒ **True** (As some beaches are rivers so some rivers are beaches are definitely true.)

II. All oceans are rivers. ⇒ **False** (It is a possibility but not definite.)

Q:166 The correct answer is **option 3** i.e. **Only conclusion I follows.**

The least possible Venn Diagram will be:

Conclusion:

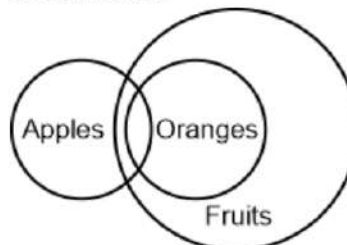

I. All teas are cocktails. ⇒ **True** (As all teas are cocktails)

II. All cocktails are definitely juices. ⇒ **False** (It is a possibility but not definite.)

Q:167 The correct answer is **option 2** i.e. **Only Conclusion II follows.**

The least possible Venn Diagram will be :

Conclusion:

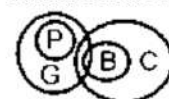

I) All apples are fruits. ⇒ **False** (It is possible but not definite)

II) Some fruits are oranges. ⇒ **True** (As some oranges are fruits so some fruits are oranges)

Q:168 The correct answer is **option 3** i.e. **Only 2 does not follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

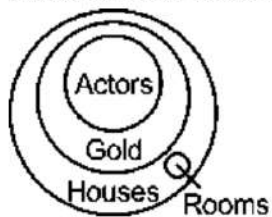

1) All P being C is a possibility → **True** (As all P are G, some G are B, and all B are C, so, all P being C is a possibility.)

- 2) Some P are B → **False** (It is possible, but no definite conclusion can be drawn.)
 3) Some C are G → **True** (As some G are B, and all B are C, so, some C are G is also true.)
 4) Some G are P → **True** (As all P are G, some G are P is also true.)

Hence, **Only 2 does not follow.**

Q:169 The correct answer is **option 2** i.e. **Neither Conclusion I nor Conclusion II follows.**

The least possible Venn Diagram for the given statements is drawn below:

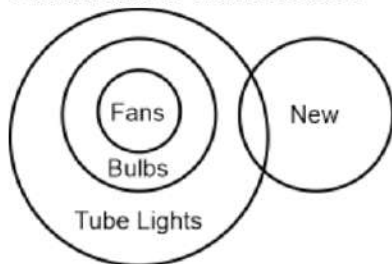

Conclusions:

- I. Some gold are rooms → **False** (It is possible, but no definite conclusion can be drawn.)
 II. Some rooms are actors → **False** (It is possible, but no definite conclusion can be drawn.)

Hence, **Neither Conclusion I nor Conclusion II follows.**

Q:170 The correct answer is **Option 3** i.e. **Neither conclusion I nor II follows.**

The least possible Venn Diagram for the given statements is drawn below:

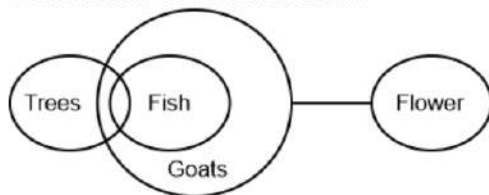

Conclusions:

- I. All fans are new → **False** (It is possible, but no definite conclusion can be drawn.)
 II. All tube lights are fans → **False** (It is possible, but no definite conclusion can be drawn.)

Hence, **Neither conclusion I nor II follows.**

Q:171 The correct answer is **Option 4** i.e. **All conclusions follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

I. Some trees are goats → **True** (As some trees are fish, and all fishes are goats, so, some trees are goats is also true.)

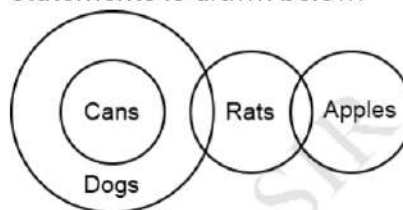

II. Some fishes are not flowers → **True** (As all fishes are goats, and no goat is a flower, so some fishes are not flowers is also true.)

III. Some flowers are not goats → **True** (As no goat is a flower, so, some flowers are not goats is also true.)

Hence, **All conclusions follow.**

Q:172 The correct answer is **option 1** i.e. **Only conclusion III follows.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

I. No cans are dogs → **False** (All cans are already dogs so a negative conclusion can't be drawn)

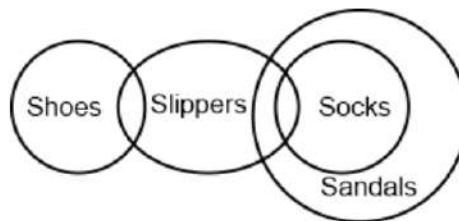

II. Some rats are not dogs → **False** (It is possible, but no definite conclusion can be drawn.)

III. Some apples are rats → **True** (As some rats are apples, so, some apples are rats is also true.)

Hence, **Only conclusion III follows.**

Q:173 The correct answer is **Option 1** i.e. **Only conclusion 2 follows.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

1. Some sandals are shoes → **False** (It is possible, but no definite conclusion can be drawn.)

2. Some sandals are slippers → **True** (As some slippers are socks and all socks are sandals, so, some sandals are slippers is also true.)

3. Some socks are shoes → **False** (It is possible, but no definite conclusion can be drawn.)

Hence, **Only conclusion 2 follows.**

Q:174 The correct answer is **option 1** i.e. **Neither conclusion follows.**

The least possible Venn Diagram for the given statements is drawn below:

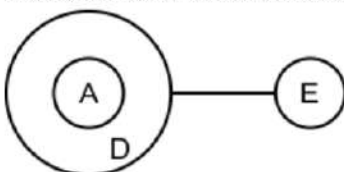

Conclusions:

I. No P is Q → **False** (It is possible, but no definite conclusion can be drawn.)

II. No R is P → **False** (It is possible, but no definite conclusion can be drawn.)

Q:175 The correct answer is **option 1** i.e. **Only conclusion I follows.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

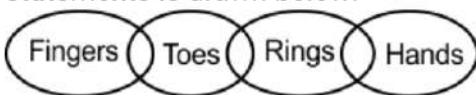

I. No E is A → **True** (As no D is E, and all A are D, so, no E is A is also true.)

II. All D are A → **False** (It is possible, but no definite conclusion can be drawn.)

III. All E are D → **False** (As no D is E so, all E can never be D.)

Q:176 The correct answer is **Option 1** i.e. **None of the conclusions follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

I. Some hands are toes → **False** (It is possible, but no definite conclusion can be drawn.)

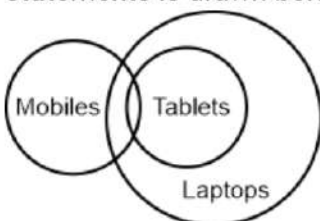

II. Some rings are fingers → **False** (It is possible, but no definite conclusion can be drawn.)

III. Some hands are fingers → **False** (It is possible, but no definite conclusion can be drawn.)

IV. Some fingers are rings → **False** (It is possible, but no definite conclusion can be drawn.)

Q:177 The correct answer is **Option 1** i.e. **Only conclusions I and II follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

I. Some laptops are mobiles → **True** (As some mobiles are tablets, and all tablets are laptops, so, some laptops are mobiles is also true.)

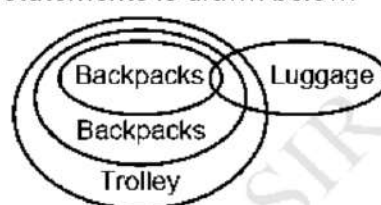

II. Some mobiles are laptops → **True** (As some mobiles are tablets, and all tablets are laptops, so, some mobiles are laptops is also true.)

III. All mobiles are laptops → **False** (It is possible, but no definite conclusion can be drawn.)

Hence, **Only conclusions I and II follow.**

Q:178 The correct answer is **Option 1** i.e. **Both Conclusions I and II follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

(I) Some Suitcases are Luggage → **True** (As all backpacks are suitcases and some backpacks are luggage, so some suitcases are also luggage)

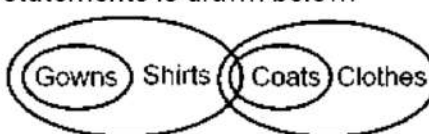

(II) Some Backpacks are Trolley → **True** (As all suitcases are trolley, and all backpacks are suitcases, so some backpacks are also trolley, this is true)

(III) All Trolleys are Luggage → **False** (It is possible but not definite as there is no direct relation between trolley and luggage)

Hence, **both conclusions I and II follow** is the correct answer.

Q:179 The correct answer is **Option 3** i.e. **Only conclusion II follows.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

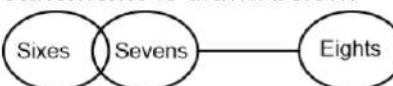

I. Some gowns are clothes → **False** (It is possible but not definite as there is no direct relation between gowns and clothes).

II. Some clothes are shirts → **True** (As all coats are clothes and some shirts are also coats, so some clothes are shirts).

Hence, the correct answer is **Only conclusion II follows.**

Q:180 The correct answer is **Option 1** i.e. **Neither conclusion I nor II follows**

The least possible Venn Diagram for the given statements is drawn below:

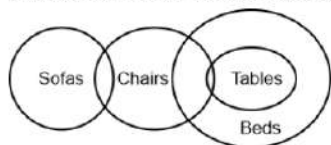

Conclusions:

- I. All eights are sixes → **False** (It is possible, but no definite conclusion can be drawn.)
 II. No eight is a six → **False** (It is possible, but no definite conclusion can be drawn.)

Hence, the correct answer is **Neither conclusion I nor II follows**.

Q:181 The correct answer is **Option 4** i.e. **Only Conclusion II follows**.

The least possible Venn Diagram for the given statements is drawn below:

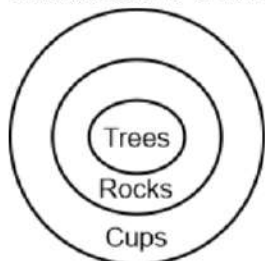

Conclusions:

- I. Some Sofas are Tables → **False** (It is possible, but no definite conclusion can be drawn.)
 II. Some Chairs are Beds → **True** (As some chairs are tables and all tables are beds, so, some chairs are beds is also true.)
 III. Some Beds are Sofas → **False** (It is possible, but no definite conclusion can be drawn.)

Hence, **Only Conclusion II follows**.

Q:182 The correct answer is **Option 3** i.e. **Both conclusions I and II follow**.

The least possible Venn Diagram for the given statements is drawn below:

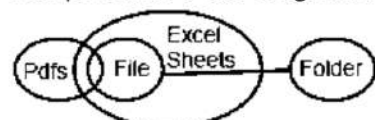

Conclusions:

- I. All trees are cups → **True** (As all trees are rocks and all rocks are cups, so all trees are cups is also true.)
 II. Some cups are trees → **True** (As all trees are rocks, and all rocks are cups, so, some cups are trees is also true.)

Hence, **Both conclusions I and II follow**.

Q:183 The correct answer is **Option 4** i.e. **Only conclusion III follows**

The possible Venn diagram is:

Conclusions:

1. Some PDFs are folders: **False** (It is possible but not definite, as no direct relationship between the two is given).

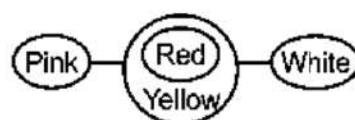

II. Some Excel sheets are folders: **false** (It is not possible, as no direct relationship between the two is given).

III. Some PDFs are Excel sheets: **True** (As all files are Excel sheets and some files are PDFs, some PDFs are Excel sheets is true).

Hence, **only conclusion III follows** is the correct answer.

Q:184 The correct answer is **Option 4** i.e. **All the conclusions follow**

The least possible Venn Diagram for the given statements is drawn below:

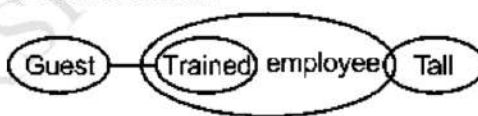

Conclusions:

- I. No red is pink → **True** (As no pink is yellow, and all red is yellow, so, no red is pink).
 II. No red is white → **True** (As no yellows are white, and all reds are yellow, so no red is white).
 III. No white is yellow → **True** (As no yellow is white).

Hence, **All the conclusions follow**.

Q:185 The correct answer is **Option 2** i.e. **Only conclusion II follows**.

The least possible venn diagram for the given statements is shown below:

Conclusions:

- I) Some tall are trained - False (It is possible but not definite)
 II) Some employees are trained - **True** (As it is given that all trained are employees, so some employees are definitely trained)
 III) No tall is guest - **False** (It is possible but not definite)
 Hence, **only conclusion II follows**.

Q:186 The correct answer is **Option 1** i.e. **Both conclusions follow**.

The least possible Venn Diagram for the given statements is drawn below:

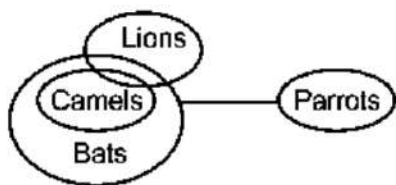

Conclusions:

- I. No star is a girl → **True** (As all stars are musicians, and no girl is a musician, so no star is a girl is true.)
 II. No star is a teacher → **True** (As no girl is a musician, and no musician is a teacher, so no star is a teacher is true.)

Hence, the correct answer is **Both conclusions follow**.

Q:187 The correct answer is **Option 4** i.e. **Both conclusions I and II follow**.

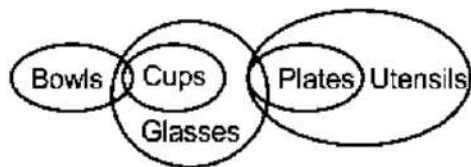

Conclusions:

- I. Some bats are lions → **True** (All camels are bats and some camels are lion. So, the part of bat that is camel is also lion)
 II. No parrot is a camel → **True** (All camels are bats and no bat is parrot so, no parrot is camel)
 III. No parrot is a lion → **False** (It is a possibility but not definite)

Q:188 The correct answer is **option 2** i.e. **Neither conclusion I nor II follows.**

The least possible Venn Diagram for the given statements is drawn below:

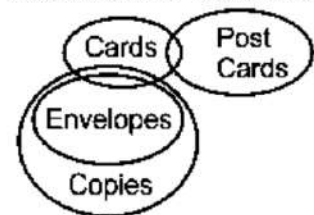

Conclusions:

- I. All bowls cannot be utensils → **False** (All bowls can be utensils is true so, All bowls cannot be utensils is false)
 II. All glasses cannot be utensils → **False** (All glasses can be utensils is true so, All glasses cannot be utensils is false)

Hence, **Neither conclusion I nor II follows.**

Q:189 The correct answer is **Option 4** i.e. **Only conclusions I and III follow.**

The least possible Venn Diagram for the given statements is drawn below:

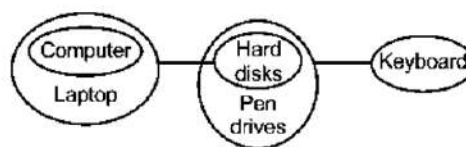

Conclusions:

- I. Some copies are envelopes → **True** (As all envelopes are copies, so, some copies are envelopes).
 II. Some postcards are copies → **False** (It is possible but no definite conclusion can be drawn).
 III. Some cards are copies → **True** (As some cards are envelopes, and all envelopes are copies, so, some cards are copies).

Hence, **Only conclusions I and III follow.**

Q:190 The correct answer is **option 4** i.e. **Only conclusion IV follows.**

The least possible venn diagram for the given statements is shown below:

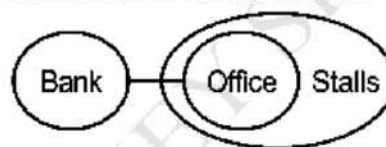

Conclusions:

- I. Some pen drives are not laptops → **False** (It is a possibility but not definite)
 II. No keyboard is a computer → **False** (It is a possibility but not definite)
 III. No hard disk is a laptop → **False** (It is a possibility but not definite)
 IV. All pen drives are not keyboards → **True** (As it is given that no pen drive is a keyboard)

Q:191 The correct answer is **Option 3** i.e. **Only Conclusion III follows**

The least possible Venn diagram for the given statements is shown below:

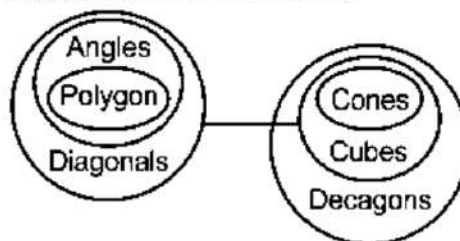

Conclusions:

- I. No bank is a stall → **False** (It is possible but not definite)
 II. No stall is a bank → **False** (It is possible but not definite)
 III. Some stalls are offices → **True** (As it is given that all offices are stalls so, some stalls are definitely offices)
 IV. All the stalls are offices → **False** (It is possible but not definite)

Hence, **Only conclusion III follows.**

Q:192 The correct answer is **Option 2** i.e. **Both conclusions I and III follow.**

The least possible Venn Diagram for the given statements is drawn below:

Conclusions:

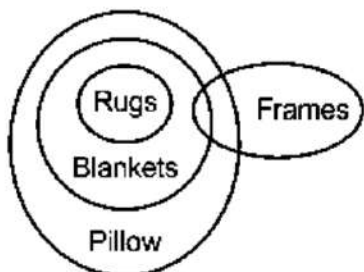

- I. Some diagonals are polygons → **True** (As all polygons are angles and all angles are diagonals so, some diagonals are polygons.)
 II. All diagonals are decagons → **False** (It is possible but no definite conclusion can be drawn.)
 III. No polygon is a cone → **True** (As all polygons are angles, all angles are diagonals, all cones are cube and no diagonal is a cube so, no polygon is a cone.)

IV. Some cubes are angles → **False** (All angles are Diagonals and No diagonal is cube so, cube can never have a positive relation with angles)

Hence, **Both conclusions I and III follow.**

Q:193 The correct answer is **Option 1** i.e. **Only Conclusion II follows.**

The least possible Venn Diagram for the given statements is drawn below:

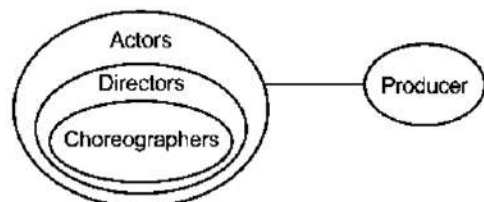

Conclusions:

- I. All pillows are rugs → **False** (As all rugs are blankets and all blankets are pillows so, some pillows are rugs.)
- II. Some pillows are rugs → **True** (As all rugs are blankets and all blankets are pillows so, some pillows are rugs.)
- III. All rugs are frames → **False** (It is possible but no definite conclusion can be drawn.)

Hence, **Only conclusion II follows.**

Q:194 The correct answer is **Option 1** i.e. **All the conclusions follow.**

The least possible Venn Diagram for the given statements is drawn below:

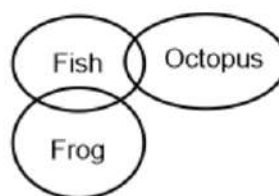

Conclusions:

- I. No choreographer is a producer → **True** (As all choreographers are directors and all directors are actors so all choreographers are actors. And No actor is a producer, so, no choreographer is a producer.)
- II. Some actors are choreographers → **True** (As all choreographers are directors and all directors are actors so all choreographers are actors. so, some actors are choreographers.)
- III. No director is a producer → **True** (As all directors are actors and no actor is a producer, so, no director is a producer.)

Hence, **all the conclusion follows.**

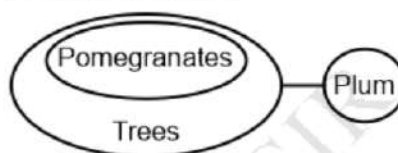

Q:195 The correct answer is **option 4** i.e. **Both conclusions follow.**

Conclusion:

- I. Some frogs are fish - **Follows** (As already given some fish are frogs so some frogs are fish is definitely true.)
- II. Some fish are octopuses - **Follows** (As already given some octopuses are fish so some fish are octopuses is definitely true.)

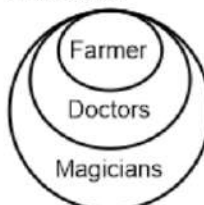

Q:196 The correct answer is **option 3** i.e. **All of the conclusion follow.**

Conclusion:

- I. No pomegranates is plum - **Follows** (because No trees is a plum and All pomegranates are trees. So, No pomegranates is plum it is true)
- II. No plum is a tree - **Follows** (because No trees is a plum. So, No plum is a tree it is true)
- III. Some trees are pomegranates - **Follows** (because All pomegranates are trees. So, Some trees are also pomegranates)

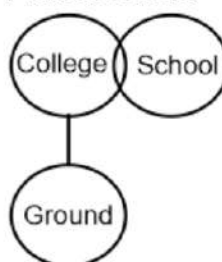

Q:197 The correct answer is **option 4** i.e. **Only conclusion I follows.**

Conclusion:

- I. All farmers are magicians - **Follows** (because All farmers are doctors and All doctors are magicians. So, All farmers are magicians also)
- II. No farmer is a magician - **Does not follow** (because All farmers are doctors and All doctors are magicians. So, it cannot possible but not definite)

Q:198 The correct answer is **option 3** i.e. **Only conclusions I and III follow.**

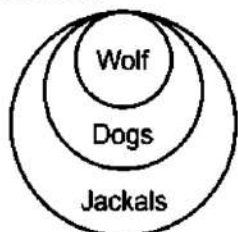

Conclusion:

I. No college is a ground - **Follows** (As no ground is a college so, no college is a ground is definitely follows.)

II. No school is a college - **Does not follow** (As some colleges are schools so some college are definitely school so it does not follow.)

III. Some school are college - **Follows** (As some colleges are schools so some college are definitely school.)

Q:199 The correct answer is **option 4** i.e. **Only conclusion I follow.**

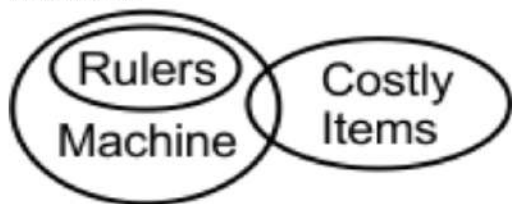

Conclusion:

I. All wolfs are jackals → **Follows** (It is clear from the Venn diagram as 'All wolfs are dogs and all dogs are jackals' so the all wolfs are jackals)

II. All jackals are wolfs → **Does not follow** (It is not possible from the Venn diagram as 'All wolf are dogs and all dogs are jackals' so the all jackals are not wolfs)

Q:200 The correct answer is **option 3** i.e. **Only conclusion II follows.**

I. Some rulers are costly items - **False** (This is possible but not definite, as no direct relationship between the two is given).

II. Some costly items are machines - **True** (As Some machines are costly items is given).

III. All costly items are machines - **False** (This is possible but not definite).

Hence, **Only conclusion II follows.**
